# Inlays

01

---

Powerbond has opened the doors for thousands of designers with the ability to seamlessly inlay the product within the product to create any flooring design. From large design ideas to beautifully created way-finding designs, Powerbond inlays offer design capabilities perfect for any market segment.

Inlays are created by the architect, designer or owner as part of the floor design and inlaid on site by the flooring contractor. There are no unsightly seams because all inlays are permanently welded together. The textile wear layer eliminates unsightly seaming compounds for a crisp, clean design. Only Powerbond brings you this innovative design option.

Want something more?  
If you can imagine it then we can translate it into the floor. Tandus Flooring's Imaginations program is used for more intricate and detailed designs.

Imaginations are fabricated at Tandus Flooring, shipped to the job site and inset into Powerbond by the flooring contractor.

Imaginations may include but not limited to logos, mascots or images that are unique or repeated designs (animals, stars, flowers, etc.). The Tandus Flooring Imaginations program is a first in the flooring industry and we are the only company to offer this unique service.

Since 1967 Powerbond has been recognized for its durability through proven performance.

Powerbond DNA consists of a heterogeneous construction of nylon and closed-cell cushion that are “Powerbonded” together through heat and pressure. This technology creates hybrid resilient sheet flooring that is beautiful and durable.

**HYBRID RESILIENT SHEET FLOORCOVERING**

*Heat and pressure “Powerbond” the wear layer to the closed-cell cushion, producing a floorcovering that is integral and inseparable*

Designed for even the heaviest of foot or roller traffic, the closed-cell cushion technology allows Powerbond to keep its resiliency through continued wear.

The Revolutionary System (RS) changed the industry in 1998 as a “peel & stick” installation method for Powerbond, and was the first in the industry to eliminate the need for wet glues. RS allows Powerbond to be installed 24/7 without odor and without curing. Occupancy is immediate.

Powerbond is the first hybrid resilient floor to provide an impermeable barrier to moisture and contaminants and remains the standard for impermeable floors. This attribute alone will reduce labor and chemical exposure during maintenance—significant especially in healthcare, education and 24/7 settings.

From easy installation and maintenance to lasting performance, Powerbond is the answer.

*Resilient closed-cell cushion is the “DNA” of VCTT and incorporates the most advanced technology in floorcovering and is the single greatest component to VCTT performance and design.*

# Powerbond® Beauty that lasts

28

---

The hybrid resilient sheet flooring has undergone an aesthetic transformation that has led to a renewed interest from design professionals. Powerbond's award-winning design and design capabilities have been recognized by industry experts and its performance has captured multiple awards for sustainability.

Now you can have your cake and eat it too...

But seeing is believing. Schedule a Powerbond demonstration today by contacting your local Tandus Flooring representative.

---

---

## Performance just got a face lift

---

You can now have a fresh design medium that truly bridges beauty and durability with unsurpassed environmental attributes. Think it sounds too good to be true? Think again.

Through our heritage of innovation and inspiration comes a hybrid resilient sheet flooring with new aesthetics and style, and the performance and life cycle of a resilient flooring.

This is Powerbond.®

Engineered using closed-cell cushion technology that is “Powerbonded” to a nylon wear layer through heat and pressure, Powerbond is the ultimate alternative to carpet and resilient flooring with uncompromised design options.

Powerbond offers design capabilities that are unmatched by any other flooring thanks to the closed-cell cushion technology. Powerbond provides the ability to include large scale designs as inlays or more detailed creations using Tandus Flooring’s Imaginations™ program.
