New Broadloom Delivers Luxurious Performance to Commercial Interiors

SOLON, Ohio (June 12, 2017) — Tarkett, a worldwide leader in innovative and sustainable flooring and sports surface solutions, today announces the introduction of Apace, a brand-new woven broadloom from Tandus Centiva. Apace can be defined as the soft surface flooring where luxury meets performance.

Apace is a thick, sumptuous woven broadloom that delivers a modern Berber aesthetic with the longevity of a solution-dyed nylon yarn. The result is an in-the-moment take on a timeless design, bringing a classic elegance to today's commercial workplace. Apace's intricate construction teases the eye with random texturing and a consistent crimp that leads to wool-like characteristics.

Achieving this comforting woven broadloom takes 6-ply warp yarns composed of 4-ply bulk fiber wrapped in thin, tightly twisted 2-ply fiber. This attention to detail in Apace's woven fibers creates a warm, inviting yet durable carpet.

The 100 percent solution-dyed woven broadloom is available in 13 colors. The color palette contains warm and cool grays, creams and taupe neutrals with flecks of contrasting tones that impart soil and stain-hiding color contrasts. Because Apace is solution dyed, it's ideal for a variety of settings, from highly designed workplace interiors to healthcare settings. Apace is available beginning during NeoCon 2017.

More information about all of Tarkett's products can be found at www.tarkettna.com. High resolution product images available upon request.
