Tandus Centiva and Suzanne Tick Inc.'s IxD Series Delivers 3 Connected Designs

SOLON, Ohio (June 12, 2017) — Tarkett, a worldwide leader in innovative and sustainable flooring and sports surface solutions, announces IxD Series, the latest soft surface collaboration between Tandus Centiva and Suzanne Tick Inc. Through its use of interaction design, IxD is informed by the interactive connection between work and play.

IxD was envisioned as a response to how segments are merging together, with unifying elements creating emotional responses. IxD comprises three unique yet complementary designs: Output, Input, and Optic.

Output — which features loop construction — shines in large workplace areas, and its colored accent modular tiles are ideal in healthcare settings. Input as a Powerbond® product transforms higher education settings with its all-over texture and subtle patterning. Optic's twisted, tip-sheared yarns give it a Berber, chunky texture that offers a plush residential-like aesthetic with commercial performance. Offered in a variety of colors, tile sizes, and backings, IxD can be used time and again yet never look quite the same each time.

The IxD Series format provides an ideal setting for a flooring plane. When specified as a modular tile beginning at NeoCon 2017, sizes include: Input and Optic, 18"x18", 24"x24", 9"x36", 18"x36", and 36"x36"; Output is available in 24"x24" and 9"x36".

More information about all of Tarkett's products can be found at www.tarkettna.com. High resolution product images available upon request.
