Summary

Technical Datasheet

3D Studs
Easy kit 3D studs

ACCESSIBILITY

DESCRIPTION

Ready to use self-adhesive warning studs kits for heavy traffic.
Kit of 33 studs already pre-mounted in 42 * 22,5 cm template, allowing the simultaneous installation of 33 studs. Easy, effective and reliable installation.

Compatible flooring:
- Homogeneous & heterogeneous vinyls in rolls
- LVT Glue-down
- Linoleum

Main segments of application:
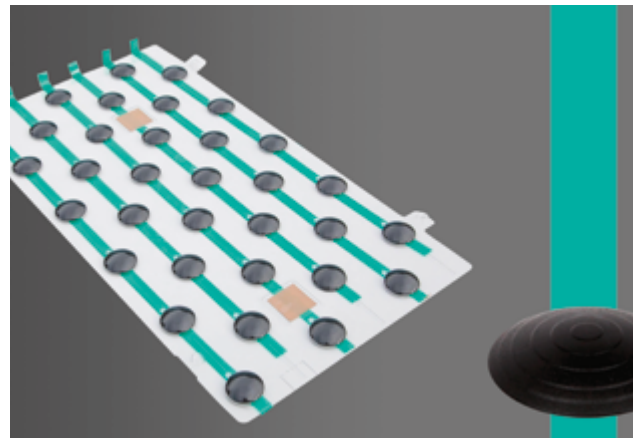

TECHNICAL INFORMATION

Product

Length (cm)	42
Width (cm)	22,5
Height (mm)	5
Net weight (Kg)	0,13
Type	kit of 33 studs

Packaging

Pieces per box	8 kits
Box size (cm)	44 x 27 x 7
Box weight (kg)	1

	Black RAL 9011	1440552	3423128552805

INSTALLATION

Easy, effective, reliable installation:
- Rapid installation: less than 10 min. per linear metre by a single person
- Without glue
- Without drilling

1- Simply pull on the green strips to remove the protecting adhesive on each stud.
2- Then walk on it to ensure that the studs come through the template.

Technical Datasheet

Tactile strip Self-adhesive linear strip

ACCESSIBILITY

DESCRIPTION

Polyurethane self-adhesive tactile strip guides for visually impaired people to help finding their way. Linear strip makes white stick follow channel.

Key features:
- Ready-to-use solution in tiles.
- Quick and easy installation with its self-adhesive solution.
- In accordance with requirement for disabled access and safety.

Compatible flooring:
- Homogeneous & heterogeneous vinyls in rolls
- LVT Glue-down
- Linoleum

Main segments of application:
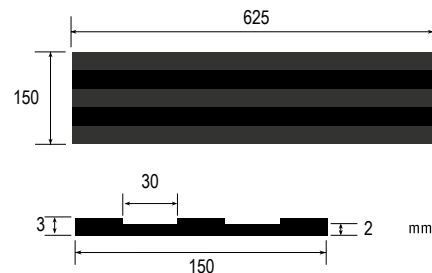

TECHNICAL INFORMATION

Product

Size (mm)	150 width x 2.0 lower thickness x 3.0 upper thickness x 625 length
Unit weight (g)	455

Packaging

Pieces per box	15 strips
Box size (m)	0.64 x 0.17 x 0.12
Box weight (kg)	8.74
Min. order	1 box

INSTALLATION

- Surface must be clean and free from any residu.
- To contrast with surrounding floorings to ensure clear visibility.
- Strip off the film from the backside and fix it onto the substrate.
- Use a heavy roller to press down the strip.
- Leave a 3 cm space between each strip lengthwise.

CLEANING & MAINTENANCE

For daily cleaning, use standard neutral detergents (ph 7) and damp moping.

Cold welding
type A for PVC in sheets

ADHESIVES & WELDING

DESCRIPTION

Cold welding solution in a tube with a needle.
Specially designed for heterogeneous vinyl floor covering sheets that have been overlapped and double cut.

Key features:
- Invisible joint.
- Easy to apply with the needle that acts as a guide.
- Quick-drying solution.

Compatible flooring:
- Heterogeneous vinyl floorings in rolls.

Main segments of application:

TECHNICAL INFORMATION

Product

Unit weight (g)	44 (20 lm)

Packaging

Pieces per box	24 tubes
Box size (mm)	310 x 220 x 100
Box weight (kg)	1.056
Min. order	1 box

INSTALLATION

- The sheets must be overlapped and double-cut.
- Fix the tape over the joint and use hand roller to ensure bonding.
- Cut tape along the seam (rolling knife recommended).
- Insert the needle of the tube into the joint and press regularly. Make sure you apply enough liquid along the joint.
- Take the tape away (after approximately 10 min).
- DO NOT remove any excess of liquid, it will disappear during normal wear.
- Cold liquid welding can be carried out 24 hours after the installation of the vinyl floor covering.
- Cold welding not valid for homogeneous, LVT and linoleum floorings, and tiles format.

Tarkett Genius Tape

DOUBLE SIDED TAPE

DESCRIPTION

TARKETT GENIUS TAPE is designed to be used with the Excellence Genius loose-lay range. It is a removable double sided adhesive on a grid support, formulated with solvent-free acrylic glue to better respect the environment. Ideal for renovation areas where asbestos regulations are needed, TARKETT GENIUS TAPE will stick perfectly to the resilient flooring backing and ever so slightly to the subfloor - ensuring safe installation and allowing easy removal. When it comes to removing the flooring, GENIUS TAPE will leave the floor intact.

Key features:
- Double sided tape
- Designed to be used with Genius loose-lay range
- Ideal to be used in accordance with asbestos regulation
- Solvent free
- Easy use thanks to its protective film
- Easy disposable of the flooring even after several years and without damage to the subfloor

Compatible flooring:
- Heterogeneous vinyl Excellence Genius Loose-lay

Main segments of application:

① - Adhesive mass 1
② - Base
③ - Adhesive mass 2
④ - Protective film
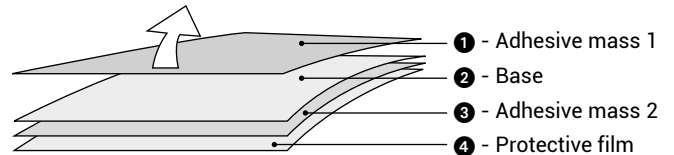

TECHNICAL INFORMATION

Product

Length (Lm)	25
Width (mm)	96
Thickness (mm) without protective film	0,205
Unit weight (g)	500

Packaging

Pieces per box	3
Box size (mm)	182 x1 82 x 346
Box weight (kg)	2,5
Pallet size (mm)	1200 x 800 x 1200
Pallet weight (kg)	180
Min. order	1 box

INSTALLATION

- The floor has to be clean and dry, oil free, silicon free and dust free.
- The room, the product and the tape have to be between 18°C and 30°C.
- Humidity between 50% and 60%
- Press the elements with ta pressure of 0.02 Mpa
- Waiting time of 24h for an optimum adhesion

CLEANING & MAINTENANCE

No cleaning or maintenance required.

Spray adhesive
Tarkospray - Professional

ADHESIVES & WELDING

DESCRIPTION

Water-based acrylic adhesive delivered in an aerosol can for professionals (Installers, Contractors, Building owners, Specifiers).

Key features:
- High grade acrylic adhesive, ready to use.
- 70% faster to apply, no tools required.
- After floor covering laying, can be used immediatly.
- Safe solution: non toxic, non flammable, same propellant as asthma pumps, zero CFC.
- Environmental properties: 80% less glue doing the same job, low VOC emissions, improved recycling process.

Compatible flooring:
- Heterogeneous and homogeneous floorings.

Main segments of application:

TECHNICAL INFORMATION

Product

Unit weight (g)	625 (15m²)

Packaging

Pieces per box	6
Box size (cm)	24 x 17 x 33
Box weight (kg)	5.0
Pallet size (m)	1.0 x 1.12 x 0.86
Pallet weight (kg)	440
Min. order	20 boxes

English, Swedish, Spanish, Italian, Portuguese	1460 005	1094922319899

INSTALLATION

- The subfloor must be level, flat, clean, free from marks, dry, solid, smooth and not exposed to moisture.
- The building, subfloor, flooring and adhesive must be acclimatized to a minimum 15°C.
- Store adhesive at 15°C minimum temperature for 24 hours prior to installation.
- Ensure subfloor, flooring and surrounding areas are clean and dust free. Damp-mop the subfloor if dust is present (you can check with a white cloth).
- Shake the aerosol can well and remove the cap.
- Hold the can horizontal approximately 50-76 cm above the substrate and spray adhesive smoothly
walking right to left, respecting density of flakes.
- Allow adhesive to dry until there is no transfer when touched lightly.
- Lay down your flooring into the adhesive
- Complete bond by applying pressure.

CLEANING & MAINTENANCE

Adhesive stains can be removed with damp sponge when still fresh or with white gas later on.

Corners for Clean Room Internal preformed coves

CLEAN CORNERS

DESCRIPTION

Internal Floormitres are designed to make the fitting of vinyl in floor corners as simple and as hygienic as possible. These products are designed to make the fitting of vinyl in corners easier, quicker and smoother. These durable corner junctions are unique allowing the perfect uniform finish every time.

Key features:
- Hygienic: inhibits the build up and hibernation of bacteria in internal corners
- Ideal for clean room environments
- Increases the speed of installation

Compatible flooring:
- Homogeneous and heterogeneous vinyl in rolls.
- Linoleum.
- Static dissipative products

Decorative set-in skirtings
Preformed linoleum skirting - SIS

SKIRTINGS & COVING

DESCRIPTION

Flexible set-in skirting made of linoleum, reinforced with polymer on backside.

Key features:
- Skirtings ready for use, saving time and money.
- Neat and tidy finish.
- Hot welded to the floor and all covering for perfect hygiene and easy cleaning and maintenance.
- Available in 3 formats: 60/80/100.

Compatible flooring:
- Linoleum (compact and acoustic∗)

Main segments of application:

TECHNICAL INFORMATION

Product

Size (mm)	2400 length x 100 width x 2/2.5/3.8 thickness x 60 height 2400 length x 100 width x 2/2.5/3.8 thickness x 80 height 2400 length x 100 width x 2/2.5/3.8 thickness x 100 height Also available on request on 200 mm, onto the floor.
Unit weight (g)	780 (60 mm version)

Packaging

Pieces per box	10 (24 lm)
Min. order	2 boxes (48 lm)

INSTALLATION

- To be glued to the wall using an acrylic contact adhesive: spread adhesive within the pre-marked sections of the subsurface with an appropriate brush.
- Spread adhesive on the backside of the corner.
- Hot weld to the floor covering.

CLEANING & MAINTENANCE

For daily cleaning, use standard neutral detergents (ph 7) and a dedicated tool specific for corner cleaning.

DESCRIPTION

PVC profile providing a neat cove allowing floor coverings to be dressed up to the wall to form a skirting.

Key features:
■ 2-in-1 system: both cove former and capping integrated solution.
■ Floor covering supported at a weak point, forming round shape angle.
■ Protection of the top of the floor covering.
■ Easy cleaning and maintenance.

Compatible flooring:
■ Homogeneous & heterogeneous vinyls in rolls (both compact & acoustic version).

Main segments of application:

PVC cove formers & cappings Semi-flexible PVC capping - CAP1

SKIRTINGS & COVING

DESCRIPTION

Co-extruded semi-flexible PVC capping seal used to cover the edge of the resilient floor covering when it rises up to the wall. Usually used with a cove former PA series.

Key features:
- Nice visual finish.
- Easy installation thanks to its semi-flexible material.
- Good value for money.

Compatible flooring:
- Homogeneous & heterogeneous vinyls in rolls.

Main segments of application:
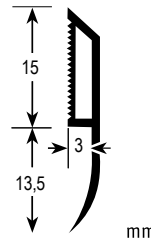

TECHNICAL INFORMATION

Product

Size (mm)	2700 length x 3 thickness x 28.5 height
Unit weight (g)	122

Packaging

Pieces per box	25 (67.50 lm)
Box size (m)	2.7 x 0.08 x 0.08
Box weight (kg)	3.6
Pallet size (m)	3.0 x 0.6 x 1.4
Boxes per pallet	80
Min. order	1 box

INSTALLATION

- Use an acrylic contact adhesive.
- Cut the profile to the desired length.
- Spread adhesive on the backside of the capping with an appropriate brush.
- Fitted once the floor covering has been bonded.
- Use a primer before installation.

CLEANING & MAINTENANCE

For regular cleaning, use standard neutral detergents (ph7) and a dedicated tool specific for capping cleaning.

Rigid PVC capping - CAP2

SKIRTINGS & COVING

DESCRIPTION

Rigid self-adhesive PVC capping seal used to cover the edge of the floor covering when it rises up to the wall.
Usually used with a cove former PA series.

Key features:
- Self-adhesive, no glue needed.
- Providing neat finish.
- Easy installation.

Compatible flooring:
- Homogeneous & heterogeneous vinyls in rolls.

Main segments of application:
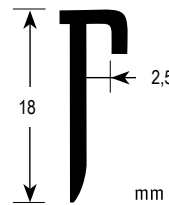

TECHNICAL INFORMATION

Product

Size (mm)	2700 lenght x 2.5 thickness x 18 height
Unit weight (g)	164

Packaging

Pieces per box	25 (67.50 lm)
Box size (m)	2.7 x 0.18 x 0.09
Pallet size (m)	2.7 x 0.65 x 1.2
Boxes per pallet	40
Min. order	1 box

INSTALLATION

- To be glued, the surface must be flat, clean, sound, dry, solid, hard, smooth, moderate absorbent, free of grease and not exposed to high humidity.
- Cut the profile to the desired length.
- Remove the silicone-coated paper.
- Push the profile into place.
- Use a primer before installation.

CLEANING & MAINTENANCE

For regular cleaning, use standard neutral detergents (ph7) and a dedicated tool specific for capping cleaning.

Stairs nosings Inside & outside stair corner - SB1/2

STAIRS

DESCRIPTION

Flexible PVC decorative corners, covering the edge of the floor covering. To be glued. Inside corner: Used to protect the bottom of the wall alongside the staircase. Outside corner: Used to protect the edge of the floor covering and to hide it.

Key features:
- Designed to form a neat and attractive edge.
- Color combination with PVC stair nosing.
- Easy to clean and maintain.

Compatible flooring:
- Suitable for use with Tarkett's Tapiflex stair coverings.
- Heterogeneous and homogeneous vinyls in rolls.
- Linoleum.

Main segments of application:

SB1 - Inside   no. 1   SB2 - Outside   no. 2   mm

TECHNICAL INFORMATION

- Use contact adhesive.
- SB1 inside borders need to be adapted to the angle of the stairs. Grind the "inner corner" of the SB1.
- SB2 outside borders need to be cut at 45° for a better look.

CLEANING & MAINTENANCE

- For daily cleaning, use standard neutral detergents (ph7) or damp mopping.

Tarkett

Technical Datasheet

Stairs nosings
Round-shaped stairnose
NM1

STAIRS

DESCRIPTION

Flexible PVC stairnose with ribes. To be fixed with adhesive.

Key features:
- Specially designed for round-shaped stair noses, with bending radius 8R.
- Easy to install thanks to its flexible structure.
- Ribbed surface for slip-resistance.
- Easy to clean and maintain.

Compatible flooring:
- Typically used with resilient floor coverings.
- Heterogeneous and homogeneous vinyls in rolls.
- Linoleum.

Main segments of application:

TECHNICAL INFORMATION

Product

Size (mm)	40 height x 60 width x 5.5 thickness x 3000 length
Unit weight (g)	556

Packaging

Pieces per box	12 (36 lm)
Box size (m)	3.08 x 0.12 x 0.12
Pallet size (m)	3.0 x 1.0 x 0.8
Boxes per pallet	25
Min. order	1 box

INSTALLATION

- Surface must be flat, clean, sound, dry, solid, hard, smooth, moderate absorbent and not exposed to high humidity. Use contact adhesive only.
- Only ribbed part is fully adhered to substrate. The lower lip is loose to prevent the profile to move and to resist better at the pressure.
- Respect shapes and angles of the stairs.
- Always start from the bottom of the staircase.
- Trace a straight line on the flat part of the step to get a perfect alignment.
- Glue the flat part of the step first following the premarked line and adjust the lower lip.
- When installing the floor covering: «Break» it and force it into the inner angle of the step. Heat backside of the staircase to make it more flexible.
- DO NOT heat the surface to avoid gloss effect.

CLEANING & MAINTENANCE

- For daily cleaning, use standard neutral detergents (ph7) or damp mopping.
- Use a brush to clean the grooves.

Product

Size (mm)	2700 length x 25 width x 4 height (down position) 2700 length x 25 width x 9.5 height (upper position)
Unit weight (g)	702

Packaging

Pieces per box	10 (27 lm)
Box size (m)	2.70 x 0.02 x 0.04/0.095
Box weight (kg)	8.02
Min. order	1 box

INSTALLATION

- Full kit including bottom and top profiles with screws.
- Surface must be flat, clean, sound, dry, solid, hard, smooth, moderate absorbent, grease free and not exposed to high humidity.
- Use a primer before installation.
- Keep 8.25 mm on both flooring edges.
- Screw the transition strip.

CLEANING & MAINTENANCE

- For daily cleaning, use standard neutral detergents (ph 7) and damp mopping.
- Use a brush to clean the grooves.
- Lightly burnish the profile with steel wool to help maintain its appearance.

PVC profile for rolls Glued transition profile TTP

TRANSITION PROFILES

DESCRIPTION

Flexible PVC transition strip used to join different floorings of the same or slightly different thicknesses.
To be glued.

Key features:
- Easy to install thanks to its flexible structure and floor coverings to be inserted.
- Hygienic and easy to maintain: suitable for health care applications.
- Ability to combine compact and acoustic floorings.
- Suitable for use in heavy-traffic areas.

Compatible flooring:
- Heterogeneous and homogeneous vinyls in rolls
- Linoleum

Tarkett

Acoustic comfort underlayer Elafono

UNDERLAY & OVERLAY SOLUTIONS

DESCRIPTION

Underlayer made of cork to enhance acoustic comfort choosing the natural route.

Key features:
■ High-performance acoustic insulation reducing both impact sound reduction up to 15 dB, and in-room noise up to 65 dB, with any compact linoleum.
■ 100% natural and sustainable backing layer.
■ Highly flexible to ease installation.
■ Superior performances in static indentation, thermal resistance and underfoot comfort.

Subfloor type & applications:
■ Commercial applications.
■ Concrete surfaces.

Compatible flooring:
■ Compact linoleum in rolls.
■ Heterogeneous and homogeneous vinyls in rolls.

Main segments of application:

TECHNICAL INFORMATION

Product

Size (m)	30 length x 2 width
Thickness (mm)	2.0
Total density (g/m^2)	1450

Packaging

Min. order	1 roll (also available as 608 x 608 mm pre-cuts for access floor producers)

INSTALLATION

■ Unroll and acclimatize in the room for at least 24 hours (> 18°)
■ Switch off 48 hours before installation the underfloor heating system, and remain it off at least 48 hours after.
■ The subfloor must be flat, level, clean, without marks, sound, dry, solid, hard, smooth and not exposed to moisture.
■ Install underlayer with the jute backing facing upwards and edge to edge
■ Install Elafono and Linoleum flooring in the same direction. Use acrylic adhesive for linoleum flooring. Pay attention to the waiting time for such adhesive - read the installation instructions.
■ The joints of the Elefano and of the linoleum must have a gap of at least 50 cm.

CLEANING & MAINTENANCE

No cleaning or maintenance required.

Acoustic comfort underlayer Tarkomousse

UNDERLAY & OVERLAY SOLUTIONS

DESCRIPTION

Glue-down PVC foam underlayer specially designed for improving acoustic comfort in wet room areas.

Key features:
■ Improved acoustic comfort in wet areas: impact sound - by 19 dB with Granit Multisafe - and in-room noise.
■ Enhanced comfort underfoot.
■ Superior durability and safety.
■ Compatible with Tarkett Wetroom concept to prevent rot, water retention and fungal growth.
■ Made of PVC foam for high resistance.

Subfloor type & applications:
■ Residential and commercial applications.
■ Concrete in wetrooms.

Compatible flooring:
■ Wetroom floorings.

Main segments of application:

INSTALLATION

■ The subfloor must be dry and clean.
■ Glue-down the underlayer to the substrate.
■ Lay the floor covering using acrylic adhesive.

Tarkett

Technical Datasheet

Acoustic comfort underlayer Tarkomfort Premium

UNDERLAY & OVERLAY SOLUTIONS

DESCRIPTION

Loose-laid engineered underlayer, made of viscoelastic polymer with double sided anti-slip texture for enhanced acoustic performance.

Key features:
■ High-performance acoustic insulation: high-impact sound reduction (19 dB with iD Inspiration Click) and in-room noise reduction (72 dB).
■ High-performance solution with good static indentation resistance (0.18 mm with iD Inspiration Click).
■ Thermal resistance strandard respected: 0,02 m²/W
■ Minimal thickness, ideally suited for renovation.
■ Quick and easy to install: 1m roll to be handled and light weighted.
■ Loose-lay for easy removal at end of life.
■ Available in 15 lm and 73 lm rolls

Subfloor type & applications:
■ Residential and commercial applications.
■ Screed, concrete surfaces, floorboards.
■ Compatible with underfloor heating.

Compatible flooring:
■ iD Inspiration Click in planker tiles.

Main segments of application:

INSTALLATION

■ Unroll and acclimatize in the room for at least 48 hours (> 18°).
■ The subfloor must be dry and clean.
■ Fully loose laid on the substrate.
■ Fully bonded with the floor covering.
■ Use a specific acrylic adhesive for gluing PVC over PVC*. We recommend to downsize the spatula.
■ Wait for 48h before laying floor covering.

Technical Datasheet

Acoustic comfort underlayer Tarkomfort Pro

UNDERLAY & OVERLAY SOLUTIONS

DESCRIPTION

Loose laid underlayer made of siliconised PET carrier film with high-resistance polyurethane layer and non-woven backing. Specially designed to takle noise and for floating installation.

Key features:
- Powerful acoustic insulation, reducing both impact sound and in-room noise.
- Enhanced durability through its high-density, heavy-duty composition (1,500 g per m²).
- Easy installation and removal with woven anti-slip surface gripping floor covering and its loose-lay solution.
- Reduces impact sound by 13 dB with iD Inspiration Click and Starfloor Click.
- Lowers in-room noise by 74 dB with iD Inspiration Click and Starfloor Click.

Subfloor type & applications:
- Residential and commercial applications.
- Concrete subfloor.

Compatible flooring:
- LVT Click in planks or tiles.

Main segments of application:

INSTALLATION

- Unroll and acclimatize in the room for at least 24 hours (> 18°).
- The subfloor must be dry and clean.
- Loose lay the underlayer on the substrate (tackifying side facing up to the LVT).
- Remove the protective film gradually.
- Lay the floorcovering, no glue needed.
- No waiting time before walking.

Technical Datasheet

Acoustic comfort underlayer Tarkomfort Self-Adhesive
UNDERLAY & OVERLAY SOLUTIONS

DESCRIPTION

Self-adhesive underlayer made of mineral fillers and polyurethane binders to improve acoustic performance easily under glue-down and loose-lay LVT.

Key features:
- Reduces impact sound to 15 dB.
- High-class solution for reducing both impact sound and in-room noise.
- 90% natural raw materials, free from plasticizers and heavy metals.
- Resistance to high-traffic thanks to its high-density material.
- Can be use immediatly after installation.
- Stands up to static indentation: < 0.20 mm.
- Time-saving and easy installation.

Subfloor type & applications:
- Residential and light commercial applications*.
- Concrete, existing hard floorings.

Compatible flooring:
- LVT Glue-down (planks or tiles)
- LVT Loose-lay (planks or tiles)

Main segments of application:

INSTALLATION

- The subfloor must be dry and clean.
- Loose lay the underlayer on the substrate.
- Remove its protective film gradually.
- Lay floor covering, 90° to the underlayer. No glue needed thanks to its self-adhesive system.
- No waiting time before walking.

Damp proof underlayer Tarkodry wall & floor

UNDERLAY & OVERLAY SOLUTIONS

DESCRIPTION

Glue-down homogeneous PVC underlayer, specially design to create waterproofness in wet room areas under ceramics.

Key features:
■ Watertight layer under ceramic tile (wetroom floor and wall) for a safe and longlasting solution.
■ Long-term waterproof warranty.
■ Good adhesion via its embossed structure.
■ Internally flexible homogeneous structure for easy installation and welding.

Subfloor type & applications:
■ Residential and commercial applications.
■ Cement substrates, cardboard dressed plaster.

Compatible flooring:
■ Ceramic tiles

Main segments of application:
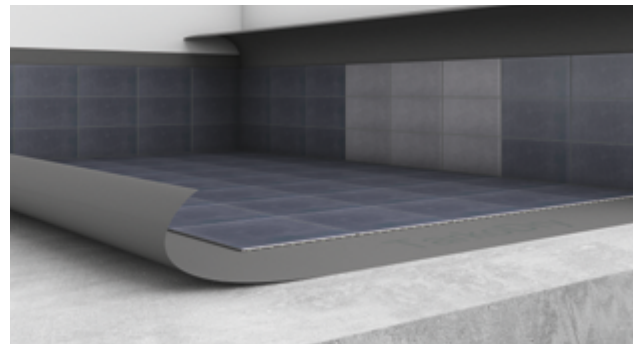

INSTALLATION

■ The subfloor or wall must be clean, dry, and without any residue.
■ The subfloor should have a moisture content of max 8%.
■ Be careful of countries standards.
■ Please refer to the installation sheet for more information.

Technical Datasheet

Uneven floor underlayer Tarkoflat Loose-Lay

UNDERLAY & OVERLAY SOLUTIONS

DESCRIPTION

Loose laid underlayer made of calendered PVC foil to cope with slight unevenness in substrates.

Key features:
■ Ready-to-use solution to reduce slight unevenness of subfloor or existing ceramics up to 1.5 mm depth and 3 mm width.
■ Ideal choice to protect floor during temporary installations.
■ Quick and easy to install - rolls ensure quick coverage .
■ Easy access to substrate in case of problem.
■ Provides savings up to 20 % without need for expensive levelling.

Subfloor type & applications:
■ Residential and light commercial* applications.
■ For renovating old ceramic flooring, granite, marble tiles, wood floors, cement substrates.

Compatible flooring:
■ Heterogeneous vinyls in rolls for temporary installations (up to one month).

Main segments of application:

INSTALLATION

■ Unroll and acclimatize in the room for at least 48 hours (> 18°).
■ The subfloor must be dry and clean.
■ Fully loose laid on the substrate.
■ Fully bonded with the floor covering.
■ Use a specific acrylic adhesive for gluing PVC over PVC*. We recommend to downsize the spatula.
■ Wait for 48h before laying floor covering.

Wet substrate underlayer Tarkolay

UNDERLAY & OVERLAY SOLUTIONS

DESCRIPTION

Loose laid underlayer made of PVC coated glass fibre with studs to manage damp susbtrates.

Key features:
- Ready-to-use solution coping with up to 7% humidity rate CCM (cement base).
- Quicker and less expensive solution than drying the substrate.
- Easy to handle and install.
- Loose-lay solution easy to remove, with no damage to the substrate.

Subfloor type & applications:
- Residential and commercial applications.
- Wood, concrete subfloors.

Compatible flooring:
- Heterogeneous vinyls in rolls.

Main segments of application:

TECHNICAL INFORMATION

Product

Size (m)	45 length x 2 width
Thickness (mm)	Total: 1.3
	Studs: 0.3
Total weight (g/m²)	1350

Packaging

Roll diameter (cm)	35
Roll weight (kg) with chuck	107
Rolls per pallet	10
Pallet size (m)	2.03 length x 1.11 width x 0.1 height
Pallet weight (m)	1070
Min. order	1 roll

CLEANING & MAINTENANCE

No cleaning or maintenance required.

INSTALLATION

- The subfloor must be flat, level, clean, without marks, sound, dry, solid, hard, smooth and not exposed to moisture over 7% CCM.
- Fully loose laid towards the substrate.
- The edge of Tarkolay and flooring must have a gap of at least 20cm.
- Tarkolay should be running parallel (in the same direction) as the flooring material.
- Use ventilated skirtings.
- All traffic must be restricted for 24 hours after installation.
- No heavy traffic or furniture placement for 72 hours after installation.

Expansion joints for rolls

WELDING RODS

DESCRIPTION

Expansion joints are used to join floor coverings in large areas where screed can move and where expansion is required, like entrance and long corridor. The highly resistant silicon joint associated with strong aluminium reinforcement prevents the flooring from tearing and thus from costly repair.

Key features:
■ Perfect and durable solution to preserve floor coverings from building movements.
■ Made on request in any colour for perfect matching.
■ Ready-to-use solution.
■ Easy to clean and maintain thanks to its PU finish.
■ Available in 2 versions: 2.2 mm compact and 3.7 mm for acoustic flooring.

Compatible flooring:
■ Heterogeneous and homogeneous vinyls in rolls.
■ Linoleum.

Main segments of application:
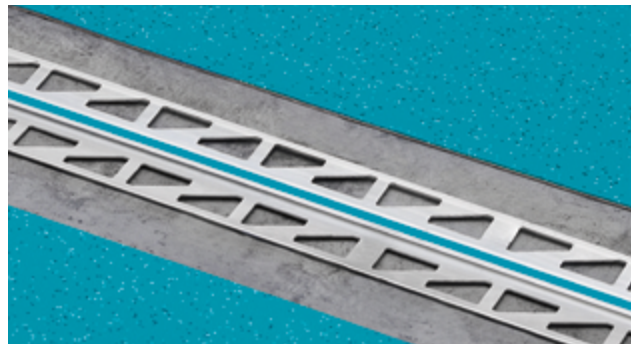

TECHNICAL INFORMATION

Product

Size (mm)		2.2 thickness x 2500 length
		3.7 thickness x 2500 length
Unit weight (g)	2.2	320
	3.7	350

Packaging

Pieces per box		10 (25 lm)
Box size (mm)	2.2	2500 x 80 x 22
	3.7	2500 x 80 x 37
Box weight (kg)	2.2	4.1 kg
	3.7	4.8 kg
Pallet size (mm)	2.2	2500 x 100 x 72
	3.7	2500 x 100 x 87
Min. order		1 box (25 lm)

Welding rods Hot welding for vinyl floorings

WELDING RODS

DESCRIPTION

4 mm welding rods joining floor covering for perfect hygiene, watertightness and seam strength.

Key features:
- Hot welding for perfect watertightness and hygiene.
- Superior seam strength.
- Available in unicolor and multi-colour versions (depending on ranges).
- Designed to match perfectly the flooring colour.
- Multicolour welding rods for HO rolls for invisible welding.
- Easy to clean and maintain.

Compatible flooring:
- Homogeneous vinyls (compact and acoustic)
- Heterogeneous vinyls (compact et acoustic)

Main segments of application:

TECHNICAL INFORMATION

Product

Size (mm)	1 bobbin of 50 lm (diameter 4 mm)
Bobbin weight (kg)	1.0

Packaging

Min. order	1 bobbin

INSTALLATION

- Floor covering must be welded 24h after the installation.
- Groove the floor covering to create a gap between both products with 2/3 thickness for compact, till foam for acoustic.
- Weld the product with an average speed of 2 lm/min and a 350-400°C temperature.
- Rim the overflow of the joint material first with a «Quater moon knife»
- Trim the joint material with the «Mozart» a second time

CLEANING & MAINTENANCE

Cf. flooring cleaning instructions.

Technical Datasheet

Welding rods Hot welding rod for linoleum

WELDING RODS

DESCRIPTION

Welding rods to join linoleum floor covering for perfect hygiene and seam strength.

Key features:
■ Hot welding for perfect hygiene and resistance.
■ Available in Unicolour and Multicolour version and on stock for the whole linoleum range.
■ Easy to clean and maintain.

Compatible flooring:
■ Linoleum

Main segments of application:

TECHNICAL INFORMATION

Product

Size Unicolor	Compact range	1 bobbin of 50 lm (diameter 4 mm)
	Acoustic range	1 bobbin of 50 lm (diameter 4 mm)

Packaging

Bobbin weight (kg)	Unicolor	0.8
Min. order		1 bobbin

INSTALLATION

■ Install sheets with a gap of approx. 0.5 mm at joint.
■ Start hot welding operation (and grooving) minimum 24 to 48 hours maximum after gluing
■ Groove a "U" shape of max. 3,5 mm width, preferably by machine.
■ Depth of grooving 2 mm into the thickness of the material – just over the top of the jute (max.2,5 mm for other product thickness'). Never groove Linoleum Silencio xf² to the top of foam.
■ Carefully clean seam totally free of residues.
■ The recommended welding rod temperature is about 450 ºC.
■ Use hot air welding gun fitted with 5 mm traditional hot speed weld nozzle. When welding the rod must float out slightly on both sides of the joint, on surface.
■ Trim the welding in two successive operations using a "quarter moon knife", Mozart knife, or similar.
■ The second cut should be done when the welding rod is cool down.

FOR MORE EXHAUSTIVE INFORMATION REGARDING ALL THE INSTALLATION STEPS OF THE WELDING ROD PLEASE REFER TO THE OFFICIAL INSTALLATION DOCUMENTS.

The above information is subject to modification for the benefit of further improvement. (06/22)

Drains and gratings Siphon Freja 50 - Horizontal
WETROOMS

DESCRIPTION

Low profile (102 mm) PVC floor drain with horizontal outlet. Outflow capacity of 0.8 liters/second.

Key features:
■ Designed for ease and practicality, the clamping ring adjusts automatically, the plastic grating simply snaps into place, and the water trap can be removed.
■ Easy to clean and maintain.

Compatible floorings:
■ Heterogeneous and homogeneous vinyls in rolls.
■ Wetroom floorings.

Main segments of application:

TECHNICAL INFORMATION

Product

Size (mm)	102 height
Diameter (mm)	50 lower x 220 upper
Outflow (L/sec)	0.8
Unit weight (g)	680

Packaging

|	
Pieces per box	16
Box size (m)	0.60 x 0.39 x 0.36
Box weight (kg)	11.8
Box per pallet	10
Pallet size (mm)	1.2 x 0.8 x 1.4
Pallet weight (kg)	118
Min. order	1 unit

INSTALLATION

■ Should be installed by a plumber, and in accordance with local regulations and the technical specifications provided by Tarkett and the manufacturer.
■ For additonal details, please refer to Wetroom Concept Documentation.

Safe drains

WETROOMS

Technical Datasheet

DESCRIPTION

Flood Protection adapted for accidental outflow of hot and cold water.

Key features:
■ Used for cleaning purposes.
■ Intended for use where there is a risk of leakage and where there is no floor gully (e.g. In bathrooms lacking floor gullies, under sinks of any kind, hotel cleaning rooms, saunas & SPAs).
■ The overflow waste outlet have a removable mechanical odor trap which normally is tight but will let the water through in case of an unintentional leakage.
■ Clamping ring and odour trap integrated.

Compatible floorings:
■ Wetroom floorings.

Drains and gratings Stainless steel siphon (Inox 40) - Vertical

WETROOMS

DESCRIPTION

Low profile (70 mm) stainless steel floor drain with vertical outlet. Outflow capacity of 0.66 liter/second.

Key features:
■ Ideal for industrial kitchens thanks to acid and alkali resistance.
■ Designed for ease and practicality, the clamping ring adjusts the vinyl flooring into the drain, the grating is screwed and cannot be removed.
■ Used in prisons and psychiatric hospitals with unbreakable pieces.
■ Flap inside collecting residues, avoiding unpleasant odors.
■ Full set contains: 1 drain + 3 screws for the clamping ring + 1 screw to lock the grating.

Compatible floorings:
■ Wetroom floorings.

Pipe collars
Waterproof pipe collars

WETROOMS

DESCRIPTION

PVC transition profile for wetrooms. To be hot welded.

Key features:
■ Watertight finish for small diameter pipework.
■ Used where breaking the surface of the wallcovering or floor covering is unavoidable.
■ Variety of sizes available (from diameter 8/12 mm to diameter 100/127 mm).

Compatible flooring:
■ Wetroom floorings.

Main segments of application:

TECHNICAL INFORMATION

Product

Size (mm)	Diameter (upper/lower part): 8/12;
	11/15; 15/19; 18/22; 21/26; 26/31;
	11/15; 15/19;
Unit weight (g)	

Packaging

Pieces per box	24 (For all sizes except for 35/42 and 100/127)
	6 (For 35/42)
	1 (For 35/42)
Min. order	1 unit

INSTALLATION

■ Fix the adhesive paste around the pipe to ensure perfect water tightness.
■ Cut the collar and insert it around the pipe.
■ Seal the collar joint with the adhesive.

CLEANING & MAINTENANCE

Please refer to Wetroom Concept Documentation.
