DESSO AirMaster® Carpet Tiles
Classic 2084 – Earth 2083, 2067 and 6001 – Sphere 2084 and 2926.

BAUX Acoustic Wood Wool
Panel Lines, Panel Stripes, Panel Arch, Panel Diagonal, Panel Check, Tiles Large Rectangle, Tiles Large Square and Tiles Large Triangle in colours from the Florals Collection: Air Blush Pink, Air Amber Orange and Air Cinnamon Brown.

Welcome to a place where the floors and walls play well together. Brought together by the shared values of well-being and environmental responsibility, here BAUX and Tarkett unite in a harmonised colour palette. BAUX Acoustic Wood Wool tiles and DESSO AirMaster® flooring technology work effectively to reduce noise and improve air quality—the perfect building blocks for creating healthier and more sustainable interiors where people can thrive.

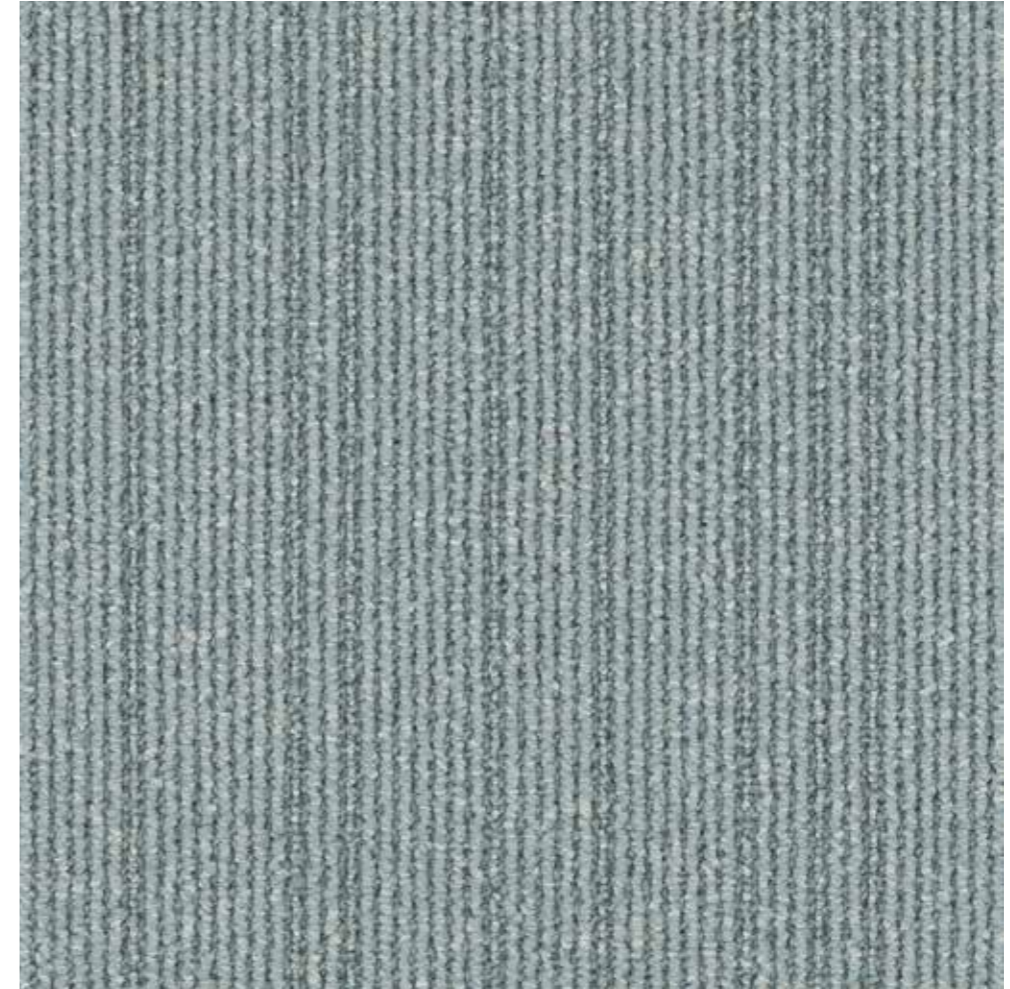

Let's play!

BAUX Acoustic Wood Wool

BAUX believes that we can build more restful and contemporary interiors today without compromising the safety and environmental standards of tomorrow. With Acoustic Wood Wool they have combined two of the world's oldest building materials—wood and cement—to create high-functioning acoustic tiles that are low impact and fully recyclable.

The open material structure of Acoustic Wood Wool tiles effectively dampens noise, helping designers create interiors where people can rest, think, and collaborate. Suitable for all climates, the material also supplies excellent insulating, heat retention, strength, moisture resistance and fire protection properties.

DESSO AirMaster®

We are living, breathing beings on a living, breathing planet. That's why Tarkett believes it is essential to protect the air we breathe. Using DESSO's AirMaster® carpet tiles, designers can clear the air of interior spaces for greater human and environmental health and well-being.

Tarkett's patented DESSO AirMaster® technology helps to improve indoor air quality by capturing and retaining fine dust eight times more effectively than smooth floors and four times more effectively than standard carpet¹. As a sound-absorbent material, the carpet tiles additionally function as a key interior element for creating more restful and focused environments.

1. Based on GUI test report AirMaster® 090225-01 DF with DESSO AirMaster® versus a standard smooth floor and versus standard structured loop pile carpe (median values).

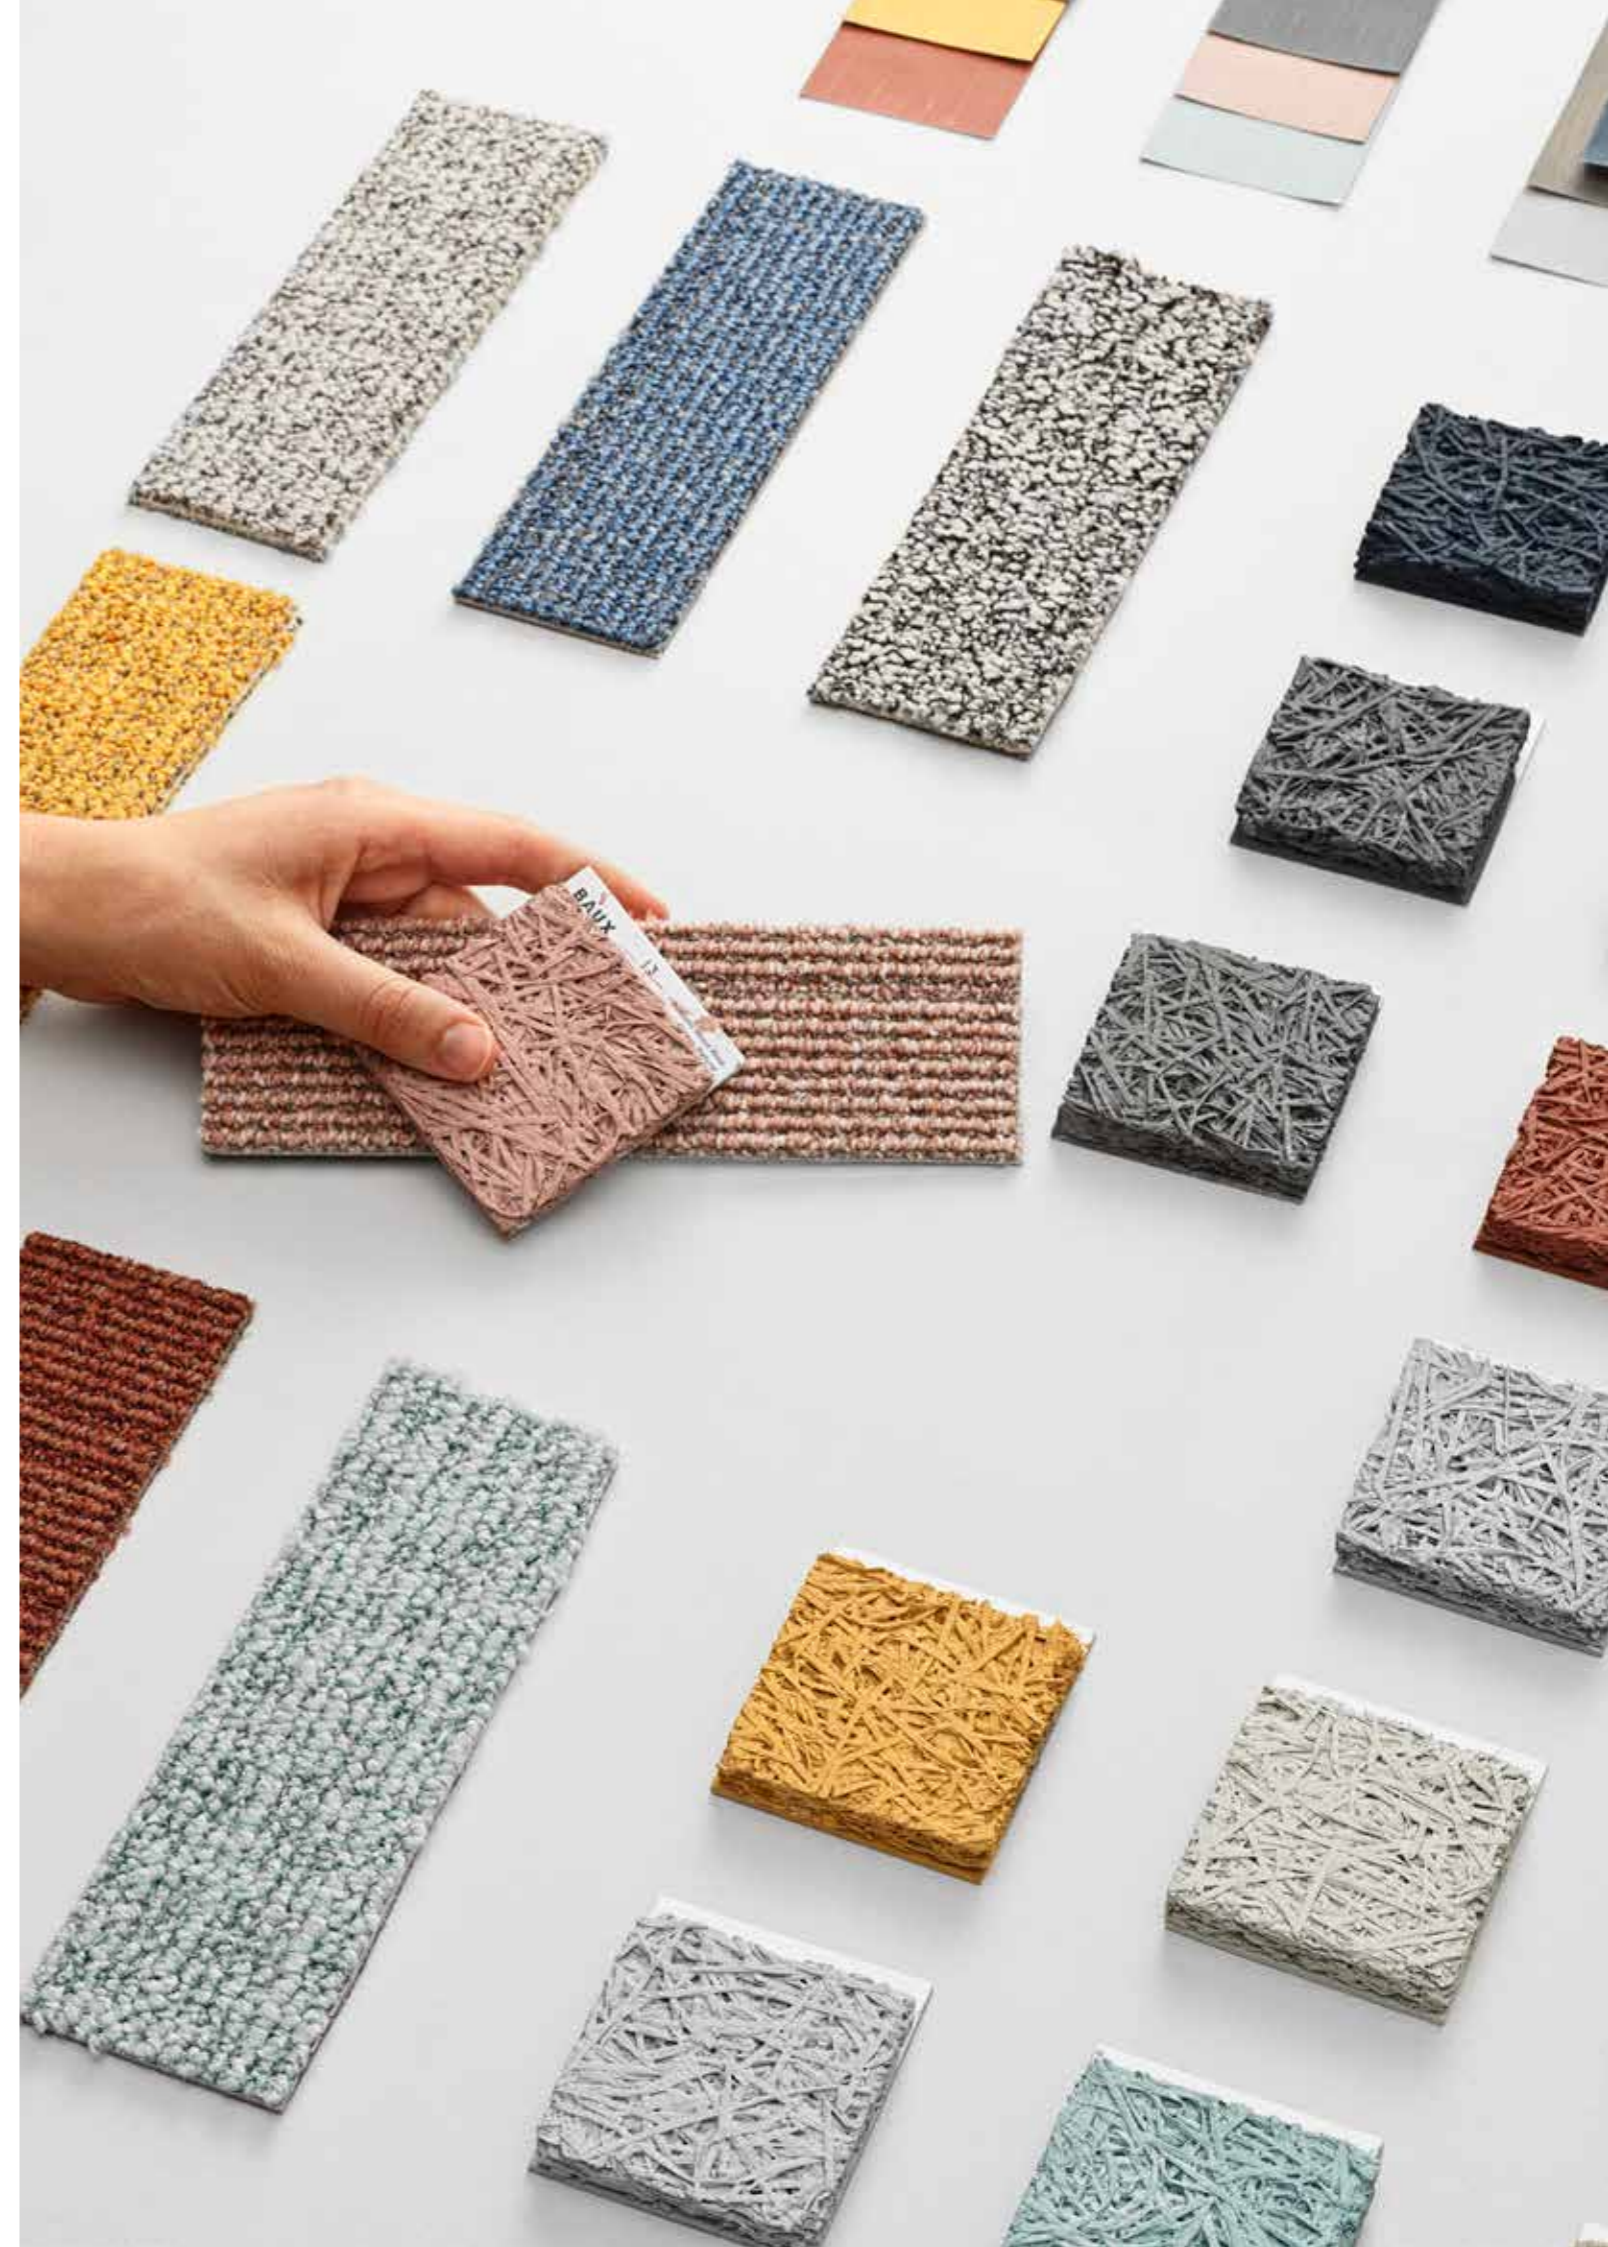

An inspirational meeting of function, colour and texture

To build a bridge and get the multi-textural flooring, wall and ceiling surfaces of Tarkett and BAUX to speak the same colour language, we called upon the international design studio Form Us With Love.

The result is a thoughtfully coordinated and versatile palette, ranging from grounding minerals to warming florals and lofty forest hues.

“We want to provide professional creatives with a means of exploring mix-and-match possibilities and achieving an infinite range of palette diversity within the realm of architecture.”

John Löfgren, Co-Founder of Form Us With Love

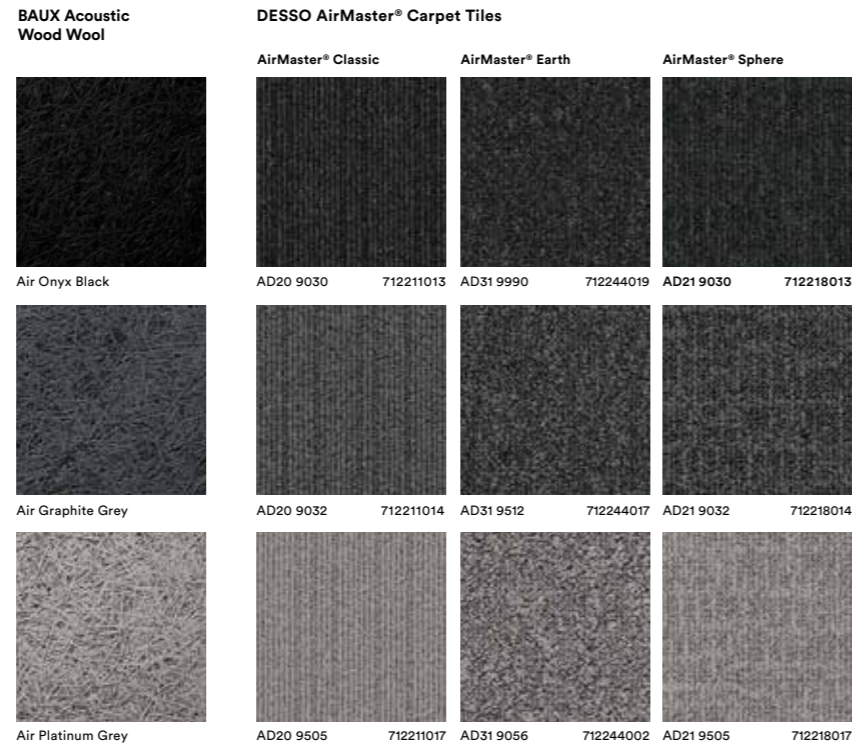

The Colour Range

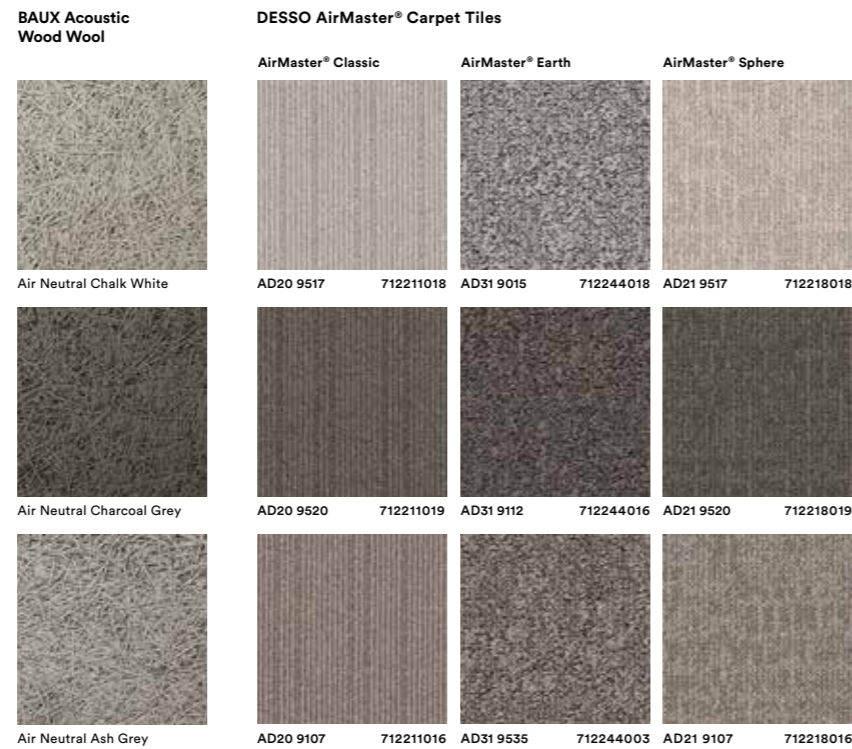

Midnights

Where effortless sophistication, power plays, and intellectual conversations begin. The Midnights Collection was born in the night sky, wandering from Platinum and Graphite Greys to Onyx Black.

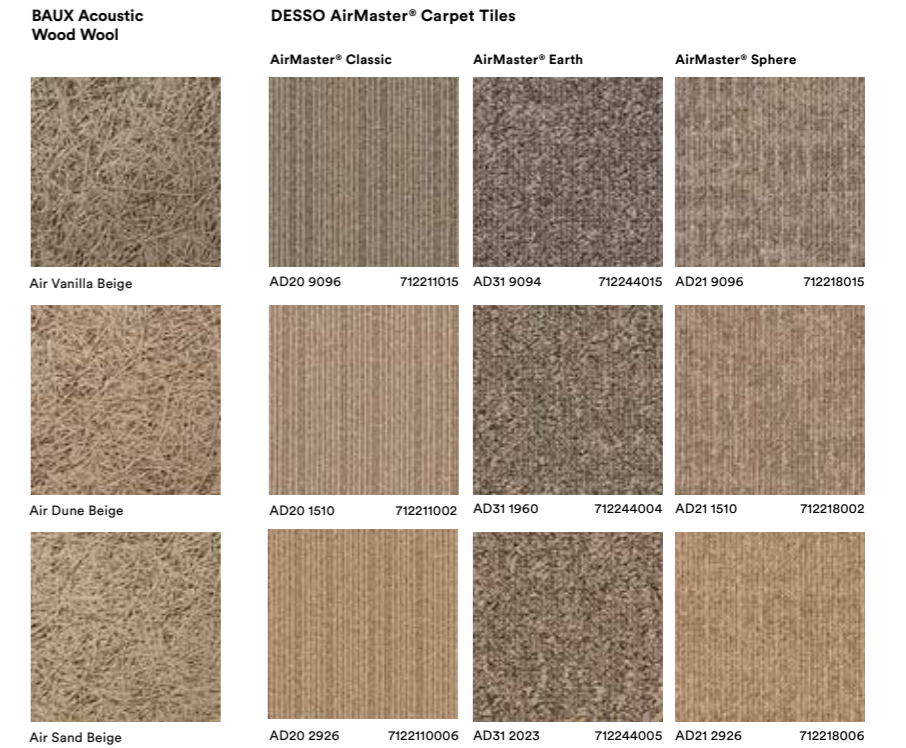

Neutrals

A clean slate for simple statements, and a cooperative starting point for vibrant interior features. The Neutrals Collection ranges from Chalk White to cool and stabilising Ash and Charcoal Greys.

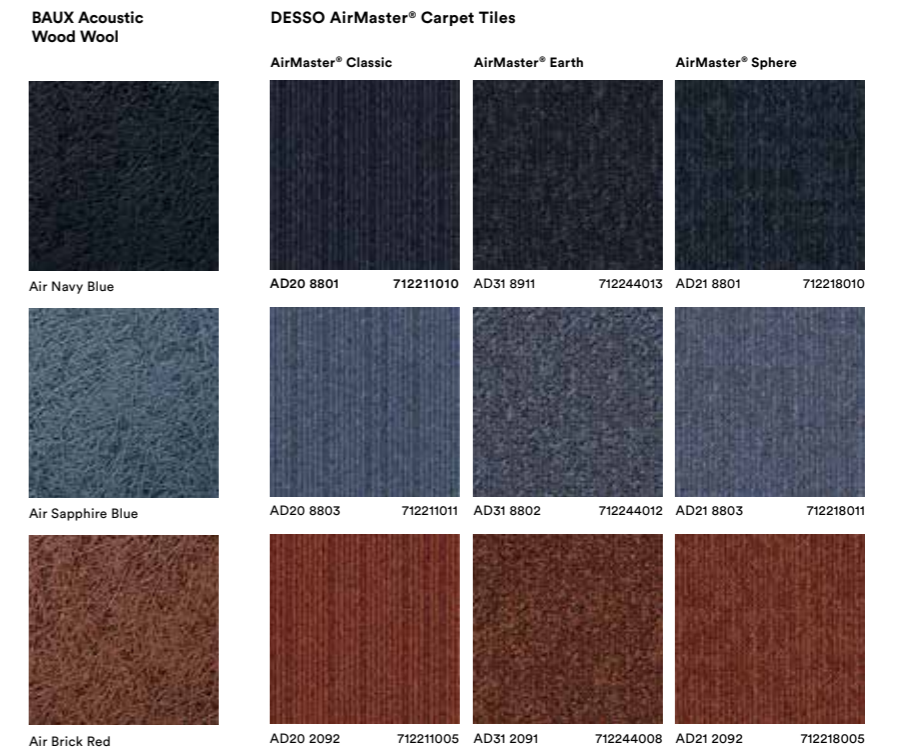

Minerals

Instantly grounding expressions in beige inspired by the building blocks of earth. In the Minerals Collection you'll discover classic Vanilla as well as warm and inviting shades in Sand and Dune.

Oceanic

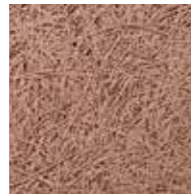

A voyage from deep and confident waters to iron-rich shorelines. The Oceanic Collection empowers calm yet authoritative interiors with Navy and Sapphire blues and spirited Brick Red.

Florals

Heat and playfulness bloom in this colour trio primed for spontaneous accents and bold interior statements. In the Florals Collection you'll find Blush Pink, Amber Orange and Cinnamon Brown.

BAUX Acoustic Wood Wool
Panel Stripes and Panel Check in colours from the Oceanic Collection: Air Sapphire Blue and Air Brick Red.

BAUX Sound Absorption

Less noise means more restful and productive spaces. Quieter environments have been shown to prevent health problems¹, reduce stress levels and improve concentration. This is especially important in open plan interiors such as offices where people need space for quiet concentration as well as private conversations and large-scale meetings.

1. Environmental Noise and Health in the UK, Health Protection Agency, p.57-58, Noise in figures, European Agency for Safety and Health at Work, p.70-73

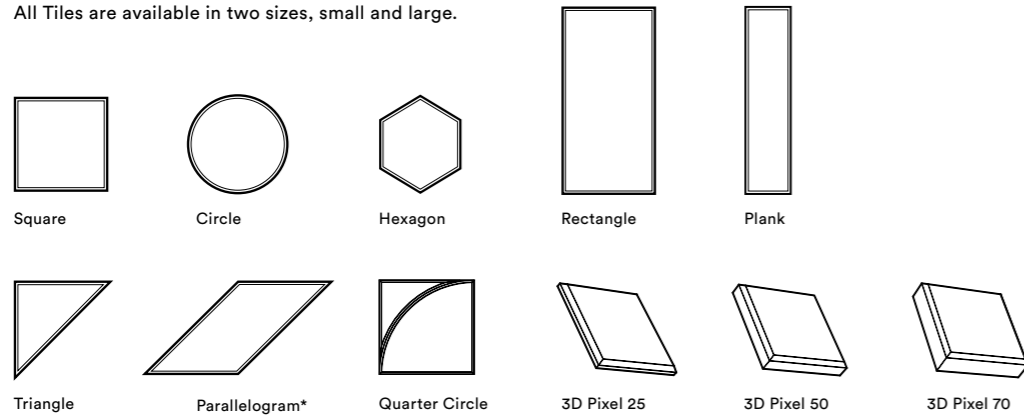

2. An absorption coefficient is one of the key efficiency markers for acoustic materials, showing how much sound is absorbed at different frequencies. In the absorption spectrum, 0 indicates perfect reflection, and 1 indicates perfect absorption. Which one is ideal? It really depends on the kind of acoustic landscape you are aiming to build. While some spaces require maximum tranquility, in others, a bit more bustle and ambience may be desired. Our assortment addresses a range of absorption needs to help you achieve your goals.
