GRADING of WOOD

A tree is like a secret package. You have some ideas of the content, but you do not know for sure what will show up. Each and single wood piece is unique. In our manufacturing the wood is sorted and graded in different families to get specific image of the flooring. Grades are determined by sorting and classifying boards based on features such as the size, number, and distribution of knots, as well as other natural variations. Tarkett offers a range of grades for our wood flooring, each highlighting distinct natural characteristics of the wood.

3 strips:

Supreme – very uniform color with calm look / very small knots / no sapwood
Elegant – uniform color, moderately calm structure / medium knots
Nature - medium color variations, natural look / medium knots / traditional look
Original – medium color variations, lively structure / medium knots / colorful look
Robust – large color variations, lively structure / medium knots / vivid look
Vivid – very lively color and structure / large knots / vintage look. Some of the brushed products in vivid grade are presented with additional photos of knot illustrating specific characteristics of this grade.

2 strip:

Elegant – uniform color, moderately calm structure / medium knots
Vivid – very lively color and structure / large knots / vintage look
Original – large color variations, lively structure / medium knots / vivid look

1 strip:

Premium – uniform color with calm structure / small knots / no sapwood
Elegant – medium color variations, natural look / medium knots / moderately visible sapwood
Vivid –large color variations, very lively structure / large knots / visible sapwood / vintage look
Original – large color variations, very lively structure / medium knots / very visible sapwood / vivid look

Our experience of more than a century long, commitment to excellence and care for customers guide us in eliminating natural wood imperfections.

Селекция древесины

Каждое дерево – особенное и неповторимое.
Каждое дерево похоже на подарок с секретом. Вы догадываетесь, что может быть внутри, но никогда не знаете наверняка, чем на самом деле оно обернется. Каждая планка природной древесины – уникальна. В процессе производства мы тщательно отбираем и сортируем натуральную древесину по различным типам селекции, чтобы получить особые дизайны напольного покрытия. В компании Tarkett мы используем следующие селекции:

3-полосный:

Supreme | Суприм – максимально однородный цвет и структура/ очень мало сучков / нет заболоней
Elegant | Элегант – однородный цвет, умеренная спокойная структура / небольшие сучки
Nature | Натур – средняя вариация по цвету / средний размер сучков / традиционный, естественный вид
Original | Ориджнл - средняя вариация по цвету, разнообразная структура / средний размер сучков / яркий, «живой» вид
Robust | Робуст – широкое разнообразие цвета, «живая» структура / средний размер сучков / яркий, «активный» дизайн
Vivid | Вивид – яркое разнообразие в оттенках и структуре / большие учки / «винтажный» вид дизайнов. Мы добавили дополнительные фото сучков для некоторых брашированных дизайнов в селекции Вивид, чтобы продемонстрировать характеристику этой селекции.

2-полосный:

Elegant | Элегант – однородный цвет, умеренная спокойная структура / небольшие сучки
Vivid | Вивид – яркое разнообразие в оттенках и структуре / большие сучки / «винтажный» вид дизайнов.
Original | Ориджнл – широкое разнообразие цвета, «живая» структура / средний размер сучков / яркий, «активный» дизайн

1-полосный:

Premium | Премиум - однородный цвет и структура/ очень мало сучков / нет заболоней
Elegant | Элегант – средняя вариация по цвету / средний размер сучков /умеренные, «естественные» заболони
Vivid | Вивид – широкое разнообразие цвета, очень «живая» структура / крупные сучки / заметные заболони / «винтажный» вид
Original | Оригинал - широкое разнообразие цвета, очень «живая» структура / средние сучки / заметные заболони / яркий, «активный» дизайн

Благодаря нашему почти полуторавековому опыту, помноженном на стремлению к совершенству и заботе о покупателях, в производстве нашего паркета мы исключаем любые несовершенства природной древесины. 1
