

Cementi Click

MINERAL TILES

Experience
the real
authenticity

Cement embodies the timeless elegance of the concrete art in architecture.

This raw modern material is now made available into a **new category of floor tiles**, Cementi Click. The collection conveys the authenticity of a mineral material and the simplicity of its decors and its **click installation system**. It is created for **high traffic use**, and is therefore highly appropriate for use in hotels, restaurants, stores and many other spaces.

Four patterns in warm and cool grey catch the essence of bare concrete and depict the unspoiled beauty and **authenticity of natural materials**.

Their aesthetic inspires the graphic story of 10 decors, exploring the handmade authenticity of pochoir prints. The collection is complemented with a series of stone and wood material effects. All 23 high-definition designs are easily **combinable**.

Cementi Click initiates a new generation of material for architectural spaces, thanks to the click system that is used for the first time with mineral tiles.

This flooring allows accelerated project installation, with its **swift assembling** and little need for subfloor preparation. It can cover any surface including uneven ones and ceramic.

The extremely **rigid and stable** core structure does not require expansion gaps for large surface installations, even in high temperature variation spaces such as winter gardens and store fronts. With its backing layer, Cementi Click also helps **diminish sound transmission** to neighbouring areas or floors.

FACETS
COLOUR
22778012

FACETS

Facets are a pair of engaging, intriguing designs that confound expectation. 'Tonal' sees patterns begin, only to break off again in a seemingly random fashion. 'Colour' adds a further, chromatic dimension to this asymmetrical artistry.

TONAL
24778011

COLOUR
24778012

COLOUR
24778012

DELTAS

Deltas focuses on a chevron design in the soft hues of concrete. The pattern is repeated at each end of the tile, a modular approach that simplifies installation and creates an apparently infinite sequence.

CARING FOR PEOPLE AND THE PLANET

At Tarkett, we strive to support both our professional clients and consumers in creating healthy, beautiful and sustainable living spaces.

Designing for life

A new flooring category in Tarkett's portfolio, Cementi Click has been designed for life.

Good materials

Cementi Click meets our materials quality standards. Made of 95% natural mineral elements, it is both durable and respectful of people's health and the environment. Its core board is made from clay (cement), cellulose, and fillers which are abundant natural resources, therefore preserving natural capital.

Resource stewardship

Cementi Click's production process ensures effective water and energy management. No water is used in the production processes. Additionally, 100% of the electric power of the plant is renewable.

People friendly spaces

Cementi Click contributes to good indoor air quality. Its TVOC emissions is $\leq 10 \mu\text{g}/\text{m}^3$, well under current regulations and standards. It is blue angel certified and is naturally phthalate-free. For well-being, Cementi Click minimizes the noise thanks to its good acoustic performance (19db). Cementi Click is easy to install and maintain overtime. Thanks to its Click system, it is installed without any adhesive. Its PUR surface treatment, which is highly resistant to stains scuffs and scratches, allows for a chemical-free maintenance, using little water over its lifespan.

Closing the loop

Reuse

Through the production process, the cement can easily be recycled: all the manufacturing waste and productions scraps are collected and sent to cement producers in order to reuse them in cement production.

Post use

CementiClick is eligible to Tarkett's ReStart program, post utilisation of the product. After the product has been used, it can be collected and sent back to the manufacturing site to be re-engineered as a new product.

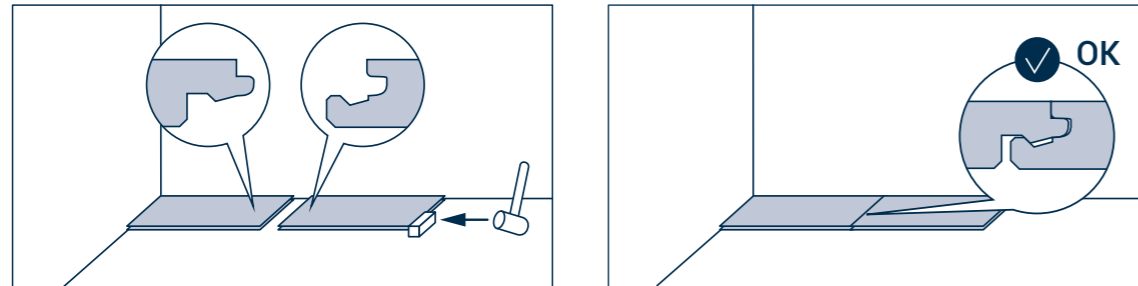

More excellent reasons to choose Cementi Click

- ✓ TVOC $\leq 10 \mu\text{g}/\text{m}^3$ for good indoor air quality
- ✓ Blue angel certified product for good indoor air quality
- ✓ Good acoustic performance for people's well-being and comfort
- ✓ CE Marking and REACH compliant
- ✓ Made of 95% of abundant natural materials
- ✓ Naturally phthalate-free
- ✓ All manufacturing waste recycled and reused in cement production
- ✓ Production plant powered with 100% renewable energy
- ✓ Eligible to Post-Use ReStart program: after use, product can be sent back to the manufacturing site to be re-engineered.

INSTALLATION SYSTEM AND ACCESSORIES FOR LONG-LASTING FLOORS

Cementi Click initiates a new generation of material for architectural spaces, thanks to the click system that is used for the first time with mineral tiles, allowing a swift assembling.

Click system for easy & quick installation

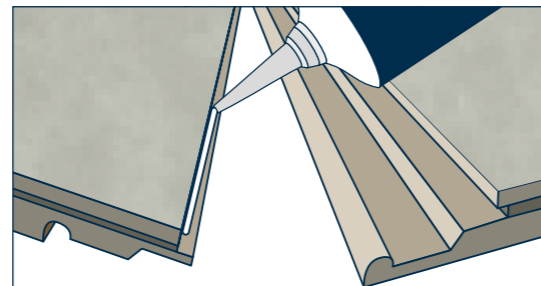

The Cementi Click collection offers a complete accessory range to make your floor water-resistant and long lasting. These solutions also ensure the perfect finish for your flooring.

Waterproofing solution for 100% water-tightness

To optimize the installation in wet areas, Tarkett has created Tarkoproof, a liquid sealant solution designed for Tarkett click modular solutions. Tarkoproof will prevent any dust or water penetration into the bevels thus ensuring an ease of maintenance and an improved durability for the Cementi Click floors.

Silicone joint for waterproof installation

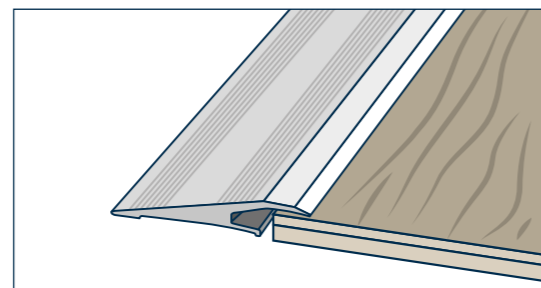

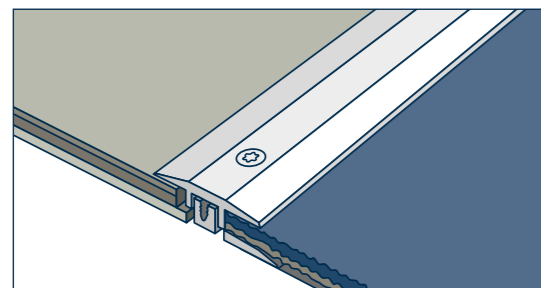

Aluminium reduction strip:

- Compatible with floorings having major difference in thickness, up to 8mm.
- Large slope to make circulation easier.
- Ribbed surface for slip-resistance.
- Easy to install solution (one piece).
- Suitable for immediate use in high-traffic areas.

Profiles for a perfect finish

Aluminium transition strip for high traffic :

- Superior resistance to high-traffic.
- Ribbed surface for slip-resistance.
- Two parts system to be screwed for long lasting performance.
- Easy to clean and maintain.

The specification data is available online.
