Tarkett's Lino is made from natural ingredients in Narni, Italy, with the same original recipe since 1898, enabling Tarkett's team to gain a real know-how and to have an intimate understanding of every natural ingredient to adapt manufacturing to the variations of each year's crop.

We constantly innovate in production processes, develop colours and new striking designs and improve our flooring technical characteristics for specific uses such as acoustic comfort in Education or Electrostatic Discharge (ESD) control.

Tarkett's Lino combines tradition and innovation to meet the needs of consumers worldwide and provide them with a unique experience.

Our linoleum offers a timeless design and a robustness that stand the test of time.

HERITAGE

A TRADITIONAL FLOORING MADE IN ITALY

One of Italy's smallest regions, Umbria lies directly in the centre of Italy. Tarkett's linoleum plant began its production in Narni, Italy, at the end of 19th century, when European countries commonly used linoleum for flooring and wall-coverings. By the 1920s, there were around 100 sites making linoleum. In the early 1990s, Tarkett began to invest in the modernization of the entire production system. Today, Narni is accredited ISO 9001 and holds important environmental certifications including ISO 14001, ISO 14067, ISO 50001, OHSAS 18001, SWAN and Der Blaue Engel. Now only 4 factories - all in Europe - produce linoleum. Tarkett is a global player, exporting more than 90% of its linoleum across the world.

The Tarkett Linoleum plant at NARNI, easily recognisable by the characteristic shape of the ovens building, began its production of Linoleum at the end of the 19th century. The plant represents one of the first industries, which shaped the industrial development of Narni and the surrounding area.

Our core values

- Entrepreneurial spirit
- Operational excellence
- Deliver the ultimate flooring experience
- Positive customer attitude
- Empowerment and accountability
- Take care of the future

*1929, Italy
The ball room of Conte
Grande Ship*

Mindful of the environment, we made innovative improvements in our production processes to reduce our operational impact. As a result, Tarkett's Lino is a flooring solution that blends craftsmanship with the most advanced technology.

NATURAL

THE NATURAL CHOICE FOR PEOPLE AND THE ENVIRONMENT

Tarkett's Lino is made from the same original recipe since 1898 and yet it continues to be a modern, versatile and sustainable flooring, made of natural and renewable ingredients such as linseed oil, pine rosin, wood and cork flour and jute. Our Cradle to Cradle® approach ensures we design our products to positively contribute to the environment and people's well-being at each step of the product's life, while supporting the transition to a circular economy business model.

We put in place a number of initiatives to achieve our ambition of a zero-emission site at Narni. To ensure a more responsible use of natural resources, we've installed systems such as heat exchangers that recover and reuse heat from ovens, a biomass boiler that produces hot water to heat the ovens and a closed-loop water system. These have helped us establish a more sustainable manufacturing approach and minimise our impact on the environment.

GOOD MATERIALS

You care about choosing a flooring made from natural and high quality ingredients?

In making linoleum, we use materials that contribute positively to people's health and the environment. Closed-loop design starts here, so that good materials become future resources that can be reused or returned to nature as biodegradable ingredients

- **94% natural raw materials** - linseed oil, pine rosin, wood and cork flour, calcium carbonate and jute.
- **78% from abundant renewable resources** - including local suppliers. We support local linen producers to reduce our carbon footprint.
- **100% of ingredients have been positively assessed** according to Cradle to Cradle® framework for health and environment. As such Tarkett's Lino exceeds European REACH regulation requirements.
- **100% recyclable** - Tarkett's Lino offcuts can be fully reused as raw materials for future products or packaging through our ReStart® Programme.

RESOURCE STEWARDSHIP

You want a linoleum produced in a responsible way?

Driven by the standards of our World Class Manufacturing programme for continuous improvement of processes, we reduce our operational impact and preserve the environment.

- **Pioneering the new ISO14067** product carbon footprint certification, in addition to existing ISO9001 quality, ISO14001 environment, ISO50001 energy and OHSAS 18001 safety management certification.
- **100% recycled /recirculated industrial water (closed-loop).**
- **Rainwater collection and re-use.**
- **Green House Gases (GHG) emission reduction by 44% vs 2010** (the equivalent of a 23.541 km car journey).
- **Producing electricity, heating and cooling power** from a single device (a gas engine) to increase energy efficiency in a profitable and sustainable way (30% self-produced energy).
- **Increasing renewable energy use** through photovoltaic panels, a biomass boiler and a geothermal system (internal production) and the purchase of 100% renewable electricity.

NATURAL

PEOPLE-FRIENDLY SPACES

You care about the comfort and well-being of users?

We create flooring designed for improved indoor air quality that respects people's health and well-being. Tarkett's Lino enhances people's everyday sensorial experience, through colours and patterns, as well as through acoustic or underfoot comfort. All of which offer key advantages for schools, universities and hospitals.

- **Research** on how to best use colour and design to enhance aesthetics and ergonomics for stimulating, productive or restful environments.
- **Innovation** for a better sound and thermal insulation, and for improved underfoot comfort.
- **Good air quality:** VOC emissions (<math><100\mu\text{g}/\text{m}^3</math>) 10 times lower than the most stringent industry requirements.
- Naturally phthalate-free.
- Natural bactericidal qualities.
- **Hardwearing and resistant**, Tarkett's Lino xf²™ surface treatment simplifies cleaning and maintenance, which means 3.7% less water usage, 8.9% less electricity and 25% less detergent*.

*Compared to linoleum without xf2.

REUSE

You want to play a role in ensuring a sustainable future?

We recycle at every step of the linoleum life cycle to upcycle waste and avoid landfill. We believe products should no longer have an end of life, but an end of use to then become resources for new products. Join us in the transformation towards a circular economy.

- Tarkett's Lino is **100% recyclable**, from linoleum paste and surplus jute to powders.
- **By recycling 1,600 tons** of linoleum annually, we reduce our need for virgin raw materials.
- Our dedicated **ReStart® recycling programme** helps customers worldwide to collect and recycle installation offcuts.
- Our objective is **0% production waste by 2020** at Narni.

DESIGN

Natural, versatile and sustainable, combining tradition, craftsmanship and innovation, Tarkett's Lino offers a fresh approach to the flooring needs of today and lifestyles of tomorrow.

OPEN TO A WORLD OF COLOUR

Drawing on on-going trends analysis and colour expertise, our ranges have been developed through consultation with architects across the world at every design phase. It has enabled Tarkett to perfect the right combination of colour, balance and structure for each design concept, meeting the ambitions of any architectural project.

To anticipate how needs will change, our design teams explore emerging architectural, cultural and lifestyle trends. We share these insights in our Tarkett Observer studies that identify key orientations to enhance interior building design and user experience in healthcare, education and retail environments of the future.

Tarkett's Lino now comes in a complete solution that goes through the ages and is more contemporary than ever. From the floor to the wall, whether you need a compact, acoustic or conductive option, a variety of design patterns and colours opens up to you.

FLOORCRAFT AND CUSTOMISATION SERVICE

For projects looking for a more individually customised design or colour, Tarkett offers a dedicated customisation service, ready to translate your ideas into unique flooring concepts.

OUR DESIGN ORIENTATIONS

Human Inside

- Creating social cohesion for a stimulating environment that improves focus and concentration.
- An environment that plays with graphic and colour codes to give meaning to each area.

Interactive Space

- Flexible and modular design to change perceptions of learning and stimulate creativity.
- Tonic and bright colour range with materials and patterns that bring the present into the future.

Green value

- Creating a first contact with eco-responsibility and integrating environmental awareness.
- Greens, browns and neutrals and patterns that suggest nature. Re-usability and recyclability.

DESIGN - OUR RANGE

Veneto

A collection of strong and subtle marbled designs in soft or intense pattern variations for a timeless effect. All shades of the colour spectrum in a combination of neutral and contemporary accents.

Grands Classiques: a selection of 20 timeless colours amongst the Veneto that we guarantee in production until 2033. They are available in different levels of traffic resistance with x²™ surface treatment, and can be matched with our range of multicolour welding rods for a perfect finish. This includes Sicuro R10 anti-slip and Essenza non-permanent surface finish. Grands Classiques designs are also available in acoustic option: Silencio - 18dB.

Style Emme and Style Elle

A design range where the natural patterned beauty of linoleum meets modern style. It's a subtle mix between contemporary colours and light marbled surfaces.

- **STYLE EMME** a subtle marbling for refined and sophisticated styling.
- **STYLE ELLE** a discrete directional linear design.

Etrusco

A contemporary linoleum range featuring sixteen deep and radiant colours.

Thanks to its deep colours and plain design, Etrusco can be easily combined with any other type of pattern or used alone, for great design effects.

Trentino

A collection mixing modernity and tradition, Trentino offers a subtle semi-directional pattern, made of 3 colours : a main marbled colour, with two contrasting tones, giving the design depth.

Originale

The only linoleum Cradle to Cradle® Gold certified.

The real nature of Tarkett's lino: authenticity, product essence, sustainability. This new collection features 2 striking designs, Minerale and Vegetale, where vegetal pigments give authentic colours.

- **MINERALE:** a marbled soft design with a warm linoleum effect
- **VEGETALE:** a linear design close to the plant aspects, like leaf fibres.

LinoWall

The only linoleum approved for use on walls and featuring Bs2-d0 fire certification, LinoWall opens up a world of co-ordinated design possibilities. Three pastel colours have been specially chosen to complement the palette of our floor collection, while three neutral shades provide a direct match between wall and floor.

Besides its technical performances, one of the greatest strengths of Tarkett's Lino is its rich colour palette. All colours of the chromatic circle are present in the range, offering unlimited options for mix and match, and fitting every ambiance.

LINOLEUM xf²

Our fresh, distinctive linoleum collection blends design and colour to create contemporary looks that are right on-trend, with the accessories you need for a perfect finish. The range consists of the Veneto, Style Elle, Style Emme and Etrusco designs, to which we've added two newcomers, Trentino - a subtle pattern whose two contrasting tones give the design depth - and Originale - Cradle to Cradle™ Gold level certification. And we don't stop at floor-level. Our new wall-approved LinoWall is another first, it offers co-ordinated interiors from the ground up.

All of our linoleum flooring and wall covering come with the xf² surface-treatment technology for excellent resistance and easy maintenance, ideal in heavy traffic environments. The Veneto and the Originale ranges are also available with a factory-applied, non-permanent finish called Essenza.

LINOWALL

The only linoleum approved for use on walls and featuring Bs2-d0 fire certification, LinoWall xf² opens up a world of co-ordinated design possibilities.

Three pastel colours have been specially chosen to complement the palette of our floor collection, while three more neutral shades provide a direct match between wall and floor.

Our LinoWall also comes with xf² surface-treatment technology.

ORIGINALE

Originale reflects the desire for a pure, authentic look that's closer to nature. 100% natural in its composition and Cradle to Cradle™ Gold-certified, this is our most sustainable, nature-friendly linoleum flooring to date.

The range includes two new designs, both made using natural pigments derived from renewable organic sources like charcoal and walnut, and available with a factory-applied, non permanent finish called Essenza. Vegetale features a gently marbled linear design resembling plant fibres, enhanced by natural colours.

ROBUST

A HARD-WEARING SOLUTION OVER ITS LIFETIME

For 150 years, linoleum flooring has been appreciated for its natural beauty, comfort, durability and versatility in most interior environments. Tarkett was an early innovator in surface treatments, with the xf²™ technology added to its linoleum, to improve resistance and simplify maintenance for significant cost savings in daily cleaning and care.

xf²™ for excellent performance

xf²™ increases resistance for even longer durability and for a reduced maintenance, leading to a highly cost-effective flooring.

- Micro-reinforced polyurethane UV treatment seals and hardens the surface to make it more resistant to dirt and daily wear and tear.
- A smooth matt appearance prevents accumulation of dirt or stains.
- No need for polish, stripping and polymer waxing over the lifetime of the surface, providing soil barriers are correctly put in place, regular maintenance is operated (daily vacuuming and mopping), furniture appropriate leg coverings and daily surveillance.
- Excellent resistance to abrasion, stains and chemicals.

Superior resistance to abrasion

No other linoleum is so resistant to abrasion. We have conducted extensive internal and external laboratory testing to evaluate the resistance of xf²™ linoleum to abrasion over time. With the help of an electron microscope and 3D surface profilometer we are now able to see, magnified, the proof of the unbeatable resistance of xf²™. Tests are done on Competitors A, B and Tarkett samples, before and after dry abrasion by a rotation tumbler machine equipped with black pads. All linoleum are PU UV coated, following producers declarations. After 30 minutes, the test machine began to degrade the finish of Competitors' Samples A and B. Tarkett's test continued for one hour without visible finish degradation.

Competitor A, before abrasion

Competitor B, before abrasion

Tarkett xf²™, before abrasion

Competitor A, after abrasion

Competitor B, after abrasion

Tarkett xf²™, after abrasion

After abrasion competitor A and B are destroyed when Tarkett xf²™ is still intact.

NEW improved xf²™ WELDING RODS

The new formula developed by Tarkett - both multi-colour and traditional uni-colour - offers a very easy installation and exceptional resistance to all kinds of soiling and abrasion for an effective cleaning.

Naturally inhibiting bacterial growth

Flooring contributes to ensuring hygienic environments in public buildings - from schools to hospitals where stain resistance to medical chemicals is mandatory for flooring materials.

Independent testing by third party prove that Tarkett's Lino has naturally bactericidal properties against the most common bacteria such as E-coli and MRSA.

Reduced life cycle cost for Linoleum xf²™

The cost of the initial investment and installation normally represents just a small part of the flooring's total life cycle cost. The rest is cleaning and maintenance. As the Linoleum xf²™ doesn't require first surface treatment after installation, neither regular wax or polish maintenance during its lifetime, consumption of water and detergent decrease significantly and give Linoleum xf²™ a very favorable life cycle cost.

Compared with Linoleum flooring treated with a non-permanent acrylic finish, payback on the extra investment could come within 2 months*.

For more information, please contact your Tarkett representative.

Simplifying cleaning and maintenance

The reinforced surface of linoleum xf²™ means no polish, stripping and polymer waxing over the lifetime of the product, providing soil barriers are correctly put in place, regular maintenance is operated (daily vacuuming and mopping), furniture appropriate leg coverings and daily surveillance. As a result, it requires less frequent, less intense cleaning and maintenance and reduces the use of water, energy and chemical detergents for a better environmental footprint.

*Case study: school of 2000m² (class rooms 1300m² and corridors 700m²), comparison between untreated Linoleum and Linoleum xf²™. For 20 years life time, respecting cleaning and maintenance recommendations: entrance matting, regular cleaning and furniture appropriate leg coverings and daily surveillance.

Savings:

- 3.7% of water saved
- 25% less detergent
- 8.9% less electricity power
- 3.8% less manpower

CLEANING AND MAINTENANCE

CLEANING AND MAINTENANCE : NO POLISH, NO WAX*

Modern day-room cleaning aims to reduce wet cleaning procedures and replace them with drier cleaning techniques, like the use of centrally laundered pre-impregnated mops and the wide application of appropriate machines. This makes work more effective and easier for the cleaning staff, and minimizes environmental impact. Less cleaning chemicals and less fresh water are used.

1 > Initial site cleaning

After installation, initial site cleaning is required: vacuum, sweep or damp mop the area to remove building dust and loose dirt. A combined scrubber/dryer with brushes or red pads cleans large areas very effectively. Use detergent with a low pH (3-5).

xf²™ will not be removed by any cleaning operation.

2 > Daily and regular cleaning

Remove dust and dirt with yarn or microfiber mops or disposable mops, dry or impregnated or vacuum the floor.

Use a mop dampened with water or detergent solution to remove spots. It is essential that water does not stay on the floor or leave a film. The floor should be virtually dry after 15-20 seconds. If required spray clean the floor with a rotary machine and red pad.

3 > Periodic cleaning

or

Combined machine

Use diluted neutral detergent. Speed low 150-250 rpm or higher. Red/brown pads are usually most suitable.

Machine scrubbing + Wet vacuuming + Dry buffing

- Apply a cleaning solution (fairly strong, pH 10-11, after dilution) and allow to act for 5-10 min.
- Clean the floor using a heavy-duty single disc scrubbing machine (red pad).

Vacuum up the dirty water immediately.

- Rinse with clean water and allow the floor to dry.
- If necessary dry buff (red pad) to restore gloss. Suitable speed: 500-1000 rpm.

Sharp edged /not maintained furniture feet, sand, pebbles, permanent push and drive movements on the same area will damage every kind of flooring over the time.

*Providing soil barriers are correctly put in place, regular maintenance is operated (daily vacuuming and mopping), furniture appropriate leg coverings and daily surveillance.

TRAINING

We provide a range of on-demand training for distributors, installers and maintenance teams on Tarkett products, installation and maintenance techniques as well as individual installation of key products for demonstration and discussion with customers.

We can deliver these worldwide in our own training facilities, such as Narni or at customer sites. Our international technical advisers can also provide personalized training or support at the start of installation on building projects.

For more information about installation training or on-site assistance in your area, contact your Tarkett representative.

TECHNICAL SOLUTIONS

SD STATIC DISSIPATIVE xf²™

A safe, sustainable flooring designed for static control near computer, electronic and telecommunications equipment in medical, manufacturing, education and industry environments. Available in rolls and cuts for raised floors.

CONDUCTIVE xf²™ - THE ONLY CONDUCTIVE LINOLEUM

A safe and sustainable flooring designed for a stable and reliable conductive control. The natural solution for education, healthcare and office environments, especially for areas like server and computer rooms, laboratory and electronic equipment in operating theatres. Available in rolls and cuts for raised floors.

VENETO ESSENZA - 2.5mm

The traditional non-PU, factory applied, non-permanent finish, ready to walk on. Available in rolls and 608x608 mm pre-cuts for raised floors.

VENETO SICURO xf²™ - R10 - 2.5mm

R10 Slip-resistance rating: combines secure grip with xf²™ 's ease of cleaning. Ideal for building entrances. Product available on demand, in rolls and 608x608 mm pre-cuts for raised floors, in all 60 Veneto colours.

LINOLEUM B_{fl} xf²™ - 2.5mm

2.5 mm linoleum B_{fl} fire rating, without flame retardants. B_{fl} by its natural ingredients. Ideal for evacuation routes. Product available on demand in rolls and 608x608 mm pre-cuts for raised floors, in all designs and colours.

SILENCIO xf²™ - 18dB

2.5 mm linoleum with jute backing and recycled polyurethane foam underlayer, giving an excellent sound reduction of 18 dB. Available in rolls and cuts for raised floors.

VENETO ACOUSTIC CORK xf²™ - 15dB - 4.4 mm

2.5 mm linoleum and natural Elafono (cork underlayer) giving excellent sound reduction of 15dB. Product available on demand, in rolls and 608x608 mm pre-cuts for raised floors, in all 60 Veneto colours.

ELAFONO

2.0 mm traditional, natural, 100% natural corkment underlay installed in combination with any compact Tarkett linoleum to get added sound reduction (up to 15dB, depending on the product). Available in rolls.

Cuts 608 x 608 mm

Cuts linoleum ready for use. Designed for raised floors manufacturers, they are available in all colors, designs and technical options.

SPORT APPLICATION

Tarkett's Lino is also suitable for sport application. Have a look at our selection of the Linosport range at www.tarkett-sports.com

ACCESSORIES

Linoleum set-on skirtings (SOS)

- Available in: 6/8/10 cm high x 220 cm long

Linoleum set-in skirtings (SIS)

- Available in: 6/8/10 cm high x 240 cm long
- SIS outer corner available in: 6/8/10 cm high x 10 cm width (size of the corner 13x13 cm)

Lino SOS

Lino SIS outer angle

DISCLAIMER ON YELLOWING EFFECT

Once unpacked and as a result of the natural production process, linoleum sometimes comes with a slightly yellow surface film. The yellow tint will disappear progressively with exposure to light; 24 hour exposure to bright daylight will make it disappear completely.

The phenomenon is reversible and the yellow film might reappear in areas covered by furniture or other objects. It will of course disappear again once exposed to daylight.

DISCLAIMER: Although the utmost care is taken, the data here given could differ and be subject to modifications from a technical point of view. In its strive to improve its floor solutions, Tarkett reserves the right to modify its technical specifications, colours and materials at any moment and without prior notice. Please, check the effective availability of the products presented at the time of order. Due to the technical limits of reproduction and printing techniques used, the appearance (colour) of the product may vary from the samples, panels or other visual display materials exhibited to the customer. It is mandatory to have the products installed properly if they are to be service correctly and safely. Refer to Tarkett technical installation and maintenance directions, available at www.tarkett.com or at your Tarkett dealer.
*Elafono : 2,0mm traditional, 100% natural corkm underlay to be installed in combination with any compact Tarkett linoleum to get additional sound reduction (up to 15dB, depending on the product). Available in rolls s32 x 2m.

SUSTAINABILITY

Tarkett was the first linoleum flooring manufacturer to be Cradle to Cradle® certified - underlining our strong commitment to sustainability.

Product certifications

Originale and Veneto Essenza 100% linen
All our linoleum ranges (except Silencio 18dB Linoleum, SD Static Dissipative xf²TM and Linoleum Conductive xf²TM ranges)
Silencio 18dB

International certifications

*Information sur le niveau d'émission de substances volatiles dans l'air extérieur, présentant un risque de toxicité par inhalation, sur une échelle de classe allant de A+ (très faibles émissions) à C (fortes émissions)

Factory certifications

All our linoleum products are eligible for LEED v4 credits. For more information: <http://www.c2ccertified.org/products/registry>
