EN 14904

The EN 14904 standard is the basis of the EC marking for indoor sports surfaces. This standard is mandatory and specifies certain requirements for sports flooring in indoor facilities. The standard guarantees a safe and adapted surface for sports performance and comfort, as well as a durable and resistant flooring throughout its lifespan.

## WOOD SPORTS FLOORING IS THE ICONIC SOLUTION FOR HIGH END PERFORMANCES

As a natural material, all wood moves, shrinking in dry conditions and expanding in high relative humidity environments. It is therefore important that the floor has good stability, especially in gymnasiums where ambient temperature is variable.

Tarkett Sports wood flooring systems are produced using a multilayer construction in which each layer has different fiber directions that effectively prevents any shifting of the boards when relative humidity changes.

### EXCELLENT SPORTS PERFORMANCES

- **Superior shock absorption** levels for high sports performance up to competition.
- **Ideal vertical deformation allowing sports to be played in safer surroundings.**
- **Optimal grip control and surface friction** thanks to engineered Sports Lacquer.

### HIGHLY DURABLE

**Excellent dimensional stability thanks to our multilayer construction:**

- Higher tolerance to temperature and humidity variations compared to solid wood alternatives.
- Protects against swelling, shrinking and cracking

### Long lifespan

- Thick wear layer (3.5mm) allowing up to **4 sanding operations (40 years of use)!**

### ENVIRONMENTALLY FRIENDLY

**Low environmental impact & sustainable solution:**

- Our Wood floorings have a lower environmental impact than solid wood alternatives as only the wear layer of the construction is made of slow growing wood species.

### SPORTS LACQUER READY TO USE

- UV hardened in factory, **ready to use** (no need to apply varnish in situ)
- **Extremely hard wearing and scratch resistant**
- **Easy to clean and maintain**
- Fire performance: **Cfl-s1**

## SAME PRODUCT THAN SOLID WOOD & BETTER ENVIRONMENTAL IMPACT

**4X** LESS USE OF SLOW  
GROWING WOOD  
SPECIES

**Tarkett Sports multilayer wood solutions**

5m<sup>3</sup> of slow growing wood specie = 700m<sup>2</sup> of multilayer wood  
**1 basketball court**

**Comparable solid wood solutions**

5m<sup>3</sup> of slow growing wood specie = Only 84m<sup>2</sup> of solid wood **12% of a basketball court**

## OUR MULTILAYER CONSTRUCTION

Our full wooden range is based on  
14mm or 22mm multilayer construction,  
3 strips / 3 layers

Hardwood wear layer

Pine middle layer

Softwood veneer bottom layer
