work.

Tandus

# Modular Carpet Collection

## Tandus, part of Tarkett Group

At Tarkett, we bring together great minds in design to create the flooring that inspires great spaces. From our in-house design team to our broad range of collaborators, we work together to answer the questions, "How can our products contribute to the happiness and well-being of people? How can we help create spaces that are more conscious of the needs of individuals and the planet?" In designing products to answer these questions, we've drawn inspiration from an array of experiences as different as each of us. And yet, our designs share a common goal – to create flooring that supports every person's relationship to themselves, to other people and to the physical space around them.

Great  
spaces.  
Great  
work.

## Heritage of innovation

### A few pick of our innovations, landmarks and awards

1803

Tandus established the import of woven carpet in North America.

1967

Introduced Powerbond®: the industry's first hybrid resilient sheet floorcovering.

1969

First Manufacturer to introduce Modular Carpet to North America.

1988

RS Adhesive Innovation: First "peel and stick" carpet adhesive system.

1994

First carpet closed-loop recycling programme in the USA where old tiles are recycled into ER3® backing made of 100% recycled content.

2004

Introduced Ethos® backing: made from 100% postconsumer recycled PVB.

2005

Open production facility in Suzhou, China: Tandus is the first American carpet manufacturer to set up a production facility in Asia.

2012

Tandus acquired by Tarkett, the worldwide leader in innovative flooring solutions.

2012

Tandus is the first American carpet manufacturer to achieve **Cradle to Cradle® Silver Certification** for **ethos® Modular** tile.

2017

Powerbond celebrates 50<sup>th</sup> Anniversary with current installations lasting over 50 years.

2020

Tandus Suzhou factory invests into a new backing line to produce non PVC backing with Polyolefin, **Cradle to Cradle® Silver certified**.

### Recent Tandus Design Awards

2015

Tandus wins **two Best of NeoCon Awards: Gold in Broadloom Award** with Indent collection and **Silver Modular Award** with Avant.

2016

Tandus wins **two Best of NeoCon Awards: Gold in Broadloom Award** with Open Archive & Over Stitch collections; and the **Best of NeoCon Innovation Awards** with Open Archive, Cache Tweed & Geoknit collections.

2018

Tandus wins **two Best of NeoCon Gold Awards** with Garden Walk and Woven Fringe Collections; and **four HiP Awards**, one winner with Colour Play Collection + Techtonic™ and three honorees with Scale Study Series by Suzanne Tick, SineEffect by Jhane Barnes and Tailored Twist Collection.

2019

Tandus wins the **Best of NeoCon 2019 Gold Award** – Tatami & the **Relfocus Sustainability Innovation Award** in the Design category for ethos Modular Carpet Tile with Omnicoat Technology.

Shifting to  
a circular  
economy

# Tarkett Human-Conscious Design™

Tarkett Human-Conscious Design™ is our commitment to stand with present and future generations. To create flooring and sports surfaces that are good for people and for the planet. And to do it every day.

It's a holistic way of doing business, capable of marrying the specific expectations of each of our customers with the profound challenges of protecting our planet. Working together with our partners, we deliver safer and healthier spaces in which people can reach their full potential.

For over 140 years, we have proudly been undertaking this commitment. We launched our first recycling-focused circular economy initiative in 1957, have raised indoor air quality standards for more than a decade, and excel in researching and designing solutions for diverse environments.

We hold people and the planet at the heart of our operations – and we're dedicated to proving it, day after day.

**In the workplace segment, Tarkett is focused on Human Conscious Design which helps people flourish at work through healthier environments where teams collaborate, innovate and drive performance.**

**We deliver on this through the synergy of 3 key commitments:**

## Commitment #1: Deep human understanding

Everything we do starts by understanding our customers' needs today and tomorrow. We do this through our Tandus Design Community to ensure these needs are embedded in our design process. And through The Great Indoors platform we want to stimulate dialogue and collaboration on best practice in creating a healthy, thriving 21st century working environment.

<https://www.thegreatindoors.eu>

## Commitment #2: Conscious choices. For people and planet

When it comes to people and the planet, we don't consider one without the other. We deliver pioneering solutions that lead to healthier and more sustainable working conditions like our non PVC EcoBase Backing Cradle to Cradle® Silver certified, Ecobond backing including up to 63% recycled content and our Tarkett LVT Collections with ultra-low VOC's for optimal indoor air quality. All our Tandus Collections get the Green Label Plus Certificate proving a good indoor air quality.

## Commitment #3: With you. Every step of the way

Trust and dependability define our approach. As we commit to the flawless execution of each and every space, we partner with architects, designers, installers and contractors at all stages of planning, use and recycling. And with local services tailored to diverse clients and communities, we commit to connecting – all the way.

Committed  
to quality

### VOCs and Air Quality

We share your responsibility to protect air quality in new office environments: all our Tandus modular carpets have the Green Label Plus certification which result from our exhaustive efforts to eliminate harmful VOCs in our product design and manufacturing process. Our Tandus modular carpet with PVC backing is also 100% phthalate-free.

### Antimicrobials

Tandus modular carpet is designed to deliver maximum protection against mold and mildew without the use of hazardous antimicrobial pesticides, which can be inhaled and create adverse health effects. Using antimicrobial treatment on the carpet will only be temporary and will favor the bacteria resistance in the middle and long term, which is a major public health threat.

We guarantee a 15-year warranty product without relying on unnecessary chemicals.

### Stain Resistance

Our carpet benefits from Eco-Ensure technology: a fluorine-free and PFAS – free soil protection to avoid any stains on the carpet. In addition, we recommend to follow the maintenance instructions (see *pages 180-183*) of our carpet tiles and to clean as soon as possible any stains.

### Fire Safety

All Tandus modular carpet are tested in independent and certified laboratories to meet Class 1 rating on flammability.

### Recycled Content

We have partnered with third party company to recycle empty wine bottles into our Ecobond Backing. Up to 60% of the Ecobond secondary backing is made of recycled materials.

In some Tandus collections, we use the ECONYL® yarn which is made from 100% regenerated nylon including discarded fishing nets. Tarkett supports the Healthy Seas initiative, that aims to remove waste from the sea, in particular fishing nets and recycling them into regenerated yarn.

### LEED and WELL

As part of a sustainable, people-friendly flooring solution, our Tandus modular carpet can contribute to both promoting workplace productivity and satisfaction, and achieving sustainable building standards including LEED and WELL:

- Green Label Plus certificate & low TVOC reports for Good Indoor Air quality
- Acoustic report to show how it can contribute to noise reduction
- 100% recyclable carpet tiles
- Recycled Content of Ecobond backing in the framework of our circular economy model
- Tarkett engagement on U.N. Global Compact
- Made in Asia products to limit impact on the environment
- Use of ECONYL® Yarn for some collections, a yarn made from 100% regenerated nylon including discarded fishing nets.

The Healthy Seas initiative: from oceans waste to new carpet.

Please find more information on our sustainable initiatives on:

## 2021 workplace trends

Our Tandus carpet collections are designed around 5 main trends that we identified in new workplace designs. These trends will also be considered for the upcoming collections. Stay Tuned!

### Biophilic Design & Neuroaesthetics

More than just patterns inspired by natural elements, biophilic design & neuroaesthetics is about our biometric responses to the balance of colour, scent, sound and lighting in our environments.

### Work | Life

Work | Life refers to the increasing fluidity between our work and our leisure time and the fact that we no longer compartmentalize our professional and personal lives.

### Diversity

There are 5 generations of workers represented in today's corporate workforce and they function across the globe. One size and one space does not fit all.

### CoWorking

CoWorking is one of the fastest growing workplace disruptors. Design that inspires productivity by promoting team agility and flexibility by using lighting adjustments and furnishings.

### Residential & Hospitality Amenities

The look and feel of the workplace is changing to accommodate and improve the overall comfort and experience of users.

More than just patterns that are inspired by natural elements, biophilic design and neuroaesthetics is about our biometric responses to the balance of colour, scent, sound and lighting in our environments.

# Tandus Room Visualizer

## Save time during the design stage!

The texture of the floor plays an important part in the interior design of a building. They can enable you to achieve a stunning interior design experience. As a company we searched for a way to make the carpet design process better and more effective. As a result, we developed the Room Visualizer digital tool. With this tool you can create an excellent visual experience. Simply select the picture matching your project or upload your own picture and install the collection & colour with the installation method that you like the most.

We have produced this tool to give you the opportunity to create visual experiences that inspire people, all based on the latest Tandus carpet designs.

Discover our Room Visualizer:

<https://tarkett-professionals.esignserver3.com/asia/gallery.do>

## Designer on Demand

Four hands always work faster than two. That's why we created the Designer on Demand programme, offering free design support during and after normal business hours. Our designer will follow your lead and vision to help you configure a space and create everything from room scene renderings to floor plan designs: everything you need to pull designs together quickly and share them successfully with clients. It's a perfect co-creative relationship that saves you time!

### Possible Design Options:

- ✓ Floor plan
- ✓ 3D view
- ✓ Rendering picture
- ✓ Full pattern repeat

We send you back the floor plan design as well as renderings pictures within 2 working days to be able to present your project to your client!

At Tandus we have the possibility to customize and modify our standard products to match your design and transform your design concept into reality.

Examples of customization options are:

- Create a fully customized modular tile
- Change the colour of a yarn
- Change the format

### Custom design for a client

Custom pink colour for a client to match the logo

NB: the hexagonal shape was cut by installer.

### Customization example

Select your carpet and change easily the accent colour for only 60 sqm!

Minimum order = **60 sqm only** if for standard pattern and standard colour yarn

Samples available **within 2 weeks**

Production done in **2-4 weeks**

### Change of colour!

Our carpet designs made from our library of yarn colours can be customized with the yarn colours of your choice. Select among our +70 standard yarns available and create your unique carpet with minimum order of only **60 sqm!** For non-standard yarns, the minimum order is 1,000 sqm.

### Create custom pattern!

Add signature images to your flooring design, such as company logos, school mascots, government seals and more.

These customized emblems let you use every plane of the interior space to create a unique experience and communicate a client's valuable brand message.

### Change of format!

We can easily produce all Tandus modular carpet in 5 formats with minimum order of only 60 sqm per colour per product and without surcharge!

For more information, please visit our website:

# Tandus Design Community

## Creating together

Tarkett believes deeply in the value of collaboration, in bringing together different voices and ideas to create something worth more than the sum of its parts. With the Tandus Design Community we offer a platform where architects, designers and other professional can meet, exchange experiences and knowledge. We organize each year Tandus Design Seminars to discuss about carpet designs, colours and interior designs. The Tandus Design Community makes you part of our design history. To be part of it, please contact your Tarkett representative!

T-Tag,  
the “new  
normal”  
office

T-tag 631088001 / Tricot OCEANO 631002006 Plank 25 x 100 cm Ashlar Installation

### Keep your employees and visitors safe with T-Tag, quick and easy carpet tile replacement!

People around the world are still adapting to the ‘new normal’. Flooring has a crucial role to play here as a simple yet effective way of guiding & reminding best practices to employees through various office spaces.

- Ready to dispatch ‘drop-in’ carpet replacement tiles
- Designed with international safety colours: dark blue and yellow
- 8 tufted icons available on 50 x 50 cm tiles
- Available with a MOQ of 1 box, 4 sqm (16 tiles)
- Possibility to mix up to 4 icons into 1 box
- Tandus ECOPLY backing as standard
- Comply with CRI Green Label Plus standard
- 100% recyclable product

## Unique Advantages

With Tandus Carpet tiles you benefit from Design, Performance & Excellent Service.  
Discover our Unique Advantages.

### Design

# OR GA NIC

Inspired by the outdoor, this group of carpet collections enhances indoor office spaces through designs that draw on organic, natural landscapes. Created for easy application, and to fit together seamlessly when laid, the carpet tiles and planks appear as a single floor covering. They are also easy to maintain: the yarns combination will easily hide dirt.

Part of Element series (Mineral p. 62, Tweed p. 74), inspired by the natural patterns, Alley replicated the shapes and textures of natural stone pavements of historic villages. Transformed into a unique carpet pattern, Alley brings a total new design concept that enriches the ambiance in any space.

Culturally and stylistically advanced, Bold is designed to evoke the physical idea of movement and vitality. Bold radically restructures the way we view the floor by giving the illusion of movement against a plane. It's tactile texture varying in intensity from one tile to the next, showing a visual tip shear effect. Bold is the adaptation of Avant collection made in North America.

City Lights is inspired by the night top views from various cities: the base colour change from one city to another. A geometric grid, reminders of the clouds, erodes to show the contrasting layers of the material, lending a sophisticated, softened look. These unique visuals create depth and texture, with dark but illuminated colours. Seamless view, wide 24 tiles pattern repeat, makes City Lights the perfect carpet for all spaces. It is the adaptation of Freelance collection made in North America.

Rooted in ancient map-making techniques with structured amorphous patterning, Globe imparts a classic timelessness. Globe provides a fresh take on organics for interiors with a textural surface of cut and un-cut pile. Matte and lustrous fibers add depth while warm and cool neutrals ground this product. Globe is the adaptation of Cartography collection made in North America.

With sinuous, naturally free-flowing pattern aspects, Strata, like nature itself, has many layers of harmony and intrigue. The marbled character within rocks and rock formations is immediately recognized, so too is the likeness to the rhythmic flow of waves meeting the beachfront. This collection is the adaptation of Jasper collection made in North America.

# SOLID & TEXTURE

These collections will be bring textures & colours to your project! These ranges vary from bold shades to understated neutrals – perfect for adding zoned areas of block colour in office spaces. These ranges can also be combined with many other products to create added interest.

Inspired by haute-couture tweed luxury fashion suits, Crochet bridges the gap between organic handcrafted designs and more rigid geometric patterns. The result is a beautiful juxtaposition between light and shade that adds visual depth and sophistication to the workplace. Crochet's unique, large plank format (50 x 100 cm), together with subtle colours and soft texture, brings luxury to open spaces. Crochet is the adaptation of Marled Tweed collection from North America.

Degrees Transition introduces gradation and movement to the floor thanks to the combination of two contrasting colours into one carpet tile.

The colours have been selected for their complementarity. This inspirational collection enables to create unique layout and divide the different areas of the space by playing with the colours gradations. In addition, the high and low loops in the pattern bring comfort and soft feeling to the workplace.

A stunning addition to our famous Graduation Series. This collection can be used mixed with 1 Degree (p. 144), 2 Degrees (p. 146), 5 Degrees (p.148) or X Degrees (p. 172)!

Combining elegant geometric designs, this group of collections provides the perfect solution for one-of-a-kind projects that require a touch of luxury and an in-depth narrative. These graphic patterns will underlay the unicity of the space from boardrooms to receptions and break areas.

Assemblage’s inspiration comes from our nostalgia for handmade craftsmanship with its textural, hand-stitched look of familiar, comfortable crochet and needlepoint. The vast random pattern displays the tip-sheared textural effect. It is an artistic design with luxury feel! Assemblage is an American design, also known under the Breakout collection made in North America.

Memory II

Memory II

Inspired by the architecture of modern city rectangular facades and skyscrapers, Memory II's high and low loop tufts create an elegant textural appearance. This design generates a sense of rhythm that breaks up visual monotony, ideal for modern offices. The rectangular pattern is ideal for corridors as the lined-up in one direction indicates a path.

Tandus Paved collection has been inspired by old pavements, made of stones, such as flagstone, cobblestone, setts or bricks. The geometric shapes of the stones have been replicated on the carpet tiles. This large scale playful geometric design is ideal for expansive, open spaces.

Paved color palette is made of 8 neutral earth tones and one terracotta tone, directly inspired from the red bricks.

# LI NE AR

These carpet collections are designed with movement in mind. Their subtle play of lines enable to guide the user in a direction. Taking influence from architecture to open up a room's interior, design details include elongated lines and subtle grids. This achieves an impression of enhanced surface area – ideal for any office or open plan space.

This collection presents one gradation per tile enabling to transit from one colour to another in a seamless installation. Part of the Gradation series (2 Degrees p. 146, 5 Degrees p. 148, Degrees Transition p. 82 and X Degrees p. 172), 1 Degree shows bands of colours appearing in a subtle flow from dark to light tones. Build an iconic floor plan to make a statement with 1 Degree!

Tarkett  
TAPE™

No glue  
No downtime  
Maximum flexibility

TarkettTAPE™ to be used with Tandus carpet. TarkettTAPE changes the standard in carpet tile installation by offering maximum flexibility and adhesive qualities without using any glue on the subfloor.

#### Maximum flexibility

Tandus carpet tiles installed with TarkettTAPE can easily be removed. Because the tape sticks to the tile, and not to the floor, you can change your carpet tiles when needed or return them to us for recycling at the end of use. TarkettTAPE leaves no traces on the subfloor, the tiles all stick solidly, creating a 'floating' floor that stays in place as long as needed. TarkettTAPE sticks straight from the roll, whereby installers find it quick, clean and easy to use. It has very low VOC-emissions, no odour, and no drying time. With these specifications, TarkettTAPE contributes perfectly to your sustainability goals.

#### Fast and Easy Installation

Each tape unit measures ca. 8 x 10 cm with notched perforations between each unit. There are 324 units per roll with a coverage area of ca. 80 m²/roll installed with 50 x 50 cm tiles. Packaged from 1 to 16 rolls per box with a minimum order quantity of one roll. The tape unit is centered at the corner of the tile as to engage the inner section of the two adjacent and one opposing tile corners.

TarkettTAPE works perfectly with all our Tandus backings.

# Carpet installation

## Introduction

You can rest reassured that on leaving the factory, Tandus carpet tiles fully meet all the specifications described on the product documentation. But Tandus Carpet tiles will only come to life once installed. Therefore, it is of great importance that the instructions below are followed very carefully. Although Tandus guarantees the accuracy of their advice, it cannot be held responsible or warrant carpet tiles if these floor preparation and installation procedures are not followed. If you have any questions concerning the proper installation and use of Tandus modular carpet, please contact your sales representative.

All Tandus modular carpet should be inspected before commencing fitting. Make sure that the quality, colour, size, pattern, etc. correspond to your order prior to installation. Do not install Tandus modular carpet if any problems are noted.

## Preparing the subfloor

These instructions cannot cover all subfloor conditions. It is the responsibility of the installation contractor to make certain the subfloor is properly prepared prior to starting the installation.

### 1 Room conditions

The area in which Tandus modular carpet is to be installed (including the subfloor) should be between **18°C–32°C** (65°F–90°F) for at least **72 hours** prior to, during and after the installation. All Tandus carpet tiles and installation materials should be stored at this temperature for at least 48 hours prior to installation.

### Underfloor heating compatibility

Tandus modular carpet can be installed over surfaces that **never exceed 50°C** (122°F). In cold regions with heated floors, the heat may be turned off every weekend or every night. With underfloor heating system, do not install the tiles too tight and do not use a tool for hitting the tiles together.

### 2 Subfloor inspection

All subfloors should be leveled to assure good installation. Concrete subfloors should be flat within 1 mm per 1 meter (or 1/8" per 10 feet) and should be troweled smooth, if

necessary. Cracks, holes and depressions can be filled by using a good grade of cement, concrete or fortified patching material. Do not install the carpet over loose tile (VAT, VCT or others). The subfloor must be structurally sound and dry prior to installation.

Excessive subfloor moisture or high subfloor pH alkalinity can cause product failure, especially on concrete subfloor.

For all Tandus modular carpet, the maximum allowable amount of **Moisture Vapor Emission Rate** from the subfloor is **1.36 kg/24 hours/92.9 sqm** (or 3.0 lbs/24hours/1000 sq. feet); the acceptable **pH range is 7.0 to 9.0**; if performing In-Situ, the maximum allowable **Relative Humidity is 80%**. Please note that relative humidity above 65% will slow down primer and adhesive set or dry times: humidity of the room should **be less than 65% for 24 hours** prior to installation.

### 3 Subfloor cleaning

Clean the subfloor of all excess concrete spots, solid debris or paint spots using suitable scraping methods. Completely remove all wax, dirt, grease, paints or old adhesives (especially cutback or emulsion). Any curing chemical treatment used on subfloors must be chemically and physically compatible with our Tandus modular carpet and adhesive systems. Do not use solvents, any chemical adhesive removers, oil-based or silicone based sweeping compound to clean the subfloor. Sweep and vacuum the floor after patching and debris removal. Make sure all perimeter areas are clean. Smooth, nonporous floors should be damp mopped prior to product installation.

Linearity TAN 630942009 / SEASALT 630942008 Plank 25 x100 cm Ashlar Installation

## Installation of Tandus modular carpet

### 1 Prepare your plan – this step is very important

Determine the lay direction of the carpet based on building design and installation efficiencies. Detailed installation instructions should be conveyed to installers to meet the designer’s intention.

Measure the length and width of the room. Locate the first centerline in the installation area by marking the center point of two opposing, parallel walls. Snap a white (not blue or red) chalk line between the two center marks. Snap a second, perpendicular chalk line at the mid-point of this line (use a 3-4-5 triangle method to make sure the second line is perpendicular to the first). Check the distance from each centerline to its parallel wall and determine how many tiles will be required (depending on the size of the carpet to install). Shift the line as needed (in a parallel direction) to balance the width of the border tiles (tiles against the wall). Border tiles, where possible, should not be less than half of a tile.

### 2 Apply the adhesive

Pressure Sensitive Adhesives approved by Tandus must be used in a full spread mode. Please check with Tarkett sales representative for approved adhesives. Do not use adhesive over raised panel flooring until all of the electrical work is completed.

Apply the adhesive with a short nap paint roller. Do not allow the wet adhesive to puddle, but allow the adhesive to set and dry prior to installation tiles (approximately 40 min). Adhesive is set when it dries clear and will not transfer to the hand when touched. Tiles should be installed immediately after the adhesive has dried. Never step in the adhesive when it is wet or dry. Any adhesive you get on the yarn will be difficult to remove and will likely collect dirt.

### 3 Install the carpet tiles

Directional arrows are printed on the back of all tiles. Determine in which direction the arrow should be placed in accordance with the designer’s intentions (quarter turn, monolithic, ashlar, etc.).

Start from the intersection point in the center of the floor and install the first line of tiles along the first centerline. Install the second line of tiles along the perpendicular centerline. Keep all the tiles exactly on the chalk lines. Fit the tiles snugly next to each other by sliding them into place. Do not force the tiles together, let them loosely lay.

**Remember not to trap face yarn between or under tile edges.**

Continue to install the tiles in a stair step or pyramid pattern starting from the intersection point. Check to make sure the tiles are properly aligned at the edges during installation. When applying additional adhesive to the floor, **do not roll wet adhesive onto the yarn of tiles that are installed.** If small variations in the tile sizes start to make the installation skewed, use the straight edge to cut a sliver of the backing off the tiles without cutting into the yarn to make them straighten back up.

When reaching the walls, place a damaged tile face down, in the dried adhesive, along the wall. Take another full tile and butt it against the wall allowing it to fall on top of the cut tile with the yarn face down on top of the cut tile – this will keep you from getting adhesive on the yarn of the tile you wish to install. Use a metal straight edge to line up the size of the tile with the closest tiles. Cut through the backing along the straight edge. Remove the cut tile and save it for the next cut. When you flip the tile back over, the machine cut edge will be against the installed carpet and the hand-cut edge will be against the wall. Provide transition strips on all exposed tile edges.

## Carpet maintenance

## Introduction

With a simple, systematic and cost-effective carpet maintenance plan you can protect your investment and reap the rewards for years to come. Tandus carpet tiles are made with industry-leading materials that help to mask soil and other debris that can make carpets look old and dirty. Proper maintenance can extend the life and appearance of your carpet, thus saving money. Tarkett aims to design solutions following the Cradle to Cradle® principles, including the maintenance of our flooring. Maintenance is an integral part of flooring and the C2C principles need to be integrated into the maintenance programme.

Tandus recommends a three-steps maintenance programme with daily maintenance, periodic maintenance and deep cleaning. The main part of the maintenance programme is covered by vacuum cleaning and spot removal by the use of water. The frequency of maintenance depends on colour, the intensity of use, area and grade of representation.

## Preventive measures

The easiest way to clean carpet is to REDUCE the need to clean carpet! Prevention is always easier than fixing problems. One preventive measure to take is to install dirt barrier zones with scraping and absorbing effect to all entrances, with sufficient length and starting outside the building. Doing this is essential to keep the dirt outside which represent up to 90% of the soil load. All matting must be kept clean to make sure they do not become a source of soil: thoroughly vacuum them daily and check them weekly to ensure a clean mat at all times. Another measure is to use chair mats to prevent soil from being ground into the carpet fibers which leads to dirty, matted carpet. Another important preventive measure is selecting the right flooring, in colour, pattern and structure for all parts of your building, taking into account the traffic and use of each area.

## Detergents and cleaning aids

A wide range of detergents and cleaning aids are available for carpet cleaning and maintenance. In addition to equipment, proper cleaning solutions are important. Choosing the right cleaning solution is essential: it must be safe, non-toxic, not contain optical brighteners, it should have a pH between 4 and 9 and should not leave sticky or oily residue when dry. To test it: prepare the solution as instructed and pour into a shallow pan. Place in direct sunlight and allow to evaporate. If a sticky or oily residue is left, DO NOT use on carpets.

Note: Optical brighteners should NEVER be used on your carpeting. The use of optical brighteners may void your warranty.

For the best results always follow the instructions on the container. It is also important to first test cleaning agents on a concealed part of the floor for colourfastness.

Please contact your Tarkett sales representative to get a list of approved cleaning solutions and deodorizers.

## Tandus maintenance programme in 3 steps

### STEP 1 – Daily maintenance & stain removal

Routine/daily maintenance is a combination of vacuum cleaning and spot removal, carried out as often as needed for the different zones within your building. Effective vacuum cleaning is an essential part of a proper maintenance programme to keep soiling to a minimum. Dirt barrier zones and heavy traffic areas, such as lobbies and hallways, should be intensively vacuumed on a daily basis. Other areas, such as offices and board rooms, can be vacuumed daily based on visual inspection with a thorough overall vacuuming at least once a week. For best results Tarkett recommends heavy duty upright vacuum cleaners with a brushing action and efficient, clean filters. Additional to vacuuming, regular spot removal should take place to maintain a good appearance. Ideally **spills should be removed immediately** to prevent them from becoming permanent stains.

The majority of water based stains can be removed with a clean white (cotton) cloth and lukewarm water, after drying possibly treated afterwards with an appropriate carpet cleaning agent. Excessive moisture should be absorbed first (from the outside in) and rubbing and excessive use of water should be avoided.

Dried or aged stains can first be treated with a blunt object (e.g. a spoon) to remove dried residue by vacuuming. In all cases repeat treatments where required after drying until the stains are removed (always avoiding excessive rubbing).

Other (oil based) stains and chewing gum should be treated with a suitable carpet cleaning agent.

Note: Never apply a solvent based stains removal product directly onto the carpet surface. This can cause dissolution of carpet components. Always apply on a white cloth!

### STEP 2 – Periodic maintenance

Periodic Maintenance takes place if the daily maintenance no longer gives the desired performing and preferably should be carried out by a specialist. Generally, this periodic maintenance is carried out **1 to 2 times per year**, depending on the specific needs of your building and the different areas within. From the many cleaning methods available, Tandus recommends two options: crystal dry cleaning and dry compound cleaning. Be assured that the product used does not cause re-soiling. Always vacuum before carrying out either of these methods.

The crystal dry cleaning (Encapsulation) method is a low moisture procedure that involves spraying an encapsulation liquid solution on the carpet, gently brushing these into the carpet piles and, after a drying period of approximately one hour, vacuuming thoroughly. The crystals effectively encapsulate any soil which can then be removed by vacuum cleaning. The main benefits of this method include ongoing access to the room or area that is being treated, a reduced treatment time and colourless residue (if any). For the best results it is very important to use the proper type of crystals.

The method of dry compound cleaning is similar to crystal dry cleaning with a few differences: the 'dry' powder (it can feel moist) is spread onto the carpet by hand and mechanically brushed in. Extra attention needs to be paid to the full removal of any residue (powder and soil) as it is not colourless. With this method, you can use the area during the maintenance procedure also.

When using either method, make sure to first test them on a concealed part of the floor for the colourfastness of the carpet.

### STEP 3 – Deep cleaning

Proper routine maintenance on a daily/weekly basis, supported by periodic maintenance, keeps the aesthetics and performance of your carpet flooring at a satisfactory level for a long period. Over time your carpet may accumulate ingrained soil deeply embedded in the pile and specialist restorative maintenance will need to be carried out. This should be taken place on advice and in consultation with a specialist, in accordance to the maintenance plan. Tandus recommends the method of **hot water extraction** to deep clean your carpet. This must always be preceded by intensive vacuum cleaning and possibly also spot removal or pre-spraying to loosen stain residues.

Hot water extraction is a wet deep cleaning method using a pre-spray and a special machine. After vacuuming the carpet surface, an appropriate cleaning agent must be sprayed at the soiled carpet. After that the machine injects clean warm water deep into the carpet to take up the soil and removes the resulting dirty mix of water and used cleaning agent with a built-in vacuum system and rinse the carpet surface.

This combination is the most effective method. It allows more time for chemical action and neutralizing the cleaning chemical in the rinse. It is very important not to use excessive amount of water to avoid over-wetting the carpet. It is therefore recommended to get a specialist (carpet) cleaning company carry out this type of maintenance. Furthermore it is very important to make sure the floor is given enough time to dry before it is used again (generally 1-2 days).

## 15 years warranty

Tandus modular carpet with nylon face fiber are covered by a limited warranty issued by Tandus Asia against:

- Excessive surface wear
- Edge ravel
- Zippering
- Resiliency loss of backing
- Delamination of the secondary backing from the primary backing containing the face fiber

For a non-prorated period of fifteen (15) years from the date of manufacturer's invoice only when properly installed on correctly prepared floors using Tandus Asia approved procedures and adhesives and maintained in accordance with Tandus Asia approved maintenance and cleaning procedures.

Tandus modular carpet also carry a limited warranty against excessive static electricity during this fifteen (15) years period only when installed and maintained in accordance with Tandus Asia approved procedures. Excessive static electricity means more than 3.0 kilovolts at a relative humidity of 20% and a room temperature of 21°C.

The details of the Tandus modular carpet warranty can be provided upon request.
