A tree is like a secret package. You have some ideas of the content, but you don't know for sure what will show up. Each and single wood piece is unique.

In our manufacturing the wood is sorted and graded in different families to get specific image of the flooring. At Tarkett, we offer different wood grading:

- Premium** – uniform color with calm structure / small knots
- Nature** – medium color variations / medium knots / traditional look
- Original** – lively structure, medium color variations / medium knots
- Robust** – lively structure, large color variations / medium knots
- Rustic** – very lively structure with large color variations / large knots / vintage look
- Thermo / Cognac** – hardwood becomes darker all the way through its thickness
- Uni Nature** – very lively structure with large colour variations / medium knots / moderately visible sapwood / vintage look
- Uni Rustic** – very lively structure with large colour variations / large knots / visible sapwood / vintage look
- Uni Robust** – very lively structure with large colour variations / medium knots / very visible sapwood / vintage look

Our century long experience, commitment to excellence and care for customers guide us in eliminating natural wood imperfections - knot holes, bird pecks, worm holes, black spots and other cracks.

Note: Heat treatment and staining can significantly determine product visual appearance.
