Turning a house into a home

The right choice of flooring can transform a house into a home. So bring to life your interior design through a large selection of colours and textures across a range of materials including vinyl, wood, laminate and carpet. All our floors are easy-to-install and maintain. The surface protections ensure greater durability and lower lifecycle costs for a fresh and welcoming environment. And since we spend more than 90% of our time indoors, our floors are designed to contribute to good indoor air quality.

Main requirements

SUSTAINABILITY COMMITMENT

Sustainable building design is key to durable constructions that have minimal environmental impact, without compromising on quality of life. All building materials, including flooring, must meet specific norms to earn certification from one of the exacting ecobuilding systems around the world (LEED (US), BREEAM (UK), HQE (France), etc.).

Tarkett is a leader in environmentally responsible manufacturing and sustainable product development with our 4 key pillars:

- Use better materials: Natural, renewable and recycled resources, choose Cradle to Cradle products
- Use fewer resources: Limit water, energy consumption and waste generation
- Create people-friendly spaces: Lowest VOC emissions and phthalate-free technology
- Recycle program contributes to environmental protection

INDOOR AIR QUALITY

- No harmful components
- The lowest VOC emissions
- No toxic pollutants

HYGIENE, EASY CLEANING & LOW-COST MAINTENANCE

80% of dirt comes from outside and 90% of micro-organisms are found in visible dirt. For good hygiene, it's important to easily clean dirt and floor soiling.

Tarkett strives to minimize your maintenance costs and make daily cleaning easier.

ACOUSTIC COMFORT

Noise levels within a room can be a real issue, and need to be controlled for enjoyable experience. Flooring is one of many construction materials that can reduce the amount of sound in a given space. To reduce noise and in accordance with building constraints, Tarkett offers a range of flooring solutions:

- to limit in-room noise linked to footsteps and furniture movements
- that ranges from class A to C (sound absorption class)

DESIGN CONCEPT

Rules have changed and flooring increasingly plays a leading role in creating highly individual spaces. The floor is the solid base that your creation builds on. It sets the tone, bringing architecture and design to life. By using the floor as your signature you'll create a distinctive atmosphere.

Rug Boho 27BVB

A solution
for every
space

A bedroom is a personal refuge where relaxing colours and calming designs can be combined to create a cocooning environment. Nothing beats that feeling of stepping from a bed onto a warm and cozy floor, so choose a material that contributes to insulation and barefoot comfort. For even more peace and quiet, an acoustic floor can help reduce noise for a good night's sleep.

A living room is a personal showroom of style where the choice of decoration will be emotional.

Taking into account the type of home and the lifestyle of the inhabitants, the technical requirements may vary.

A resistant and easy-to-clean floor is best-suited for a single family home with kids and pets, whereas an acoustic and comfortable floor is more ideal for a city apartment.

The floor should also contribute to good indoor air quality since we spend more than 90% of our time indoors.

Kitchens

As a convivial place for friends and family to meet and eat, kitchens should reflect a sense of style and warmth.

For flooring, resistance and easy maintenance remain key selection criteria. In particular, floors should be impact resistant so that a dropped pot or pan won't cause damage, as well as water-resistant and easy-to-clean so that any stain simply wipes away.

Bathrooms

The first requirement in a bathroom with steamy showers, bath splashes and damp towels will be a floor that can withstand humidity.

Vinyl is the candidate of choice: water-resistant, very easy to clean and comfortable to bare feet. Classic, fun or sophisticated — it comes in many colours and styles.

Entrance & hallways

There is only one chance to make a first impression. So bring to life your personal interior design with the right choice of colour, design and textures.

Durability is also a key requirement for these areas where people come in and out, often with dirty and wet shoes that may carry sand and stones.

The right choice of material and surface protection will guarantee the longevity of the floor.

Playing, creating and discovering are all things that children love to do. To a floor that can translate to scratching, staining and denting so consider a hardwearing material that will stand up to these challenges.

Small children also spend a lot of time crawling around, so to protect their health, you will want a floor that is soft and warm.
