Memorable guest experience

WITH EVER MORE DEMANDING GUESTS, hotels and restaurants are constantly searching for the competitive advantage that will differentiate their services. For major international chains, that often means a consistent style whatever the country, while boutique hotels, small chains, restaurants or bars may rely on individuality.

Need to create a memorable guest experience? From hotel lobbies and luxury bedrooms to restaurants and bars, flooring can provide a touch of world-class design, comfort and cleanliness. Instantly convey a brand identity through a large selection of colors and designs across a range of materials including vinyl, wood, laminate and carpet. Protect and serve your guests with sustainable flooring solutions that respect the environment and contribute to their well-being.

Main requirements

DESIGN CONCEPT

CONTEXT: Flooring plays an important role during the hospitality experience. It sends many messages about a hotel to visitors, projecting a brand image based on the material it's made from, its colour, safety, cleanliness and overall appearance. Flooring also helps create pathway guidance in hotels, directing guests to strategic locations (receptions).

SOLUTION: Tarkett's wide range of materials and colours do easily communicate a brand identity and extend a brand concept:

- A large choice of materials, design, patterns and colours for coordination and customization
- Products that fit with customers' expectations about in-store experience
- Design trends to guide in the flooring choice to send clear messages about the brand positioning

SLIP RESISTANCE

CONTEXT: Slipping can cause serious injuries. People are most exposed to falls in wet areas.

SOLUTION: Tarkett has a range of solutions that reduce the risk of slipping:

- Specific flooring for use in food and non-food areas
- Safety flooring that includes many decors and colours to match with store concepts

ACCESSIBILITY

CONTEXT: An international Directive* requires that retail and public buildings must be accessible to impaired people. Visually impaired people in particular need help to avoid accidents and find their way.

SOLUTION: Flooring and accessories help to improve accessibility and guidance:

- Colour contrasts that respect a minimum 30% light reflection value (LRV) difference improve visual cues
- Tactile guide strips to indicate adapted routes to selected strategic destinations
- Tactile warning tiles alert to caution before lifts and stairs
- Logos for signage, through our Floorcraft service, to assist orientation

*ISO 21542 standard for building conception

DURABILITY & RESISTANCE

CONTEXT: Hotels and restaurants are high traffic areas that have to stand up to rough treatment. They run 7 days a week, 24 hours a day. Therefore it is important to select durable materials that will resist heavy traffic and do not require heavy maintenance.

SOLUTION: Minimize daily attacks and stresses by using Tarkett's highly resistant flooring, especially to abrasion and indentation.

SUSTAINABILITY COMMITMENT

CONTEXT: Sustainable building design is key to durable constructions that have minimal environmental impact, without compromising on quality of life. All building materials, including flooring, must meet specific norms to earn certification from one of the exacting eco-building systems around the world (LEED (US), BREEAM (UK), HQE (France), etc.).

SOLUTION: Tarkett is a leader in environmentally responsible manufacturing and sustainable product development with our 4 key pillars:

- Use better materials: natural, renewable and recycled resources, choose Cradle to Cradle products
- Use fewer resources: limit water, energy consumption and waste generation
- Create people-friendly spaces: lowest VOC emissions and phthalate-free technology
- Recycle program contributes to environmental protection

INDOOR AIR QUALITY

- No harmful components
- The lowest VOC emissions
- No toxic pollutants

ACOUSTIC COMFORT

CONTEXT: Noise levels within a room can be a real issue, and need to be controlled for a favourable brand image. Flooring is one of many construction materials that can reduce the amount of sound in a given space.

SOLUTION: To reduce noise and in accordance with building constraints, Tarkett offers a range of flooring solutions:

- to limit in-room noise linked to footsteps and furniture movements
- that ranges from class A to C (sound absorption class)

HYGIENE, EASY CLEANING & LOW-COST MAINTENANCE

CONTEXT: 80% of dirt comes from outside and 90% of micro-organisms are found in visible dirt*. For good hygiene, it's important to easily clean dirt and floor soiling. Not only that, but flooring maintenance represents 50-70% of a building's total maintenance budget. Facility managers require a solution that reduces their long-term costs.

SOLUTION: Tarkett strives to minimize your maintenance costs and assist daily cleaning:

- Reduce levels of dirt and moisture carried into the building to a minimum, with 3-step entrance mats
- Choose low-maintenance products that require no stripping, wax or polish, and assist cleaning in sensitive areas with covings

*source: WHO

A WELL-DESIGNED ENTRANCE FOR LIGHTER MAINTENANCE

A well-designed entrance mat is key to reducing cleaning costs and increasing flooring durability.

- 1 Outside the building to get rid of most of the dirt on rough cleaning mats.
- 2 At the entrance to dry shoes with absorbing mats.
- 3 Inside the reception area, textile mats to absorb any remaining moisture from footwear.

A solution for every space

A 360° COMPLETE OFFER

Tarkett provides you with one of the most complete and comprehensive range of materials, to make it easy to mix and match. As a global partner, we help you implement your brand strategy everywhere.

Luxury bedrooms

In luxury hotels, guests want a memorable experience, so rooms need to be exclusive to set your hotel apart.

We recommend using noble flooring materials such as wood and high-quality wool carpets to create an ambiance of luxury, beauty and glamour.

Whether for work or for pleasure, travelers are looking for a comfortable and relaxing experience. Bedroom floors must look clean to establish a calm and cozy atmosphere.

The floors should also be easy-to-replace with minimized downtime or impact on guests. In terms of design, consider floors that can be easily harmonized with bedheads, walls and furniture for an overall visual identity.

Corridors

Silence is golden. And floors play a key role in reducing unwanted noise in hotel corridors.

Enliven the journey from the corridor to the bedroom by using designs that generate a sense of rhythm to break up monotony.

Fitness & gym clubs

Fitness, gym clubs and wellness centers provide a healthy outlet for people to stay fit and feel good about themselves.

Choose the right floor for the right activity. For example, gym floors should absorb the impact of free weights while aerobics classroom floors should provide extra comfort and shock absorption.

GALATY GYM, Bucharest, Romania,

Bathrooms

A well-designed bathroom floor can enhance the guest experience by providing a comfortable and clean surface that is visually integrated with the overall bedroom.

In particular, floors should provide a grip to prevent guests from slipping. Installation needs to be watertight, so consider a full solution of integrated wetroom products that include matching floors, wallcoverings and accessories.

In busy conference centers and meeting rooms, it is important to create environments that promote overall concentration and well-being, while providing a pleasant out-of-the-office experience.

Floors play their part by reducing noise and contributing to improved air quality, as well as providing a nicely decorated and designed environment to learn and meet others.

Safety and cleanliness are mandatory in kitchens and laundry rooms.

With food and water spills occurring daily, these areas need floors that are slip-resistant, stain-resistant and durable. They must also withstand heavy cleaning and maintenance protocols.
