# Shopping for great experiences

We know how important it is for a retail business to stand out. From edgy boutiques to large chains, a strong brand image plays an essential role in seducing customers to enter.

Once inside, floors enhance the customer experience and provide an opportunity to reveal your company's personality across a range of textures, shapes and colours.

Whether vinyl, wood, laminate, linoleum or carpet — we can help you find the best option to make a lasting impression.

# Main requirements

## DESIGN CONCEPT

**CONTEXT:** Flooring plays an important role during the shopping experience. It sends many messages about a shop to visitors and customers, projecting a brand image based on the material it's made from, its colour, safety, cleanliness and overall appearance. Flooring also helps drive traffic inside stores, directing customers to strategic locations.

**SOLUTION:** Tarkett's wide range of materials and colours do easily communicate a brand identity and extend a brand concept.

- A large choice of materials, design, patterns and colours for coordination and customization
- Products that fit with customers' expectations about in-store experience
- Design trends to guide in the flooring choice to send clear messages about the brand positioning

## ACCESSIBILITY

**CONTEXT:** An international Directive\* requires that retail and public buildings must be accessible to impaired people. Visually impaired people in particular need help to avoid accidents and find their way.

**SOLUTION:** Flooring and accessories help to improve accessibility and guidance.

- Colour contrasts that respect a minimum 30% light reflection value (LRV) difference improve visual cues
- Tactile guide strips to indicate adapted routes to selected strategic destinations
- Tactile warning tiles alert to caution before lifts and stairs
- Logos for signage, through our Floorcraft service, to assist orientation

\*ISO 21542 standard for building conception

## EASY & QUICK RENEWAL

**CONTEXT:** In retail, several small zones need to change regularly (corners, shop-in-shops, etc.), and flooring needs to be quickly and easily renewed. There's no time to level the substrate; the new flooring must be quickly installed so that shop construction can proceed in time for opening.

**SOLUTION:** Products and accessories that make installations and removals easy and fast:

- Glue-less, loose-lay products
- Glues that are easy to apply and give high quality results
- Accessories that further speed up the process

## DURABILITY & RESISTANCE

**CONTEXT:** Shops and stores are high traffic areas that have to stand up to rough treatment. Scuffing and scratching from passing feet, indentations and abrasion from moving furniture, the aggression is daily and unforgiving.

**SOLUTION:** Minimize daily attacks and stresses by using Tarkett's highly resistant flooring, especially to abrasion and indentation:

- iQ™: Homogeneous vinyl with unique restoration properties only with dry-buffing. No strip, no polish or wax ever needed
- TopClean XP™: Reinforced PU coating for heterogeneous vinyl to improve scratch and abrasion resistance
- xf2™: Linoleum whose surface is strong and tough. High resistance to abrasion and stains.

## EASY & LOW-COST MAINTENANCE

**CONTEXT:** 80% of dirt comes from outside and 90% of micro-organisms are found in visible dirt\*. For good hygiene, it's important to easily clean dirt and floor soiling. Not only that, but flooring maintenance represents 50-70% of a building's total maintenance budget. Facility managers require a solution that reduces their long-term costs.

**SOLUTION:** Tarkett strives to minimize your maintenance costs and assist daily cleaning:

- Reduce levels of dirt and moisture carried into the building to a minimum, with 3-step entrance mats
- Choose low-maintenance products that require no stripping, wax or polish, and assist cleaning in sensitive areas with covings

\*source: WHO

## A WELL-DESIGNED ENTRANCE FOR LIGHTER MAINTENANCE

A well-designed entrance mat is key to reducing cleaning costs and increasing flooring durability.

- 1 Outside the building to get rid of most of the dirt on rough cleaning mats.
- 2 At the entrance to dry shoes with absorbing mats.
- 3 Inside the reception area, textile mats to absorb any remaining moisture from footwear.

## SLIP RESISTANCE

**CONTEXT:** Slipping can cause serious injuries. People are most exposed to falls in wet areas.

**SOLUTION:** Tarkett has a range of solutions that reduce the risk of slipping.

- Specific flooring for use in food and non-food areas
- Safety flooring that includes many decors and colours to match with store concepts

## ACOUSTIC COMFORT

**CONTEXT:** Noise levels within a room can be a real issue, and need to be controlled for enjoyable shopping and a favourable brand image. Flooring is one of many construction materials that can reduce the amount of sound in a given space.

**SOLUTION:** To reduce noise and in accordance with building constraints, Tarkett offers a range of flooring solutions:

- to limit in-room noise linked to footsteps and furniture movements
- that ranges from class A to C

## SUSTAINABILITY COMMITMENT

**CONTEXT:** Sustainable building design is key to durable constructions that have minimal environmental impact, without compromising on quality of life. All building materials, including flooring, must meet specific norms to earn certification from one of the exacting eco-building systems around the world (LEED (US), BREEAM (UK), HQE (France), etc.).

**SOLUTION:** Tarkett is a leader in environmentally responsible manufacturing and sustainable product development with our 4 key pillars:

- Use better materials: natural, renewable and recycled resources, choose Cradle to Cradle products
- Use fewer resources: limit water, energy consumption and waste generation
- Create people-friendly spaces: lowest VOC emissions and phthalate-free technology
- Recycle program contributes to environmental protection

# A solution for every space

Whether you love shopping or you're not a big fan, you visit occasionally or work there, either way - everyone appreciates a comfortable and efficient environment.

That is why Tarkett offers solutions for every space that will keep both customers and employees satisfied.

# Sales area APPAREL

Natural wood  
or crazy interferential  
LVT, choose stylish  
floors to support your  
brand concept.
