About Tarkett Academy

Tarkett Academy in Bačka Palanka is a unique training centre and showroom located in the Tarkett manufacturing complex. Covering over 1000 m², it contains a technical centre for conducting professional installation training and a showroom presenting numerous Tarkett solutions for various purposes.

What distinguishes the Tarkett Academy in Bačka Palanka from other similar training and events is that it provides high-quality training with mandatory practice.

A team of product managers and the manager of Tarkett Academy will provide you with dynamic and interactive training, combining the theoretical and practical part of the training. A manager from Tarkett Academy demonstrates the actions step by step and provides practical advice. Product managers present the products and respond to questions regarding floor and wall covers: standards and classification, maintenance, glues, recovery, welding, finishing, etc.

Tarkett Academy possesses 10 work booths intended for on-site practical training of installation, welding and other activities. You will have the opportunity to work in a space where there is a staircase, different corners, pillars, and you will practice welding, as well as installation in wet areas, and installation on walls. Larger surfaces for laying of larger rolls are available in the Academy, which makes the full-size reconstruction of different situations possible.

Professional training focused on installation and maintenance techniques is intended for installation companies, technical services, contractors, companies dealing with professional building maintenance...

Products are becoming ever more complex, and their installation ever more precise. Training centres are an important competitive advantage, as they will enable you to develop your skills and update your know-how. Be open for new possibilities and learn about new floor systems and installation techniques.

Tarkett Academy organises training for the installation of homogeneous and heterogeneous vinyl floor covers, natural linoleum, parquet and laminate, textile tiles, LVT floors, and the installation of electrostatic floor covers. Starter and advanced modules are available, depending on the interest and needs.

TRAINING COURSES UPON REQUEST AND IN-HOUSE TRAINING FOR PARTNERS

We organize training courses upon request (product knowledge, installation, maintenance, etc.) for our partners in our training centre in Bačka Palanka. We also visit sites directly and offer assistance to our partners with complex, technically demanding projects anywhere in the Tarkett SEE zone.

Upon successful completion of the training, you will be awarded a certificate, after which you become a part of Tarkett’s team of authorized flooring installers.

Tarkett Academy Certificate

Tarkett Academy certificates are issued upon completion of training, valid for one year. The certificate is issued in the first and last name of the person attending Tarkett Academy training, along with the name of their employer company. A certificate is issued to an attendee for the module they have been taking, after passing the final examination test (theory+practice). If the attendee fails the final test, they will only receive a Certificate of Training Attendance.

To revalidate Certificate please send us email to academy.tarkett@tarkett.com

TARKETT ACADEMY MASTER CERTIFICATE

- for flooring installers and companies

Under conditions of rapid market change, companies that take care of their reputation ensure their experts have mastery of up-to-date skills that guarantee success in their work.

Tarkett Master Certificates confirm possession of relevant know-how in line with the demands of today's market.

Only floor installers that have completed starter level training and hold a I degree certificate may apply for a Tarkett Academy Master Certificate. For more information contact us at Academy.Tarkett@tarkett.com
