SPECKLED RUBBER TILE AND TREAD

Safety
and style
go hand
in hand.

Good design for people + planet.

The importance of interior design stretches far beyond aesthetics. Today's interiors are expected to support the comfort, productivity and wellness of every occupant. With excellent slip-resistance, rubber tile can help reduce slip-and-fall accidents—while also cushioning underfoot and softening acoustics. We've combined these natural properties with gentle color combinations inspired by the outdoors, and manufactured them in a facility that's powered by 100% renewable electricity. It's the perfect union of safety and style—for both people and the planet.

The right stairwell management system improves both the safety and appearance of these critical spaces, helping reduce risk and improve mobility from top to bottom. With thousands of possible combinations, Tarkett's comprehensive stairwell management system provides no shortage of options. Combined with Color Splash rubber tile, our complete system of products helps balance the needs of every project.

Healthy materials and a healthy planet.

When you partner with Tarkett, your flooring choices actively support the health of people and our environment. We've aligned our company with Cradle to Cradle principles, bringing you product solutions made with healthy materials and sustainable manufacturing processes, backed by our company-wide commitment to building a circular economy.

We'll match
any color.
Without
dye lots.

You could say we're a bit obsessive about color. Our industry-leading Johnsonite® ColorMatch® technology for rubber flooring lets us create any running line or custom color—precisely, every time, without dye lots. With Color Splash rubber tile, you can customize the field color or the accents, and carry the same tailored palette across other Tarkett surfaces for a fully unified space.

Tarkett Solution SPEctrum™

Design more brilliantly.

At Tarkett, we believe in placing people in the center of every space. So we’ve developed a portfolio of products designed to work together both functionally and aesthetically, helping you create more supportive spaces that maximize return on investment. Our full palette of colors, patterns, and textures is coordinated to work together visually across product categories—creating the perfect balance for people, planet and performance.

The BrillianceSM Digital Color System puts the entire TARKETT SOLUTION SPEctrum portfolio at your fingertips—no matter where you happen to be working. Within one digital tool, you can save favorite surfaces to project boards, visualize them in a space, and order samples. By getting the right color match every time, the tool reduces sample waste and shipping, helping us all design more responsibly and reduce our carbon footprints. Speak to your Tarkett sales representative to get started, or visit brilliance.tarkett.com.

Color may vary from actual swatch. To order a sample and to learn more, please visit tarkett.com.

Conscious choices for people & planet.

For more than 140 years, Tarkett has been committed to the design of great spaces.

For us, this means making conscious choices every day for human and planet health, ensuring that present and future generations are able to thrive. We call this philosophy Tarkett Human-Conscious DesignSM. And it drives everything we do.

Cradle to Cradle principles guide our eco-design approach on the basis of five criteria: material health, product circularity, renewable energy and climate requirements, water stewardship, and social fairness.

At Tarkett North America, we're committed to using healthier materials, protecting indoor air quality, and reducing our carbon emissions by 30% by 2030. Our goal is to establish a circular economy by designing out waste and pollution, keeping materials in use, and regenerating natural systems—for the good of people and planet.

Our commitment is founded on three central pillars:

CIRCULAR ECONOMY

Closing the loop on waste, preserving our planet's natural resources and reducing the impact on climate change.

GOOD MATERIALS

Subjecting ourselves to relentless scientific scrutiny and offering radical transparency about our products.

INDOOR AIR QUALITY

A commitment to your health and well-being. Creating healthy indoor spaces with the highest standards of Indoor Air Quality.

Before designing any product, we weigh the impact of its manufacture, life, and reclamation on the health of both people and planet.
