NSF 140 Platinum

Indoor air quality for better health

TVOC 0.5 mg/m³ or less
Green Label Plus: Meets CA DPH Section 01350

Acoustical rating

NRC sound absorption IIC 68

What are the circular economy principles?

- Design out waste and pollution to **reduce greenhouse gas (GHG) emissions**
- Keep products and materials in use to **retain the embodied energy**
- Regenerate natural systems to **sequester carbon**

Taking on Climate Change

Carbon Neutral under the certified Carbonfree[®] Program.

100% renewable electricity **78%** water use reduction

Zero waste landfill
Manufactured in Georgia

Driving Circular Economy

8-11% post-consumer recycle content

8%-11% Recycled content

Recyclable through our ReStart[®] take-back and recycling program

Taking responsibility for carbon emissions at every stage: Powerbond[®] Cushion

We focus on the areas where we can make the biggest difference for our planet:

- Reducing our impact on climate change
- Conserving important resources
- Using safer materials

How can we achieve a good quality of life within the limits of our planet? Creating a circular economy business model. Recycling helps us to conserve natural resources. We aim for 75% of our raw materials to be recycled, rapidly renewable, or abundantly available in nature.

Tarkett Corporate Stewardship

For more than 140 years, Tarkett has been committed to the design of great spaces. For us, this means making conscious choices every day for human and planet health, ensuring that present and future generations are able to thrive. We call this philosophy Tarkett Human-Conscious DesignSM. And it drives everything we do.

Changing the game with circular economy.

Tarkett Human-Conscious Design through Healthy Material Choices

- **98%** of raw materials assessed, over 5000 raw materials
- **67%** renewable, abundant or recycled materials
