

DESSO

Tarkett Fusion Concept

20/21

Interactive Document

Creativity is at the heart of good design – along with the desire to make a mark. Our aim is to help the architecture and design community create interiors that are both captivating and fit for purpose. Through a dynamic approach that combines our luxury vinyl tiles and DESSO carpet tiles, any requirement can be met through endless possibilities.

Profound Possibilities

Flores AA99 9114 / Heritage - Oak Old Grey 1 Strip

Tarkett deliver 1.3 million metres of flooring every day.

That's a lot yes. A bewildering amount of flooring, across the world, of pretty much every type imaginable.

To do this successfully we have to ensure that our flooring is as commercially viable and sustainable as possible.

Our products strike the delicate balance between meeting creative aspirations, technical requirements and sustainability criteria without compromise.

Through our focus on Cradle to Cradle® design, we make our products in a way that helps to preserve natural resources and mitigate climate change.

Compliant with green building standards

Harvest AA78 2915 / iD Square - English Oak Beige

All products in the Fusion collection qualify for credits under the internationally accredited Green Building Schemes LEED version 4, BREEAM and WELL. With particularly high contributions in the categories of Indoor Air Quality, Acoustics, Material Transparency and Material Health, you get the comfort and trust of knowing that with our products you can positively contribute to a healthier and more human-centric built environment.

At Tarkett, we demand to know every detail about the materials we use, so we can be totally honest with you. It's why we're obsessed with the health and sustainability standards of Cradle to Cradle® - a methodology that guides our good material choices. And even then, we're always on the hunt for something even better.

Complete transparency from us, peace of mind for you.

Easy, quick and clean installation of tiles

Jeans Original AA27 8904 / iD Square - English Oak Grey

We've designed the iD Square and DESSO carpet tile products in the Fusion collection to work together seamlessly, with no transition strips.

For easy, quick and clean installation you can use TarkettTAPE™ in areas up to 100m². Tiles installed with TarkettTAPE can easily be removed. Because the tape sticks to the tile, and not to the floor, you can change tiles when needed.

The tape leaves no traces on the subfloor, the tiles all stick solidly, creating a 'floating' floor that stays in place as long as needed. TarkettTAPE sticks straight from the roll, without using any glue on the subfloor. It has very low VOC-emissions, no odour, and no drying time.

Less noise, more productive workforces

Traverse B968 4437 / iD Square - English Oak Grege

Quieter environments help to prevent health problems, reduce stress levels and improve concentration. The iD Square and DESSO carpet tile products in our Fusion collection provide the perfect solution for improved sound insulation and absorption. With the added benefit of acoustic performance, our iD Square encourages serenity and efficiency at work, reducing impact sound insulation by up to 15 dB.
