HOME FLOORING DESIGN GUIDE

Create a  
great  
indoors.  
Together.

# Doing good. Together

At Tarkett, we help you to create healthier spaces by making sustainable flooring that is good for people and good for the environment.

We listen to our customers' needs and collaborate with all of our stakeholders to design products that deliver optimal performance, promote healthy living and respect natural resources.

## We are Designing for Life.

People spend 90% of their time indoors, working, learning and relaxing. We help you to create healthier, safer, more people-friendly indoor spaces by designing high quality, sustainable products made with healthy materials. Through our focus on Cradle to Cradle® design, we make our products in a way that helps to preserve natural resources and mitigate climate change.

## We are Closing the Loop.

With our ReStart® take back programme, we help you to manage your flooring waste effectively while contributing to safeguarding the world's natural resources and protecting the environment. We recycle your flooring offcuts and waste from our production, transforming it into new, high quality products. In this way, we can make the transition to a circular economy.

## We're Driving Collaboration.

The world's great sustainability challenges require cooperation and partnership across industries and supply chains. We encourage our customers and all of our stakeholders to join us in working towards positive change. Importantly, we communicate our sustainability progress transparently, and provide you with clear information about our products and ambitions.

## Doing Good – Together every day

We will improve people's lives, preserve natural resources and respect our environment.

Tarkett's product development & implementation is in line with the Cradle to Cradle® philosophy

\*except recycled content

We have eliminated phthalates from our flooring collections

\*TVOC AT 28 DAYS

All products are designed to have low VOC emissions to improve indoor air quality

The Tarkett ReStart® programme enables re-use of waste materials wherever possible

Create a  
great  
indoors.  
Together.

# At Tarkett, we are committed to improving experiences for people at home

What inspires us is the idea of enhancing the indoor environment for people through innovation and design.

We create remarkable flooring products with the most sustainable credentials to provide stunning interiors.

At Tarkett, we understand how important it is to you that your housing project runs on time and to budget.

It's this understanding of your needs and our extensive experience of working with all parties involved in housing projects, from building specifiers to building owners, supply chain partners to flooring installers, which enables us to ensure the success of your project whether it is a new build, extension or refurbishment.

A true provider of integrated solutions.

Available in hundreds of colours and designs, our broad product range gives us all the necessary options to operate as a true provider of integrated solutions.

Supporting you with high quality products across multiple price points.

# The importance of design

Good interior design can not only lift the look and feel of a space, it can also directly affect the people living and working in that environment.

We all want to feel comfortable and content in our home or workspace, so attractive surfaces and furnishings should definitely help us achieve that right?

Yes of course, however sometimes we can be guilty of selfishly cluttering, of poor planning.. which is to be expected since we are not all accomplished interior designers after all.

Ill-considered design doesn't just look bad but has also been demonstrated to be detrimental to people's health & well-being.

Tarkett's Design Manager Becky Pole is passionate about interior design for residential settings.

*'Light and surface contrast play an important role in terms of making a room look a certain way but and also can influence our mood when we're in that space'*

*'Dark, rich colour schemes can look very welcoming and luxurious, light and airy themes may feel more energising, though we must be careful not to go to extremes, and lighting plays a crucial part in that'*

*'Tarkett have conducted extensive research on how colour and light can impact on well-being. The output from that work has been extremely useful to us and our customers.'*

*'I love working with colours across different surfaces to create moods, combining flooring with soft furnishings & fabrics to project warmth or a fresh, cool look depending on what we know is required'*

*'Effective design is about fully understanding the objectives from the start of the project, unfortunately the detail of the interior scheme is sometimes not fully considered until much further down the line.'*

At Tarkett we are committed to improving experiences for people indoors, design is a key component of that. From the design of the collections in line with the latest trends & desirable interior looks, to giving advice on combining our products with others to help create the desired effect.

The images here show the potential of Tarkett iD Mixonomi LVT tiles, which can be used to great effect to provide a flooring centrepiece in a room. Ideal as a visually stimulating focus in any communal area. Mixonomi may be integrated into a design scheme in combination with many other Tarkett products.

To enquire about our interior design service, talk to your Tarkett contact or email us : [marketing@tarkett.com](mailto:marketing@tarkett.com)

# Designing for function

Design needs to be smart. Not just in terms of aesthetics but but also performance, functionality and suitability for the desired environment.

It must also consider practical issues. The nature of the existing interior, the time available for a decoration project.

It's not just about colour and texture.

## TIME

Tarkett have designed products which save time, and therefore of course money on a project.

Loose lay flooring is a great example.

Using adhesive free solutions saves on installation cost and allows life to go on in the room much more quickly, without waiting for precious hours of adhesive curing time.

## AIR

Indoor air quality is a concern for many people and rightly so. As we spend increasing amounts of our time indoors, it is important to make sure the interiors we create are as healthy as they can be.

Flooring products represent a significant proportion of the indoor space and so need to be able to positively contribute to indoor air quality.

Tarkett products have extremely low VOC emissions, are phthalate free and our DESSO Airmaster® carpet range is designed to 'clean the air' of potentially harmful fine dust particles.

## SOUND

Much study has been conducted on how sound propagates and is reflected on various surfaces. Flooring can help reduce impact sound and reflection.

Carpet is of course a very practical option in terms of acoustic performance, though for high traffic areas it is not always the best choice. Tarkett have a range of hard wearing acoustic flooring products which also offer easy maintenance and slip resistant properties.

## PERCEPTION

We have published a body of work on how interiors can affect peoples' ability to function and move around interior spaces.

One aspect of this involves employing innovative virtual reality technology to enable designers to make informed choices about schemes and how people with dementia perceive the colours and textures within them.

We also conducted a study of how colour may be used to optimise the wellbeing and learning capacity of students.

## SAFETY

The potential for slips, trips and falls affect the health and wellbeing of us all.

Slip resistant flooring is essential in certain areas and, using the latest manufacturing technology, Tarkett have introduced a design driven collection of practical and beautiful floors with inherent & sustainable slip resistance.

**Designing for function is a concept we are passionate about.**

For further information ask us about:

- Time saving loose lay products
- Desso AirMaster® Home
- Tarkett Learning Colour Study
- iD ULTIMATE acoustic LVT
- Home adaptation products
- Wet Room solutions
- VR-EP Virtual Reality design tool

# Home adaptations

We all know that our physical and mental health can deteriorate over time and that at some point in our lives we may need to make some changes to our homes to ensure that our quality of life remains at its highest possible level.

Research suggests that being in a familiar environment can aid recovery and enhance wellbeing as it reduces the stress and confusion of having to get used to new and unfamiliar surroundings whilst also having to deal with changes to physical or mental health.

Home adaptations, such as bathroom to wetroom conversions are therefore becoming increasingly important.

Tarkett provides the complete solution for home adaptations, with a specially created range of high-performing vinyl safety flooring and walling products in numerous designs and styles.

## SAFETY AND PERFORMANCE

Slips and trips are one of the biggest sources of accidents in the home. So it makes sense that a home adaptation should focus on improving safety in all relevant areas of the home, especially bathrooms, where the floor often gets wet. The floor must be safe for both barefoot and shod traffic.

## STYLE AND DESIGN

When designing for these areas, the key consideration is contrast and how colour transitions are perceived by users of the space, often vulnerable people affected by partial sight or dementia.

The Tarkett VR-EP system is a virtual reality tool designed to do exactly that, allowing visualisation of the room in a VR environment then emulating the perception of that space from the point of view of someone with dementia.

**The unique Tarkett VR-EP system emulates the way those affected by dementia or impaired vision perceive interior spaces.**

*Ask your Tarkett contact for further information.*

## CLEANING AND MAINTENANCE

It is important that modified areas of the home are safe for all users and easy cleaning and maintenance plays a vital role in that. Our specialist 2mm vinyl safety floors, Granit & Primo Safe. T, achieve a sustainable R10 rating which provides exceptional slip resistance in both wet and dry areas whilst still being very easy to clean.

With our Wetroom concept you have all the benefits of a complete system, with floors and wallcoverings as well as all the accessories you could need: unique multi coloured weld rods, drains, threshold strips, sleeves, etc.

\*except recycled content

\*TVOC AT 28 DAYS

# Carpet

Carpet has been the most popular flooring category type in the UK for many years.

Today, although it is challenged by smooth flooring products like design tiles, wood and laminate, carpet remains a popular and stylish option.

The Desso collections from Tarkett provide all of the expected benefits of broadloom carpet in terms of sound insulation, comfort and warmth underfoot coupled with a wide offer in terms of rich colour and texture.

The ranges include polyamide and wool products available in rolls but also as luxurious area rugs.

All of our carpet products are manufactured in line with the Cradle to Cradle® philosophy.

Well known throughout Europe for many years, our Desso branded carpet ranges are renowned for superb quality and breadth of choice

**DESSO**

# Flooring solutions for specific areas

It's important to understand the specific needs of each area of a house or shared living space. Each will have different requirements in terms of usage, and the flooring that is installed needs to deliver a high functional standard as well as offer the style and look that is desired.

To make this process as easy as possible, we have created specific flooring plans to

show which product is suitable for each area. These plans are provided throughout this Design Guide for all our flooring ranges to ensure that you can choose the right product for the right area every time.

Our Areas Sales Managers can assist and advise you in making the right choice to suit your design, performance and budget requirements.

- provides slip resistance to reduce slips, trips and falls
- has excellent sound insulation qualities to reduce noise

### Living areas and studies require flooring that:

- provides comfort and warmth underfoot
- has excellent sound and heat insulation
- enables easy cleaning and maintenance

### Communal areas and stairways require flooring that:

- provides slip resistance to reduce slips, trips and falls
- is tough and extra resilient
- has excellent sound insulation qualities to reduce noise

REAL WOOD FLOORING

# Engineered Wood

A natural choice

ULTRALOC

2-LOCK

SURFACE PROTECTION

Tarkett wood is available with FSC approval.

With over 120 years of experience, Tarkett has developed in-depth expertise in the properties and qualities of wood, ensuring that our products offer the best possible construction techniques and surface treatments.

With a range comprised of 200 different varieties, you can choose from classic and contemporary wood species with different colours, shapes, finishes and characters.

#### PROTECO

Tarkett has developed Proteco – one of the strongest surface protection treatments on the market today. With a choice of semi-gloss or matt lacquers, plus a hard wax oil, we have the right solution for every housing project.

#### MAIN PRODUCT BENEFITS

- Extensive choice of species, formats and designs
- Multilayer construction reduces natural movement
- Proteco surface treatment – the most hard-wearing on the market
- Easy installation with our two locking systems

Tarkett's range of high quality engineered wood floors is ideal for both domestic and shared living accommodation. Providing an extensive choice of design, performance and cost options. Hard wearing and durable, these floorcoverings stand up to the test of time.

Ideal for

- bedrooms
- living areas and studies
- kitchens
- corridors

#### MULTILAYER CONSTRUCTION

To minimise natural movements, our wooden floors are built up in three layers. By alternating the direction of the fibres in these layers, movements in the wood are minimised, creating a balanced, stable floor. Our strong glueless locking systems lock the boards tightly against one another without any gaps.

With a choice of collections to suit every taste and budget, Tarkett has the solution for every housing project.

Ask your Area Sales Manager for further information.

iD Revolution is a major innovation in modular resilient flooring.

Using innovative recycled and abundant raw materials in its conception, iD Revolution is the result of Tarkett's proven expertise in materials and experience of developing sustainable, innovative solutions.

iD Revolution is the first Cradle to Cradle Gold certified modular resilient flooring made with recycled materials.

It is highly respectful of the environment and comprised of more than 80% recycled and recyclable raw materials, including minerals, and both bio-based and recycled plastics.

iD Revolution offers the optimum combination of performance, design, durability and sustainability.

#### MAIN PRODUCT BENEFITS

- Non-PVC modular resilient flooring
- Utilises bio-plastics and PVB recycled from car windscreens
- 0.55mm wear layer ideal for heavy commercial applications
- Phthalate free construction
- 23% recycled content
- Undetectable VOC levels for the best indoor air quality
- It is available in three formats and shapes
- Tarkett's industry leading 'responsible PVC', low VOC's and Phthalate free for best indoor air quality
- Fully recyclable via the Tarkett Restart programme

Tarkett's range of high quality heterogeneous vinyl floorcoverings are ideal for both domestic and shared living accommodation. Providing an extensive choice of design, performance and cost options. Hard wearing and durable, these floorcoverings stand up to the test of time.

Ideal for

- bedrooms
- living areas and studies
- kitchens
- bathrooms
- corridors

Cottage stone biege

Cottage stone black

Tarkett's residential cushioned flooring is easy to install and highly durable. With resilience to general wear and tear making it practical in high traffic areas such as hallways and living areas. Being easy to clean makes Tarkett's cushioned sheet flooring the practical solution for any kitchen.

The innovative polyester backing of Texstar makes it ideal for refurbishment projects where there may be issues with uneven subfloors. Moderate surface irregularities are cleverly absorbed and disappear under the flooring design.

The backing also allows for subfloor moisture to evaporate into the atmosphere from around the edges of the sheet, providing loose lay installation procedures are followed and the edges are not sealed.

Ideal for

- bedrooms
- living areas and studies
- kitchens
- bathrooms
- corridors

With a choice of collections to suit every taste and budget, Tarkett has the solution for every housing project.

Ask your Area Sales Manager for further information.

### MAIN PRODUCT BENEFITS

- Polyester backing – suitable for installation on uneven subfloors
- 19dB Acoustic performance
- Allows subfloor moisture to evaporate
- R10 slip resistance – for added safety in kitchens and bathrooms
- Can be loose laid – up to 50m2
- Extreme Protection – increased wear resistance
- Phthalate free & low VOC's
- 2.8mm gauge with 0.35mm wear layer
- Available in 2, 3, and 4m widths
- 15 year domestic wear warranty

SAFETY FLOORING

# Safetred Wood

VINYL FLOORCOVERING WITH ENHANCED SLIP RESISTANCE

Safety  
clearly  
ingrained

Ultimate  
flexibility

Traditionally applied surface coatings may be compromised by protrudence of the slip resistant particles. This can leave the floor more susceptible to contamination from dirt and staining agents.

**Airforce Applied Technology** uses high pressure airstreams to ensure more comprehensive coverage of the floor surface – Thorough Surface Protection.

Traditional oak light

Traditional oak natural

Traditional oak dark

Trend oak natural

Safetred Wood along with the Ion and Natural collections epitomises the 'design for function' ethos.

Bringing creative & realistic visuals to commercial safety flooring.

Design does not need to be comprised to fulfill the specification.

Available in standard glue down format or to order as loose lay or acoustic.

#### LOOSE LAY

- Can be loose laid up to 100m<sup>2</sup>
- Suitable for laying over uneven subfloors
- Can be laid over subfloors up to 90% RH
- Available in all colours and designs

#### ACOUSTIC

- Impact sound reduction to 19dB
- Unique indentation properties – 0.15mm
- Available in all colours and designs

Tarkett's safety flooring is easy to install and highly durable. With resilience to general wear and tear making it practical in high traffic areas. Being easy to clean makes Tarkett's vinyl floorcovering the practical solution for any kitchen, bathroom, corridors, communal areas and stairway applications.

Ideal for

- kitchens
- bathrooms
- corridors
- communal areas and stairs

#### MAIN PRODUCT BENEFITS

### IDEAL FOR REFURBISHMENT PROJECTS

Based on Tarkett's highly popular Safetred Spectrum and Safetred Universal ranges, these 50 x 50cm tiles are quick and simple to install and can substantially reduce the amount of material needed for a typical housing installation.

Safetred Tiles have all the slip resistant, durability and environmental benefits of the Tarkett Safetred ranges, with the additional cost benefit savings of both time and money.

### MAIN PRODUCT BENEFITS

- Quick and easy to install - reduces tenant disruption
- Easy tile replacement enabling cost effective repairs and longer floor life
- Modular design capability - enhances tenant satisfaction
- Convenient pack size – ideal for smaller areas
- Low pack weight making it easy to carry to upper floors
- No welding required meaning quicker installation times and lower installation costs

Tarkett's safety flooring is easy to install and highly durable. With resilience to general wear and tear making it practical in high traffic areas. Being easy to clean makes Tarkett's vinyl floorcovering the practical solution for any kitchen, bathroom, corridors, communal areas and stairs.

Ideal for

- kitchens
- bathrooms

# Technical specifications

The following information is subject to modifications for the benefit of further improvement. (01/2019).

For more detailed technical information, please contact Tarkett. Follow Tarkett's installation and maintenance instructions carefully, these instructions are available on request. The values shown in the technical data are "typical values" and there may be some statistical variation away from the value shown. E&OE

Create a  
great  
indoors.  
Together.

## Working in partnership with you

Tarkett has a dedicated team of Area Sales Managers and Specification Consultants with years of experience in the flooring industry ready to assist in any aspect of your housing project.

As well as your own Area Sales Manager, our highly knowledgeable team of Customer Service Advisors are on hand to answer any questions you may have or to send you product samples and technical information.

Backed by a dedicated Technical Support Team who can provide you with technical advice on all the Tarkett products as well as installation and maintenance guidelines.

The Tarkett team are here to support you at every stage of your project.

Sales Order Desk
