MINERAL CORE BOARD

Beauty in detail

We believe the charm of natural materials lies in their **intricate detail**. That every wood knot and stone fissure tells the story of the forest in which an oak tree grew, or of the shifting earth over millennia. The designs in STELLAR's Mineral Core Board flooring collections capture **the authentic charm of wood and stone**, not just in look, but in tactile feel. Trace your fingers across softly brushed delicate wood grains, and intricate marble veining while experiencing the **ease, warmth, and durability** of modern materials.

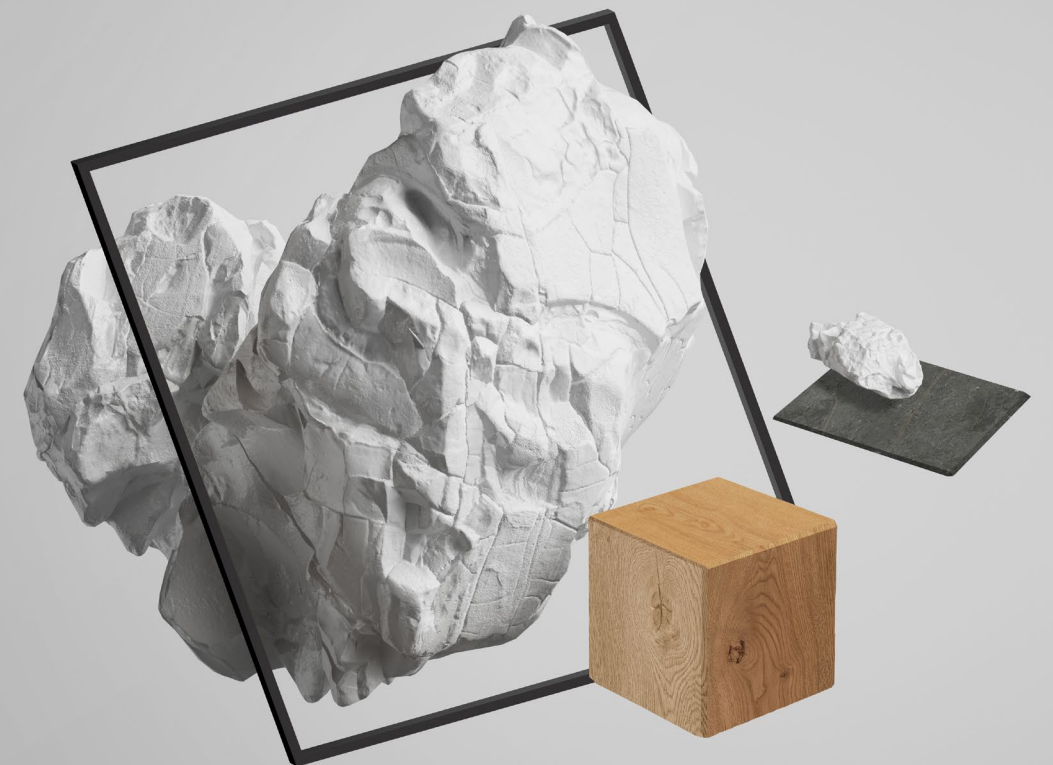

3DT  UCH
TECHNOLOGY

Revolutionary surface

3DTouch recreates the **rich surface texture** and detail of hewn stone and wood grain. The décor is digitally printed directly onto the mineral core and enhanced with a 3D texture that perfectly matches the design. Experience **unparalleled natural beauty** and a **real tactile feel** right under your feet.

Our Mineral Core Board flooring provides outstanding durability thanks to its **more than 70% mineral-based composition** – a virgin, naturally abundant raw material with low environmental impact.

Innovation meets artistry in our wood and stone collections

Stellar**Craft**,
crafted like real wood,
but more resilient

Modelled on sustainably sourced oak,
our Stellar**Craft** collection uses **traditional
woodworking finishes** to build a curated
collection of characterful wooden planks.

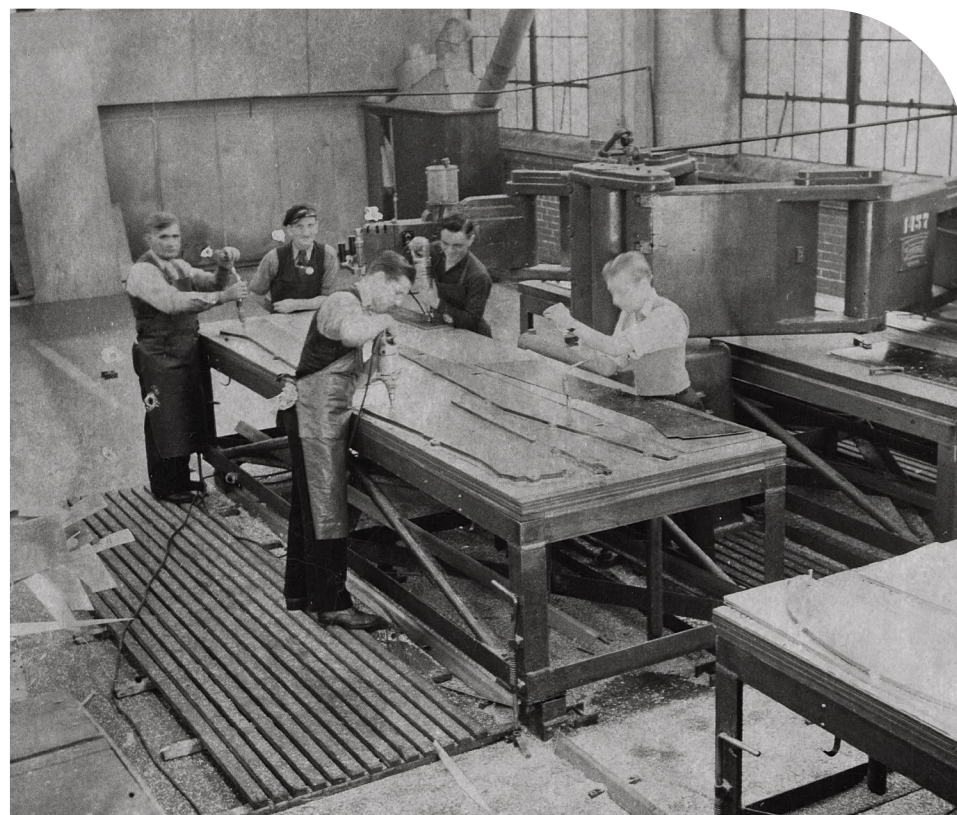

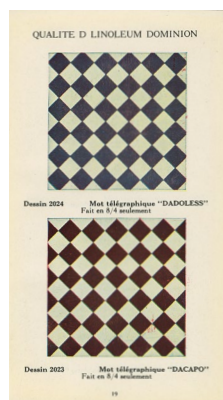

Stellar**Elements**,
like real stone,
but with click installation

From creamy marbles to cross-cut
travertines, Stellar**Elements** features stone
carefully **selected from the finest quarries**
across Italy and Spain. All in a fully recyclable
product.

Masterfully made in Europe since 1886

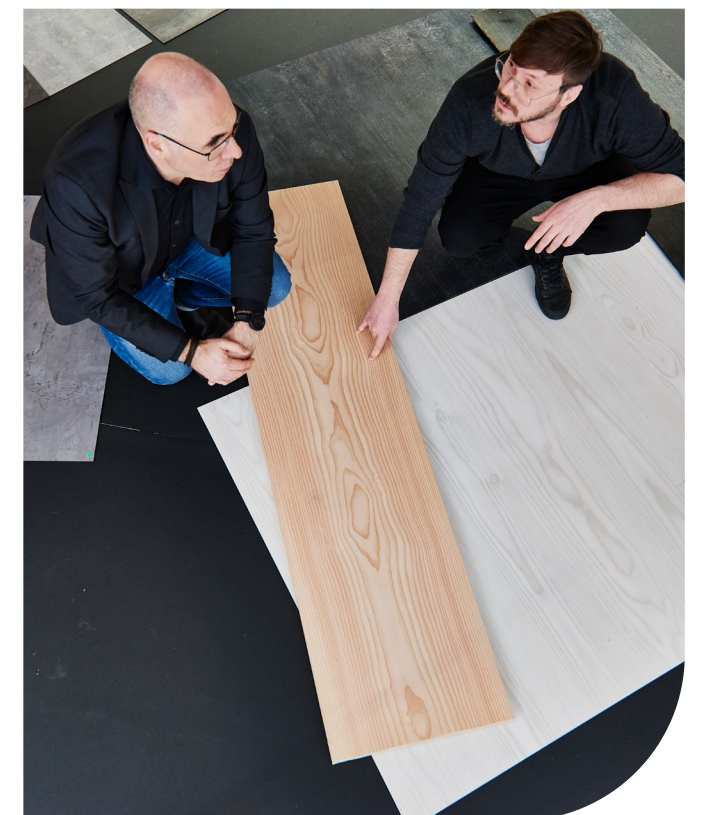

Tarkett's story began in a small Swedish carpentry shop over 130 years ago. From the very beginning, we have embraced a deep respect for nature and a commitment to craftsmanship, values that continue to guide us to this day. As leaders in the flooring industry, we believe that **great floors should serve both people and the planet.** Our savoir-faire and innovative spirit have created Mineral Core Board floors that combine **sustainable European design with exceptional durability** going beyond the constraints of nature.

“

*Sustainability isn't a trend,
it's part of who we've been
since 1886.*

All our STELLAR floors are proudly designed and produced in Europe. Whether that be through the careful selection of raw materials, manufacturing, or transport.

Designed by nature. Handcrafted by experts. More resilient than the real thing

Every piece of stone and wood within Stellar**Craft** and Stellar**Elements** has been meticulously hand-selected by our designers in workshops across Europe.

Our stone designs were developed in collaboration with **leading ceramic design studios**, while our woods were carefully treated using **artisanal techniques**.

This captures the complex colour variation and precise detail of handcrafted planks.

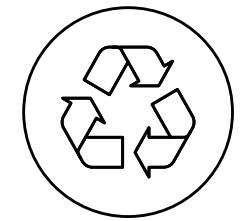

No retouches, no artificial alterations

After expert treatment, **no imperfections are added nor removed**. We print the decor directly onto the mineral core and apply the texture in 3D. This ensures an unmatched level of realism – **each mark and grain is true to nature**.

Made with sustainability in mind

Great flooring goes beyond design. To build the best floors for people and the planet, our raw materials are all locally sourced, processed, manufactured, and transported within Europe.

Easy to recycle

Recycle installation off-cuts and disassembled floors, through ReStart®, Tarkett's take-back and recycling programme. Contact your local retailer or installer for more information.

A healthier choice for indoor air quality

Good indoor air quality is essential for well-being. STELLAR floors are designed to put safety first, with VOC emissions that are 10 times lower than the most stringent global standards.

28% recycled content

Mineral Core Board floors proudly contain up to 28% recycled material content.

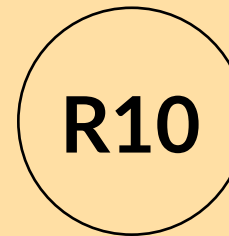

Watertight, worry-free

Both StellarCraft and StellarElements are waterproof which makes them perfect for high-moisture areas such as kitchens, bathrooms, and wetrooms. With watertight GenClick® installation, our Mineral Core Board floors can withstand fluctuations in temperature and humidity. They easily handle spills in the kitchen or damp bathrooms problem-free.

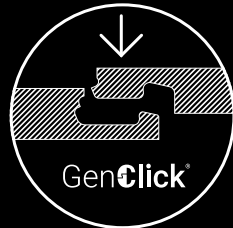

Step with confidence

Designed with superior slip resistance (R10). A carefully engineered surface texture offers reliable traction even when wet, helping to prevent slips and trips.

Mineral strength, but with installation that just 'clicks'

Retain the resilience and appearance of real stone without the installation time, hassle, or expense. Stellar**Craft** and Stellar**Elements** float above your existing subfloor and 'click' together by hand.

Perfect for new builds or renovations, they're easy to install and can help professionals save time on-site. Our GenClick® method needs no grouting or specialised tools. It is 35% quicker to put in place than click systems typically available on the market.

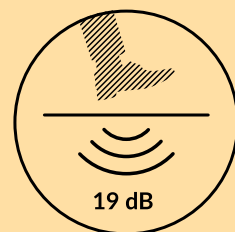

Built for life and easy to clean

Beautiful detail that is truly functional. Our protective TEKTANIUM coating is **3 × more resistant** to scuffs, scratches, and indentation than vinyl floors. This makes them perfect for homes with children and pets. An expertly textured surface means super easy cleaning, with no need to worry about spills and stains.

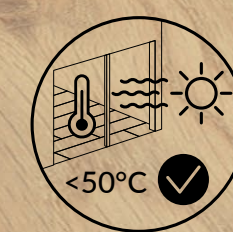

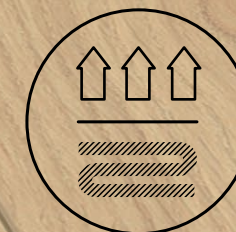

Did you hear that? Quieter living comfort

You deserve to come home to peace and quiet. Our acoustic backing minimises everyday impact noise by 19 dB, limiting transmission between floors. Ideal for busy lifestyles and essential for privacy, Stellar**Craft** and Stellar**Elements** floors insulate your home from sound generated elsewhere.

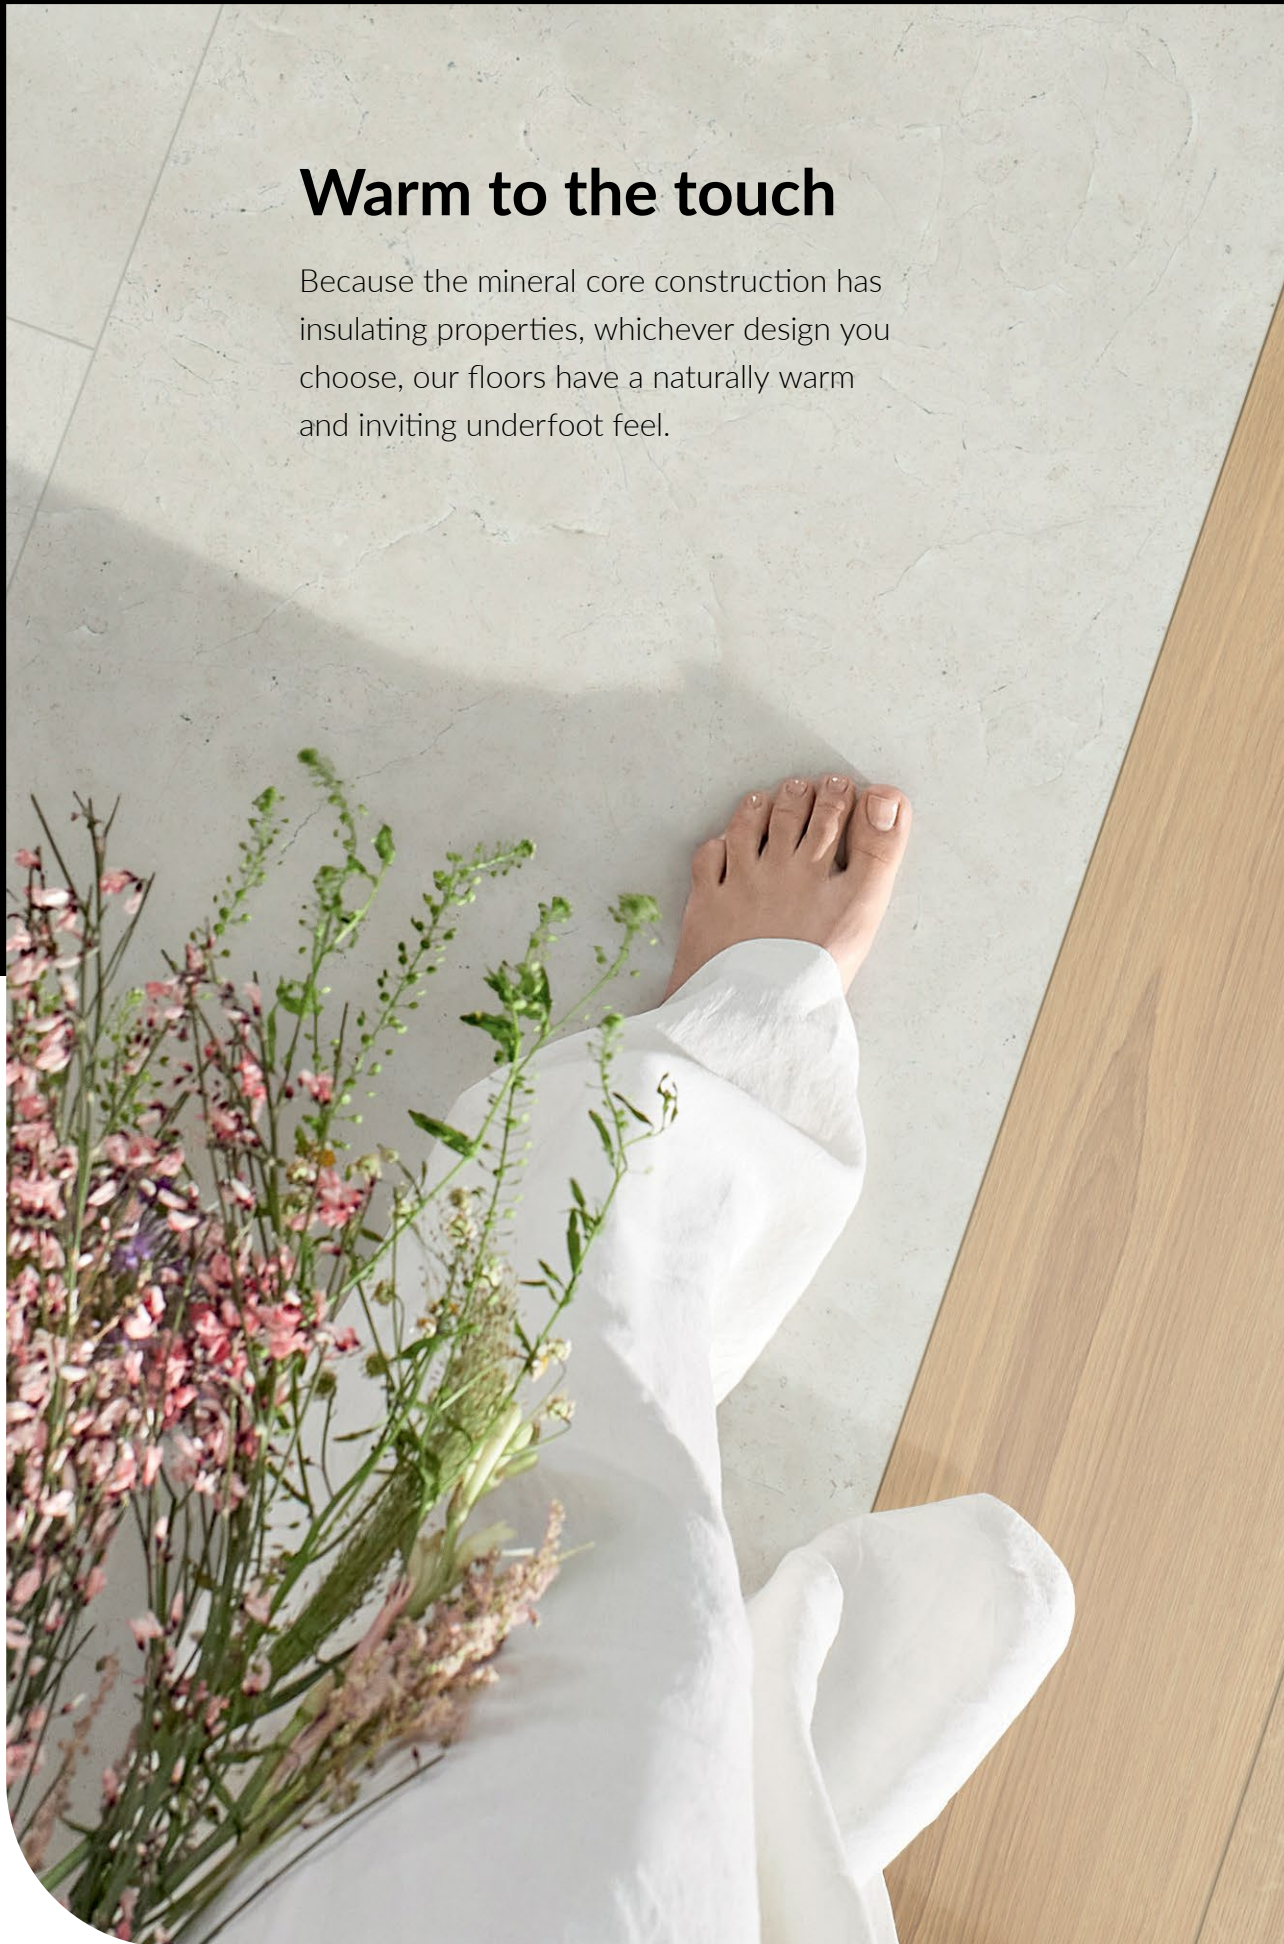

Highly heat resistant

Mineral Core Board floors are highly resistant to deformation due to temperature, withstanding up to 50°C. They are fully suitable for underfloor heating solutions.

Warm to the touch

Because the mineral core construction has insulating properties, whichever design you choose, our floors have a naturally warm and inviting underfoot feel.

Invisible pattern repetition

Each design features over 40 different wooden planks or 24 unique stone tiles for no pattern repetition up to 12 m².

Stellar**Elements**

Paonazzo Classic

A classic Italian marble with veining that ranges in colour from black to gold and violet to caramel, all set against an ivory-white background. The soft edges of the veining bleed gently into the bright white as seen in the original natural stone. Our slabs have a satin-smooth polished finish.

Maris Linen

Inspired by Trani stone, our Maris Linen granite has added colour and detailing compared to this traditionally uniform material. Characterised by a fine-grain texture and unique wave patterning, it has a structured matte-all-over surface finish.

Halo

This simple, straightforward, and modest design contains a small but visible amount of decorative pigment for a gentle movement of colour. Able to be easily combined with our wood decors, this stone features a synchronised surface effect across two colour categories – light and medium.

Biancone Cloud

A pale grey marble from the Asiago plateau often found in monuments and fountains throughout Italy. Biancone Cloud has a consistent colouring that strays between icy and warmer shades of white. A sandblasted finish enhances the design's visible stone fractures, resulting in a matte, finely-lined surface.

Parkway Oak

Utterly free of wood knots, our designers have handpicked the best oak for an incredibly clean and clear design. A perfection that is nearly impossible to achieve with natural wood flooring, we have brushed Parkway Oak's surface as widely and as softly as possible for impeccably pure wooden planks.

Malbork Oak

Malbork Oak is an expressive design balanced by a carefully curated amount of natural wood elements. Each plank has been inspected for an ideal variety of wooden cracks and notches. The brushing of this design is delicate, with finer, more disconnected lines throughout its grain.

Welsh Oak

Welsh Oak is brushed as deeply and widely as possible, with many fine lines for an enhanced tactile feel. Finished with a subtle white oil that blanches the colour, the planks also feature centralised cathedrals resulting in a naturally deeper tone towards the middle of each plank.
