

Logistics and Industry Solutions

About Tarkett

Tarkett is a leading industry pioneer in flooring, setting standards for innovation and quality. As a trailblazer in creating aesthetic and functional flooring solutions, the company is synonymous with sustainability. Tarkett stands out as a specialist in sustainable development, employing modern technologies that minimise environmental impact. The company offers an extensive range of products tailored to global trends and local needs. With a presence in over 100 countries, Tarkett provides innovative flooring that meets diverse market demands. Tarkett products combine durability with modern design, creating spaces that are both visually appealing and environmentally responsible.

By choosing Tarkett, you invest in quality and sustainability. We provide solutions that meet the highest standards and promote healthy, efficient space management.

DESIGNED FOR CIRCULARITY

- Recycled materials constitute approximately one-third of the content in our flooring solutions (detailed information is available on our technical data sheet)
- Durable solution with a lifespan of up to 20 years, as specified in the product's Environmental Product Declaration*
- Our ReStart® take-back and recycling programme offers recycling services for both post-installation and post-consumer waste
- Recycling is carried out at our recycling centres in Clervaux and Ronneby in compliance with ISO 14021 standards

SUSTAINABLE PRODUCTION

- Responsible production with zero manufacturing waste sent to landfill
- 100% low-emission electricity
- 100% recovered industrial water in a closed-loop system
- Our production facilities are certified to ISO 14001 (environment) and ISO 50001 (energy) standards
- European-based manufacturing ensures minimal transportation emissions

GOOD MATERIALS

- PVC free from heavy metals, biocides, and phthalates
- Our wet room concept complies with REACH regulations
- Available Material Health Statements (MHS) provide information on material composition, while Environmental Product Declarations (EPD) outline environmental impact
- 98% of materials are assessed by external institutions

HEALTH AND WELLBEING

- To ensure better indoor air quality, the Tarkett flooring features extremely low VOC emissions—100 times lower than EU standards require
- High resistance to bacteria
- ISO 846 – the product does not promote bacterial growth

* Based on installation conducted by a Tarkett-trained professional installer in accordance with the specifications of the wet room concept
** Impact on health / product circularity / renewable energy and climate requirements / water resource management / social equity

Together we can do more

Less waste – You are counting on us to transform waste into quality resources. Since 2010, we have diverted more than 119K tons of flooring – the equivalent of 4,000 fully-loaded dump trucks – from landfill and incineration through our ReStart® take-back and recycling programme. By 2030, at least 30% of our raw materials will come from recycled materials.

Lower emissions – Since 2010 and by the end of this year, we will have reduced greenhouse gas emissions of our factories by about 50%. And we'll reduce all emissions from our entire value chain by 30% by 2030.

Greater wellbeing – Lowering our environmental footprint will never mean compromising your comfort, health or overall wellbeing. We design flooring that contributes to better air quality in your home, keeps noise levels low and is a pleasure to walk on.

More proof – We establish ambitious sustainability goals and seek third-party accreditation from scientific institutions and government bodies to measure our progress, as well as closely work with industry associations and NGOs.

Sustainability plays an integral role in everything we do here at Tarkett, from the way we design our products, to the raw materials we use, to how we recycle them at the end of their lifecycle.

Sustainability is part of our DNA. Together, we have a

responsibility. Together, we can work to secure our future. By joining forces, we will build a stronger foundation – one we can all stand firmly on, for generations to come.

Arnaud Marquis,
Chief Sustainability & Innovation Officer

Our support for obtaining green building certifications

Flooring solutions play a crucial role in green building certification, as they are an essential part of building finishes. Choosing Tarkett's sustainable flooring solutions and adhering to best practices are key factors in supporting sustainability and the green building certification process. Tarkett supports obtaining certification through:

- Reducing waste through the ReStart® programme, which promotes the recycling of carpet tiles, linoleum, and PVC flooring*. The programme reduces waste sent to landfill or incineration, as well as carbon dioxide emissions.

- Using sustainable raw materials that are recycled, renewable, or biologically sourced.
- Ensuring better indoor air quality with products that have low or very low volatile organic compound (VOC) and formaldehyde content, while also providing enhanced acoustic and visual comfort.

* Homogeneous flooring solutions (post-2011), iD Square (post-2018), LVT click collections, heterogeneous loose-lay vinyl flooring, and vinyl sheet flooring (non-glued installation on surfaces under 50 m²).

Our products comply with the requirements of the EU Taxonomy

Although Tarkett, like other building material manufacturers, is not directly subject to the requirements of the EU Taxonomy, our flooring products meet the criteria outlined in the delegated acts of the Taxonomy, including:

- Circular economy practices
- Reduction of the carbon footprint of raw materials
- Products made with recycled materials
- Reuse of key building components
- Responsible management of construction waste
- Use of low-emission building products indoors (formaldehyde <math><60 \mu\text{g}/\text{m}^3</math>, maximum 1 $\mu\text{g}/\text{m}^3</math> for CMR* 1A and 1B)$

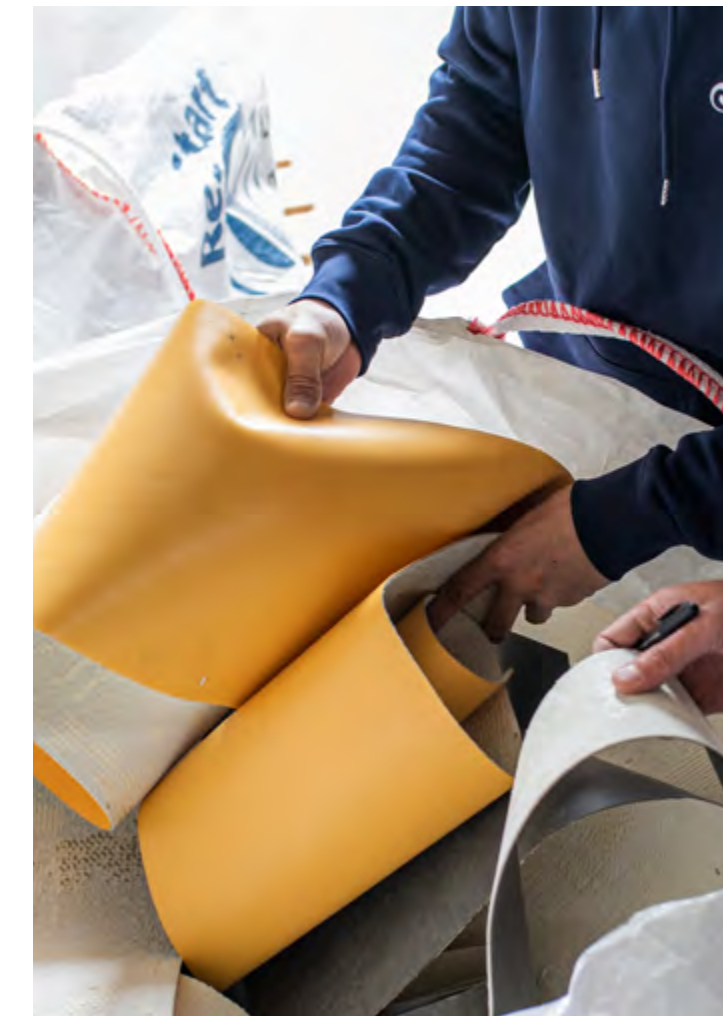

* Carcinogenic, mutagenic and reprotoxic substances (CMR)

Recycling? You have the need. We have the solution.

Recycling safe materials is undeniably a positive practice. It helps protect global natural resources and plays a key role in reducing climate change. But when it comes to recycling, you have the need – we have the solution.

Proper disposal isn't always straightforward. How can you be sure that your post-installation or used flooring will have a second life, instead of ending up in landfill or being incinerated?

Warehouse spaces for the future

Modern warehouses are not just storage areas for products, but also office spaces, back offices, and server rooms, all of which require specific flooring solutions.

Warehouses

The flooring in a warehouse is a crucial element that ensures not only safety but also the efficiency of daily operations. Our solutions are characterised by exceptional durability, which is essential in high-traffic environments. Surfaces resistant to abrasion, impact, and heavy loads guarantee long lifespan, minimising the need for repairs and replacements.

Equally important is ease of maintenance – our floors are designed for quick and uncomplicated cleaning, reducing downtime and improving productivity. In the event of mechanical damage, the puzzle-lock system allows

for fast replacement of damaged sections, eliminating the need for lengthy downtime.

An additional advantage is short installation time, allowing the warehouse to be ready for use as quickly as possible. These floors combine functionality with aesthetics, giving interiors a modern and professional appearance that enhances the character of warehouse spaces. It's the ideal solution for demanding clients who value quality and durability.

Conference rooms

A conference room requires a space that fosters focus, communication, and collaboration. Our flooring solutions are designed to enhance acoustics, reduce noise, and ensure a comfortable environment for meetings. With excellent sound absorption, our floors help create an ideal setting for productive discussions.

Additionally, our advanced technology improves air quality, ensuring a healthier and more pleasant atmosphere. Carefully chosen colours and textures contribute to a professional and welcoming atmosphere, supporting creativity and concentration.

Office zones

The carpet tiles we offer combine high-quality craftsmanship with functionality, creating a comfortable environment that promotes focus and concentration. Thanks to their excellent acoustic properties, our carpet tiles effectively reduce noise, allowing for greater productivity.

With patented technology, DESSO AirMaster carpet tiles capture and retain dust 8 times more effectively than smooth floors and 4 times more effectively than standard carpet flooring. By purifying the air, they contribute to the health and wellbeing of both people and the environment, providing a clean space to breathe.

DESSO® Carpet Tiles

Enhance comfort in your space with DESSO® carpet tiles.

- Quick and easy installation
- Available with SoundMaster acoustic backing
- Wide range of design options
- Can be installed on raised floors
- 100% recyclable through our free ReStart® take-back and recycling programme
- Made from recycled yarn
- Cradle to Cradle® Bronze, Silver, or Gold v3.1 Certification
- FloorScore® Certification
- GUT GUI
- Carbon footprint calculated in modules A-D by an external certifying body – EPD report
- CRI Green Label Plus
- Material Health Statement Certification
- Volatile Organic Compound (VOC) emissions below 10 µg/m³

iD Tilt / iD Tilt HIT

Simple and quick to install, durable LVT puzzle tiles designed for high-traffic areas.

- High-quality tiles for high-traffic areas
- Quick and easy installation
- Can be installed over existing floors
- Protected with a UV-cured polyurethane coating
- Extremely durable wear layer and excellent dimensional stability
- Best-in-class resistance to scratches, scuffs, and stains
- Individual tile replacement capability
- Resistant to forklift and pallet truck movement
- Noise reduction within the space

- Excellent resistance to stains and chemicals
- Volatile Organic Compound (VOC) emissions below 10 µg/m³
- FloorScore® Certification
- 100% recyclable

Homogeneous Vinyl Roll Flooring: iQ Range

A proven balance between performance and affordability.

- Welded seams support infection control and prevent moisture penetration
- Contributes to improved indoor air quality
- Excellent resistance to stains and chemicals
- Extremely durable and easy to maintain
- Protected with a UV-cured polyurethane coating
- Suitable for high-traffic areas
- Optimal lifecycle cost
- Can be dry-polished
- 100% recyclable through our free ReStart® take-back and recycling programme
- Volatile Organic Compound (VOC) emissions below 10 µg/m³
- FloorScore® Certification
- Carbon footprint calculated in modules A-D by an external certifying body – EPD report
- Phthalate-free

LVT + Tektanium®

iD Inspiration with UV-cured polyurethane layer is incredibly resistant to wear.

- Premium resistance to scratches, scuffs, stains, and wear
- Matte finish adds beauty, depth, and dimension while minimising glare
- Contemporary wood, abstract, and stone designs

- Easy maintenance without the need for special cleaning agents or procedures
- FloorScore® Certification
- Phthalate-free
- Carbon footprint calculated in modules A-D by an external certifying body – EPD report
- 100% recyclable through our free ReStart® take-back and recycling programme
- Volatile Organic Compound (VOC) emissions below 10 µg/m³

Slip Resistance Flooring: Granit Safe.T, Aqua Multisafe, Safetred

- Reduces the risk of slipping and falling
- Available in various slip resistance classes
- Easy to maintain – no waxing or impregnation required
- Durable and impermeable surface
- Phthalate-free
- Volatile Organic Compound (VOC) emissions below 10 µg/m³
- Carbon footprint calculated in modules A-D by an external certifying body – EPD report
- 100% recyclable through our free ReStart® take-back and recycling programme

Wall Coverings: Aquarelle, ProtectWall, Wallgard, LinoWall, iQ Surface Wall

Durable wall protection for years.

- Available in various thicknesses and constructions
- Wide range of design and colour options
- Easy and simple maintenance
- Fire-resistant solutions
- Phthalate-free
- FloorScore® Certification

- 100% recyclable
- Volatile Organic Compound (VOC) emissions below 10 µg/m³

Loose-Lay LVT Tiles

Acoustic LVT solutions designed for raised floors.

- Perfectly compatible with carpet tiles
- Modern patterns and designs available in 7 formats
- High resistance to scratches and scuffs
- Quick and easy loose-lay installation
- Ideal for high-traffic areas
- Reduces noise by 15 dB
- 100% recyclable
- Phthalate-free
- FloorScore® Certification
- Volatile Organic Compound (VOC) emissions below 10 µg/m³
