

REFRESHER for hardwax oiled floors

WOOD ACCESSORIES - PRODUCT INFORMATION

Refresher for floors treated with hardwax oil keeps the floor fresh and strengthens the surface against wear because it contains hardwax.

- Can also be used for parts of the floor that are subjected to heavier wear.
- For occasional maintenance and thorough cleaning of Hardwax Oiled wood floors.
- Cleans and refreshes the surface.
- Easy to use.
- Great for removing stubborn stains.

Product Description:	Perfectly both cleans and regenerates floors finished with Hardwax Oil. The natural waxes refresh the surface to remain looking beautiful. The surface remains durable without a thick film being formed.
Use:	For occasional maintenance of Hardwax Oiled wood floors. The product can also be used for stain removal. The waxes are dirt resistant and stop dirt from penetrating into the surface. Shake the bottle well before use!
Preperation:	The surface must be clean and dry. Remove all loose dirt by brushing, dry mopping or vacuum cleaning and then damp mop the surface. The Tarkett Microfiber Mop and Tarkett Bioclean in lukewarm water are perfect for damp mopping. Follow the dosage in the instruction of the Bioclean bottle. Allow the surface to dry before applying Tarkett Refresher For Hardwax Oiled Floors.
Application:	The produkt is ready to use and should not be diluted. Shake the bottle well before application.
Manual Application:	Apply the Refresher very thinly on the dry and clean flooring surface with Tarkett Microfiber Mop or similar.
Mechanical Application:	Apply the Refresher on the dry and clean floor using a single disc machine and a white pad (approx. 2 teaspoons per m ²). Spread the Refresher evenly over the surface area and work in with the machine. If swirl marks can be seen either flip or replace the white pad. If a higher gloss level is required, wait for the Refresher to dry and then polish the surface using a clean white pad.
Tip:	To remove especially tough stains apply some Refresher on a piece of white scotch pad and rub off the dirt. Alternatively, use a single disc machine and a white pad.

Material no.	8792209
Pack size	1 litre, 6 litres per box
Coverage	1 litre will cover approx. 80-100 m ²
Use	For use 1-2 times per year (or more depending on the degree of soiling).
