About Tarkett

With a history stretching back 135 years, Tarkett is a worldwide leader in innovative flooring and sports surface solutions, with net sales of more than €2.8 billion in 2018. Offering a wide range of products including vinyl, linoleum, rubber, carpet, wood and laminate flooring, artificial turf and athletics tracks, the Group serves customers in over 100 countries across the globe. Tarkett has 13,000 employees and 35 industrial sites, and sells 1.3 million square meters of flooring every day, for hospitals, schools, housing, hotels, offices, stores and sports fields.

Committed to “Doing Good. Together”, the Group has implemented an eco-innovation strategy based on Cradle to Cradle® principles and promotes circular economy, with the ultimate goal of contributing to people’s health and wellbeing, and preserving natural capital. **www.tarkett.com**

DESSO Arable 8904, 8333

Our Fundamentals

Doing Good. Together.

Every day, we strive to improve people's lives, preserve natural resources and respect our environment.

At Tarkett, we believe that together, we can make a positive impact on people and the planet. We strive to make high quality, sustainable flooring to help you create healthier and people-friendly spaces.

We listen to our customers' needs and collaborate with all our stakeholders to design products that deliver optimal performance, promote healthy living and respect natural resources.

We are designing for life

People spend 90% of their time indoors, working, learning and relaxing. We help you to create healthier, safer, more people friendly indoor spaces by designing high quality, sustainable products. In particular, by continuously improving the health and environment credentials of our products, we strive to select materials that can be recovered, recycled and transformed into new products. Through our focus on Cradle to Cradle® design, we make our products in a way that helps to preserve natural resources and mitigate climate change.

We are closing the loop

With our ReStart® takeback programme, we help you to manage your flooring waste effectively while contributing to safeguarding the world's natural resources and protecting the environment. Upon return, carpet tiles are processed using our Carpet Recycling Centre which separates the yarn and other fibers from the backing. Our Cradle to Cradle® Gold certified DESSO EcoBase backing is fully recyclable in our own production facility. The PA 6 yarn can be returned to our yarn manufacturer for the production of new yarn.

We're driving collaboration

The world's great sustainability challenges require co-operation and partnership across industries and supply chains. We encourage our customers and all our stakeholders to join us in working toward positive change. Importantly, we communicate our sustainability progress transparently, and provide you with clear information about our products and ambitions.

Innovation Strategy

Creativity, Functionality and Cradle to Cradle®.

All DESSO carpets are characterized by the synergy of the three pillars:
Creativity, Functionality and Cradle to Cradle®.

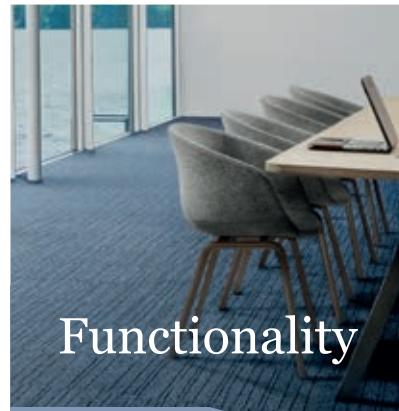

Due to our many years of experience as a manufacturer of carpets (over 80 years) and our specialization in modular carpeting (over 45 years) we can offer expertise, flexibility in production and supply, as well as long-standing business relationships in our role as a reliable partner.

Today, most people spend 90% of their time indoors. This makes it imperative that we create healthy interiors. As a supplier of carpets to the commercial and consumer sectors, we believe it is our responsibility to develop products that contribute to a healthier living and working space.

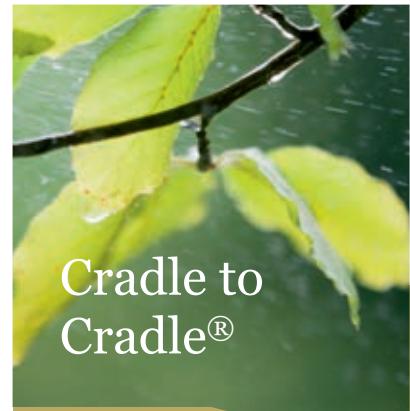

Creativity

Design excellence is a priority for us. We are inspired by the latest trends in areas such as fashion, architecture, art and interior design. Next to that we want to stimulate co-creation of stunning new designs either via our international Circles of Architects® platform, in our Design Center™ or by successful partnerships with leading architects and designers.

Functionality

Pioneering solutions that lead to healthier and happier living and working conditions. Through this process, we ask what our carpets can do to improve people's health and wellbeing, leading to innovations such as the DESSO AirMaster® and SoundMaster®, carpets that reduce the amount of fine dust in the indoor atmosphere and unwanted noise.

Cradle to Cradle®

We are passionate about creating products that have a positive impact on people's health and wellbeing inside their homes and in the workplace and that also contribute to a more sustainable business model in the future. We achieve this through Cradle to Cradle® design where 'waste equals food' is at the heart of the design philosophy.

Creativity

Circles of Architects®

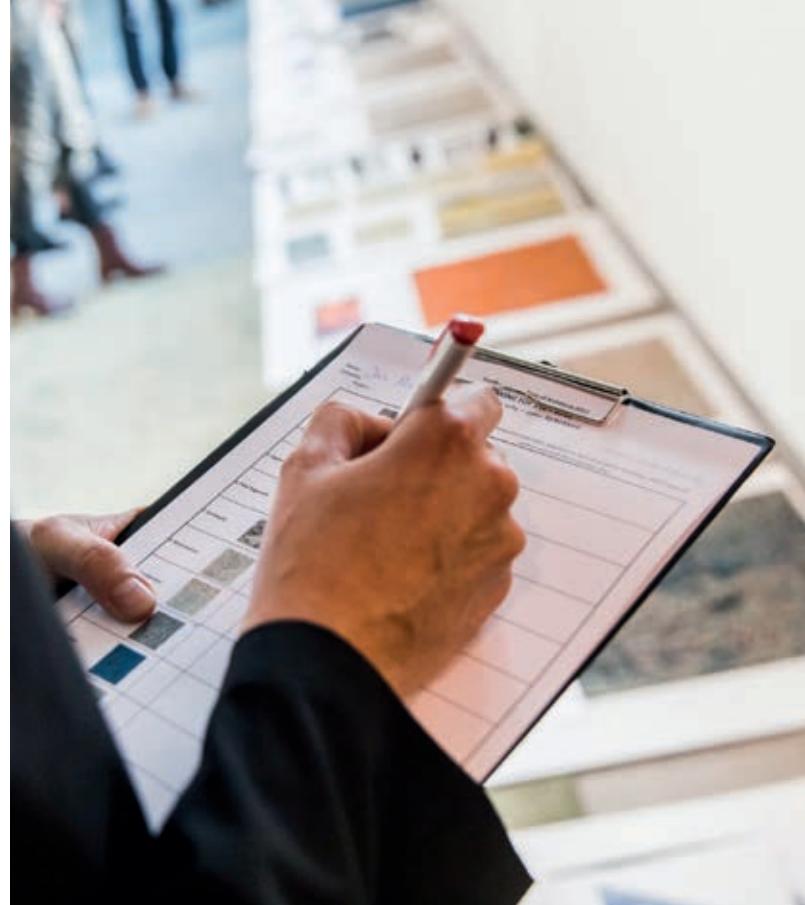

When a stone is cast into water, it displaces the water, creating ripples like an idea spreading out wider and wider. And this is also the effect produced by Circles of Architects, an international network first launched in 2007.

The network is focused on engaging architects and designers in face to face conversations and online networking. We do this to gain inspiration, new insights into markets and trends and finally co-create innovative and stunning carpet designs.

Our dialogue with the A&D community is sparked off at Circles of Architects live events as well as online.

To gain inspiration,
new insights and to
co-create.

Creativity

Design Center™

DESSO
Colorant 8522

Design Center Collections

The Design Center Collections are specially developed collections that consists of special ranges of designs and colours in addition to our extensive, standard collections. The Design Center Collections are made on demand, unique for every customer.

As a leading company in our field, we have taken the next step by developing our Design Center. Here, we demonstrate our full transparency with regards to our use of sustainable materials and production methods.

By **involving our customers** in the manufacturing process, we enable them to tap into their own creativity by adding their own signature style to the floor. Next to that, they can take advantage of the expertise offered by an experienced team of textile designers and technicians as well as a pool of specialist machinery.

In addition to our standard carpet collections, we encourage our customers to visit our Design Center, where together with our designers, the most suitable flooring solution can be designed. It means that our customers are in the center of the creative process, and that together we will create a product that meets the specific needs of our customers.

DESSO Colourant 8522

To learn more, contact your DESSO Carpet Sales Representative and make an appointment at our Design Center.

Creativity

3D Textures™

Carpet creativity at your fingertips

The texture of the floor plays an important part in the interior design of a building. They can enable you to achieve a stunning interior design experience. As a company we searched for a way to make the carpet design process better and more effective.

As a result, we developed the DESSO 3D Textures digital tool. With this tool you can create an excellent visual experience. Simply select the right structure, colour and installation method for the best results at the click of a button.

We have produced DESSO 3D Textures to give you the opportunity to create visual experiences that inspire people, all based on the latest DESSO carpet designs. 3D Textures is a highly practical online tool which enables you to achieve your architectural vision effectively and efficiently, giving you the chance to inspire and persuade. Literally at your fingertips.

www.desso.com/3d-textures

Creativity

CARPETECTURE®

DESSO Arable 2915, 9920, 9106

DESSO Arable 8904, 8333

'A mood-creating experience, inspired by encounters with architecture'

CARPETECTURE is a new way of thinking, incorporating elements from modern international architecture to create emotionally expressive carpet designs. It is inspired by changes in architecture and by how people think about space, atmosphere, colours and materials.

When changes in architecture are used to inspire carpet designs there is synergy. The carpet becomes more than a floor covering, it performs alongside other architectural elements, intensifying the sensation. As part of this theme, several DESSO carpet collections have been launched over the years, including: Transitions, Essentials, the 'Make It Your Own' collection and most recently the 'Human Fascination' collection.

Creativity

Fusion

Fusion: pushing boundaries to excite and engage

With Fusion, we bring different flooring solutions together, to create stunning and practical designs for contemporary spaces.

Complemented by our team's unrivalled insight and expertise across the different categories, Fusion puts creativity and convenience at your fingertips. Produced in tile or plank format across a range of patterns, colours and styles, Fusion offers endless possibilities to create beautiful flooring designs.

Design-led thinking for infinite creativity

Creativity is at the heart of good design – along with the desire to make a mark. Our aim is to help the architecture and design community create interiors that are both captivating and fit for purpose. Through a dynamic approach that combines our different flooring solutions, any requirement can be met through endless possibilities.

Pushing boundaries to excite and engage

Driven by innovation, we continue to develop high-quality flooring that delivers against functionality and creativity. Our products strike the delicate balance between meeting creative aspirations, technical requirements and sustainability criteria without compromise. At Tarkett we deliver multi-category flooring in varying textures, colours and patterns to meet high aesthetical demands – all while pushing boundaries to excite and engage.

For more information and inspiration, please visit www.tarkettfusion.com

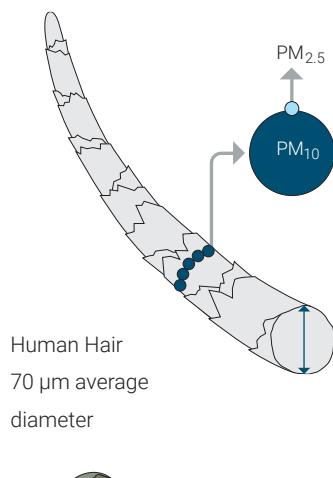

Functionality

DESSO AirMaster®

Clears
the Air®

Innovating to contribute to people's health and wellbeing

Fine Beach Sand
90 µm in diameter

On average, people spend 90% of their time indoors. But indoor air can be 2 to 5 times more polluted than outdoor air, and with indoor air quality dominating workplace concerns, now is the time to act.

Breathing clean air is vital to human health

Breathing clean air is a fundamental human right. Yet air pollution is a growing risk to people's health, causing 7m deaths annually, according to the World Health Organization (WHO).¹

When we think about air quality, we tend to imagine city smog, heavy industry or streets polluted with car exhaust fumes. But indoor air quality is just as important, if not more so, because we spend 90% of our time indoors.

Tiny, invisible particles called particulate matter (PM), also known as particle pollution or fine dust, play a determining factor in the air quality of homes and workplaces, and are directly linked to health risks.²

Particulates with an aerodynamic diameter of 10 µm or smaller (PM₁₀), in particular, can contain microbial contaminants, such as mould, pollen and allergens,³ which can lead to respiratory problems and allergic reactions. They can also affect the heart and lungs, causing serious physiological problems.

Taking action to improve indoor air quality is vital to contributing to human health and wellbeing, now and in the future.

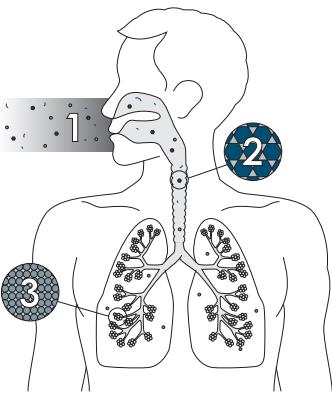

DESSO Desert AirMaster 5227

¹ World Health Organization, total number of deaths caused by ambient and indoor air pollution in 2012.

² World Health Organization Air quality guidelines for particulate matter, global update 2005.

³ Pima County, Department of Environmental Quality.

Understanding particulate matter

The particulate matter we breathe in our homes and workplaces can be grouped into two categories:

PM₁₀

Particles with an aerodynamic diameter of up to $10 \mu\text{m}$ ¹ – these can cause health problems because they are typically small enough to pass through the throat and enter the lungs.²

PM_{2.5}

Fine particles with an aerodynamic diameter smaller than $2.5 \mu\text{m}$ – these can produce harmful effects on the respiratory and cardiovascular system.

How does particulate matter enter the body?

- 1 Particulate matter enters our respiratory (lung) system through the nose and throat.
- 2 Larger particulate matter is eliminated through coughing, sneezing and swallowing.
- 3 Smaller particulate matter can penetrate deep into the lungs, travelling all the way to the alveoli, causing lung and heart problems, and delivering harmful chemicals to the blood system.

¹ μm symbol represents a micrometre; one thousandth of a millimetre.

² World Health Organization Air quality guidelines for particulate matter, Global update 2005.

Proven effectiveness in clearing the air

DESSO AirMaster is the **first product in the world** to be awarded the **GUI Gold Plus label**, the highest possible accreditation awarded by Gesellschaft für Umwelt- und Innenraumanalytik (GUI), Germany's leading independent air quality testing organisation.

Scientists at GUI's laboratory measured DESSO AirMaster's ability to reduce fine dust concentration, conducting 15 tests in three test rooms, each furnished with different flooring solutions (smooth floor, standard loop pile carpet and DESSO AirMaster).

The result?

DESSO AirMaster is **8 times more effective** at capturing and retaining fine dust than smooth flooring solutions (PM_{10}). It is also **4 times more effective** than standard carpet solutions (PM_{10}).¹ Already in 2010, this alone led to a GUI Gold label as the first product in the market, followed by the GUI Gold Plus label in 2015.

The Gold Plus label was awarded for high performance on three further test criteria:

- Suitability for allergy sufferers
- High fine dust binding capacity
- Low Volatile Organic Compound (VOC) emission properties.²

DESSO AirMaster® Atmos 6422, 9096

¹ Based on tests performed by GUI with DESSO AirMaster® versus a standard smooth floor and versus standard structured loop pile carpet (median values).

² (ISO 16000 test analysis, according AgBB evaluation scheme 2010 and in

DESSO AirMaster® laboratory test

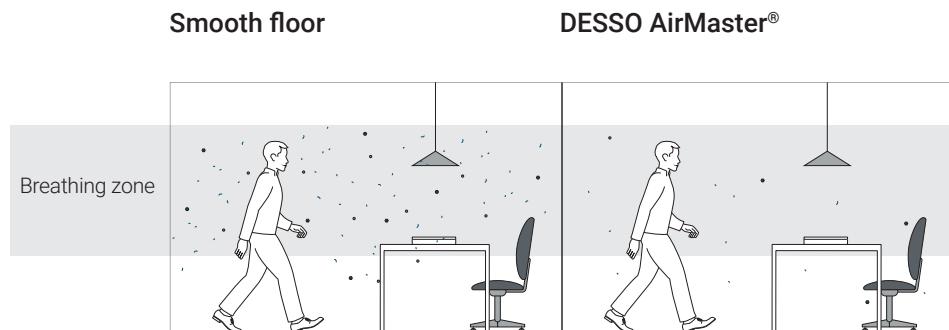

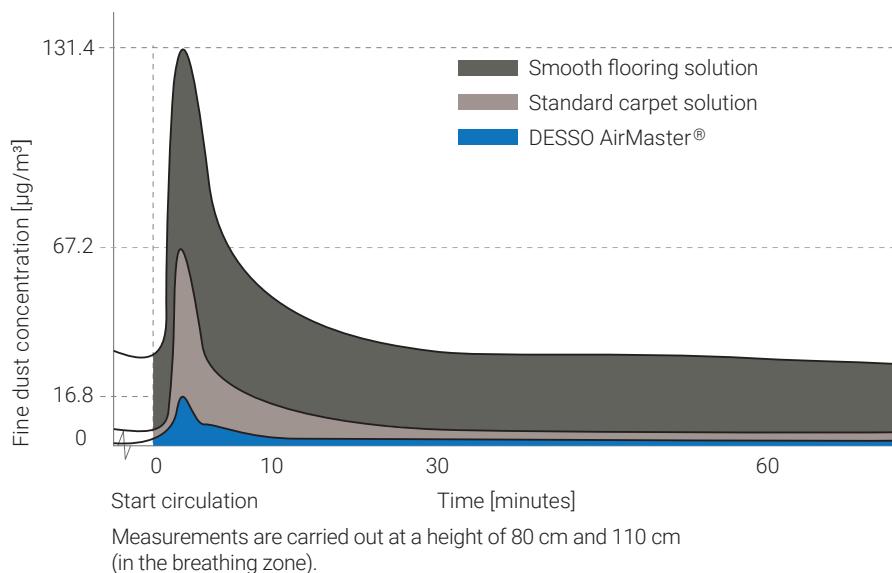

The GUI Gold label has been awarded based on the average of **15 repeated tests** in which the excellent fine dust capturing performance of DESSO AirMaster was measured, to safeguard that the results are **scientifically sound** and not just based on a one-time performance. During some tests, DESSO AirMaster proved to be **up to 20 times more effective** in capturing and retaining fine dust than smooth flooring solutions.

DESSO AirMaster laboratory test (median values)

DESSO AirMaster is 8 times more effective in capturing and retaining fine dust than smooth flooring solutions.

With DESSO AirMaster the concentration of particulate matter drops significantly faster than with smooth flooring.

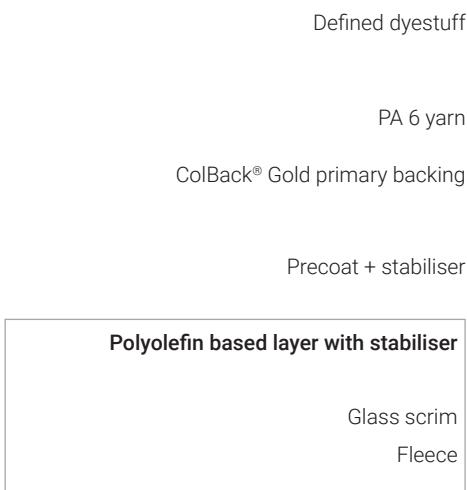

With smooth flooring the amount of airborne particulate matter stays consistently higher than the peak level of DESSO AirMaster.

DESSO AirMaster® is Cradle to Cradle® Silver level-certified

Cradle to Cradle Certified™ is a certification mark licensed by the Cradle to Cradle Products Innovation Institute.

= DESSO EcoBase
secondary backing

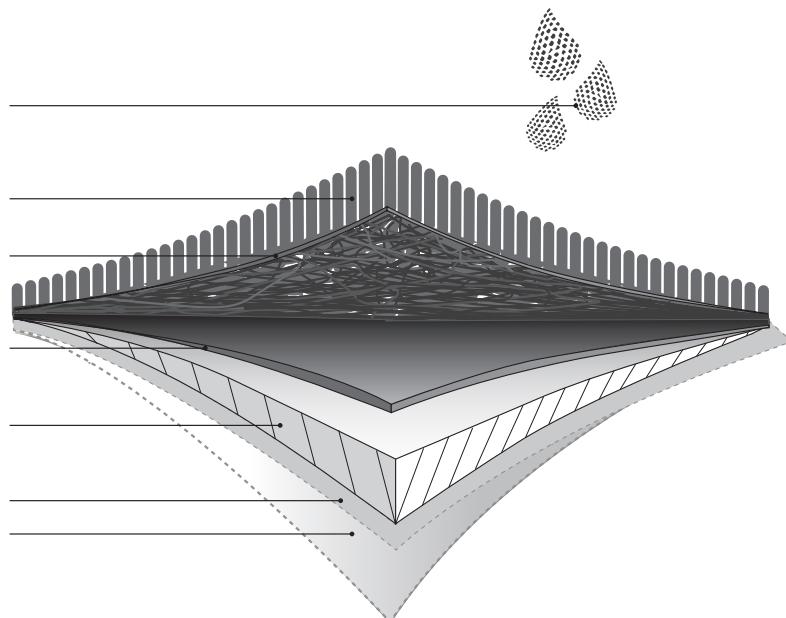

¹ Colback® Gold delivers the same the same high performance as our previous primary backing with up to a 95% decrease in antimony content.

² In comparison with standard non-woven primary backing.

³ Positively defined means all ingredients have been assessed as either Green (optimal) or Yellow (tolerable) according to the Cradle to Cradle® assessment criteria. As described in Cradle to Cradle® Certified™ Product Standard Version 3.1.

⁴ Lloyd's Register assured the EcoBase backing as 100% recyclable and the chalk as 100% pre-consumer recycled material.

For Tarkett, developing carpets that help to contribute to improving people's health and wellbeing and protect the environment is central to both our innovation strategy and our longstanding Cradle to Cradle® commitment. Today, the entire DESSO AirMaster range is Cradle to Cradle® Silver level-certified, with EcoBase™ backing as standard.

We live our Cradle to Cradle® vision in multiple ways:

- DESSO AirMaster collections contain **100% regenerated ECONYL® nylon yarn**, made from recovered waste materials such as end-of-life carpet yarn and discarded fishing nets.
- Every DESSO AirMaster carpet tile features a primary backing, Colback® Gold,¹ with up to a 95%² decrease in antimony content, helping to preserve finite antimony reserves and promote safer tile recycling.
- All AirMaster products are made with Cradle to Cradle® Gold certified DESSO EcoBase® backing, made from 100% positively³ defined ingredients.
- DESSO EcoBase is 100% recyclable in our own production process and contains a minimum of 75% recycled chalk from the local drinking water industry.⁴ In 2015, the DESSO EcoBase backing achieved Cradle to Cradle® Gold level certification and reached Platinum level for Material Health.
- **ReStart®** is our take-back programme for **post-consumer carpet tiles**. Upon return, carpets are processed using our carpet recycling facility which separates the yarn and other fibres from the backing.
- In 2019, we took another step on our journey. Launching a new AirMaster collection with a Cradle to Cradle® Gold-level certification and the same unique fine dust-capturing functionality offered by all DESSO AirMaster collections, AirMaster Gold goes a step further in creating a healthier workplace and a more sustainable world.

Functionality

Create your own AirMaster®

Over 6
million
design
possibilities!

We now offer the design flexibility to create your own AirMaster

DESSO AirMaster is a unique carpet tile. It can capture and retain harmful fine dust from the indoor air. Test have proven that DESSO AirMaster is **8 times more effective in capturing and retaining fine dust than smooth flooring solutions (PM₁₀) and 4 times more effective than standard carpet solutions (PM₁₀).**

We now offer the design flexibility to create your own AirMaster.

How does it work?

When using 'Create your own AirMaster' you have the freedom to choose your own colour combinations. **Choose from six main background colours and select up to five accent colours from a collection of 16.**

With just one click you will get instant insight in to how your design will look, as an individual carpet tile and also installed in various environments.

You can continue adjusting your colour choices until you have found your perfect combination. In total, over 6 million possibilities are available giving you endless design freedom to create your own AirMaster.

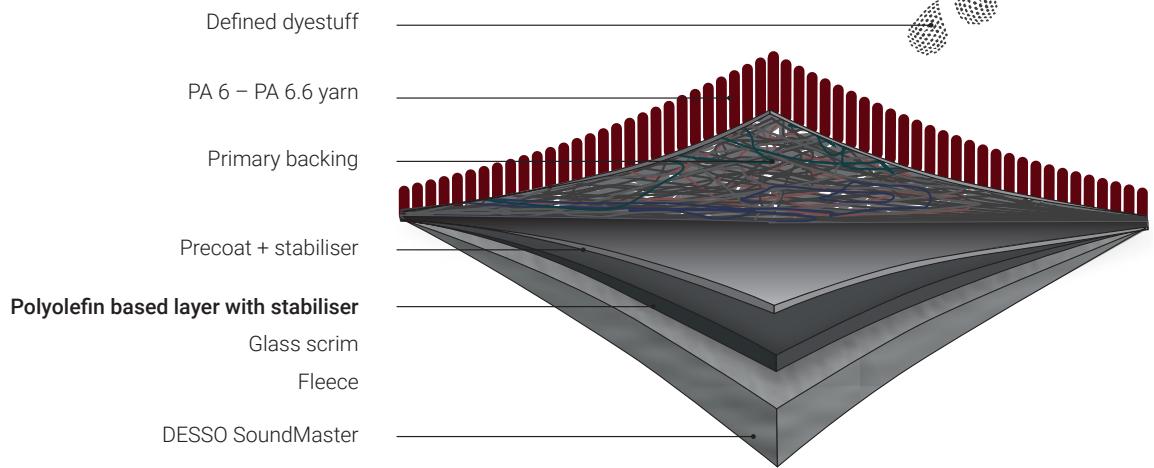

For more information: www.desso-airmaster.com.

Functionality

DESSO SoundMaster®

A photograph showing a close-up of a person's lower legs and feet as they walk across a textured, reddish-brown carpet. The person is wearing brown trousers and dark green, pointed-toe pumps with thin black跟. A small, semi-transparent white rectangular box is positioned over the right foot, containing text.

The perfect
solution for
improved
sound
insulation and
absorption

Less noise means more productive workforces. Quieter environments prevent health problems occurring, reduce stress levels and improve concentration. This is especially important in open plan offices where people need a space both for quiet concentration and open communication and where they need a place for private conversations as well as large-scale meetings¹.

Additional noise from external factors such as traffic, heating and air conditioning and computer equipment make it hard for managers to achieve the optimum level of noise within buildings².

That is why good sound absorption and sound insulation is so important. And the best and most cost effective option comes with a SoundMaster carpet tile backing as opposed to the other often more expensive options such as ceilings, walls and panels.

DESSO SoundMaster offers an impact sound insulation value (ΔL_w) up to +10 dB above the standard value³, thereby setting a new industry standard in carpet performance. Carpet in general reduces the impact of sound by between 20 and 30 decibel⁴.

DESSO SoundMaster achieves an improvement in sound absorption performance up to +0.15 (a_w)³, equivalent to up to +100% improvement in comparison to standard carpet designs (a_w value between 0.15 and 0.20)⁵.

The layered design of the carpet tile, and especially the SoundMaster backing, optimises the sound absorption and sound insulation. This felt backing is made from 100% polyester (80% recycled) and is specifically chosen for its advanced sound insulation and absorption properties. Additionally, it offers an even more comfortable underfoot feel than standard carpet.

On top of its expertly designed functionality, the SoundMaster backing is a clear example of up-cycling with its 80% recycled content from used PET bottles.

¹ Environmental Noise and Health in the UK, Health Protection Agency, p.57-58, Noise in figures, European Agency for Safety and Health at Work, p.70-73.

² According to the European Agency for Safety and Health at Work the recommended noise level is 30-45 dB(A) while even in 'quiet' offices the average noise level is often between 40-45 dB.

³ Tests performed at SWA (Schall- und Wärmemessstelle Aachen GmbH) – Institut für schalltechnische und wärmetechnische Prüfungen-Beratung-Planung.

⁴ To compare: other flooring solutions (non-carpet) generally give a value between 5 and 10 dB.

⁵ To compare: other flooring solutions (non-carpet) generally give a value between 0.05 and 0.10.

Functionality

Tarkett TAPE™

Easy, quick
and clean
installation
of carpet
tiles

No glue
No downtime
Maximum flexibility

TarkettTAPE changes the standard in carpet tile installation by offering maximum flexibility and adhesive qualities without using any glue on the subfloor.

Maximum flexibility

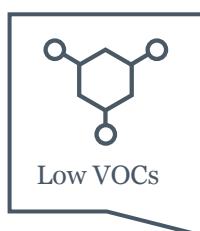

DESSO carpet tiles installed with TarkettTAPE can easily be removed. Because the tape sticks to the tile, and not to the floor, you can change your carpet tiles when needed or return them to us for recycling at the end of use. TarkettTAPE leaves no traces on the subfloor, the tiles all stick solidly, creating a 'floating' floor that stays in place as long as needed.

TarkettTAPE sticks straight from the roll, whereby installers find it quick, clean and easy to use. It has very low VOC-emissions (Volatile Organic Compounds)¹, no odour, and no drying time. With these specifications, TarkettTAPE contributes perfectly to your sustainability goals.

Fast and Easy Installation

Each tape unit measures ca. 8 x 10 cm with notched perforations between each unit. There are 324 units per roll with a coverage area of ca. 80 m²/roll installed with 50 x 50 cm tiles. Packaged from 1 to 16 rolls per box with a minimum order quantity of one roll. The tape unit is centered at the corner of the tile as to engage the inner section of the two adjacent and one opposing tile corners.

TarkettTAPE works perfectly with both our DESSO EcoBase® and DESSO ProBase backing.

¹ TarkettTAPE has been tested and determined to be in compliance with CRI's Green Label Plus Indoor Air Quality Testing Programme.

Cradle to Cradle® Philosophy

Shifting
towards
a circular
economy

'If all citizens of the world would live by US standards, we would need more than 4 planet Earths'.

We are passionate about creating products that have a positive impact on people's health and wellbeing inside their homes and in the workplace and that also contribute to a more sustainable business model in the future. We achieve this through Cradle to Cradle® design where 'waste equals food' is at the heart of the design philosophy.

Tarkett has been applying Cradle to Cradle® principles since 2011 and for DESSO carpets this process started in 2008.

Cradle to Cradle® is a concept that is modelled on nature and sees materials as nutrients which should circulate in healthy, safe flows.

The Cradle to Cradle® concept was developed in the 1990s by the German chemistry professor and process engineer Michael Braungart and the US-American architect William McDonough. Their institute, EPEA (Environmental Protection Encouragement Agency) in Hamburg, has set up a certification system for products and industrial processes that corresponds to the requirements of Cradle to Cradle®.

The 150 year old linear model often referred to as the 'take, make and waste' model once seemed to make sense. Now, this is no longer the case. One answer would be to curb economic growth and encourage everyone to spend less. However, we believe there is a better alternative, in which more people can benefit from economic growth and prosperity. Therefore, our commitment to Cradle to Cradle® and the circular economy remains a key focus for us.

Cradle to Cradle®
ReStart®

A future
for used
carpets

Our Cradle to Cradle® Gold Level certified DESSO EcoBase® backing is fully recyclable

ReStart is our take back programme to collect post-consumer carpet tiles. Upon return, carpets are processed using our carpet recycling centre which separates the yarn and other fibers from the backing. The applied treatment of each fraction is dependent on the quality and/or composition of the tiles.

Our Cradle to Cradle® Gold certified DESSO EcoBase backing is fully recyclable in our own production facility. The PA 6 yarn can be returned to our yarn manufacturer for the production of new yarn. Carpet tiles with bitumen backing (a backing used in most carpet tiles in Europe presently) is reused as high calorific fuel in the cement industry. All non-recyclable fractions during the process will be used as secondary fuel in the cement industry.

Thanks to Tarkett's ReStart® take-back programme, post consumer carpet tiles can be given a new lease of life by returning them for recycling.

For questions about our ReStart programme, please contact your local sales representative.

Cradle to Cradle®

DESSO EcoBase®

DESSO EcoBase® backing

Going circular with EcoBase

EcoBase is our 100% recyclable Cradle to Cradle Gold-certified™ carpet tile backing. Made with entirely positively defined¹ ingredients, it has achieved Cradle to Cradle® Platinum level for material health, helping to create a healthier, flourishing work space, as health and safety moves up the workplace agenda. In Europe, wellbeing is now the biggest priority for office-based organisations.²

Following a unique collaboration with Dutch drinking water companies to upcycle chalk, EcoBase now contains 75% positively defined chalk, which is itself derived from 100% positively defined recycled materials.

Lloyd's Register assured the EcoBase backing as 100% recyclable and the chalk as 100% pre-consumer recycled material.

As part of a sustainable, people-friendly flooring solution, EcoBase can contribute to both promoting workplace productivity and satisfaction, and achieving sustainable building standards including BREEAM, LEED and WELL.

Available for the entire carpet tile range, every material used to make EcoBase can be safely recycled at our own recycling facility with no loss of quality, generating fewer carbon emissions than creating new carpet from scratch.

¹ Positively defined = all ingredients have been assessed as either Green (optimal) or Yellow (tolerable) according to the Cradle to Cradle® assessment criteria. As described in Cradle to Cradle® Certified™ Product Standard Version 3.1)

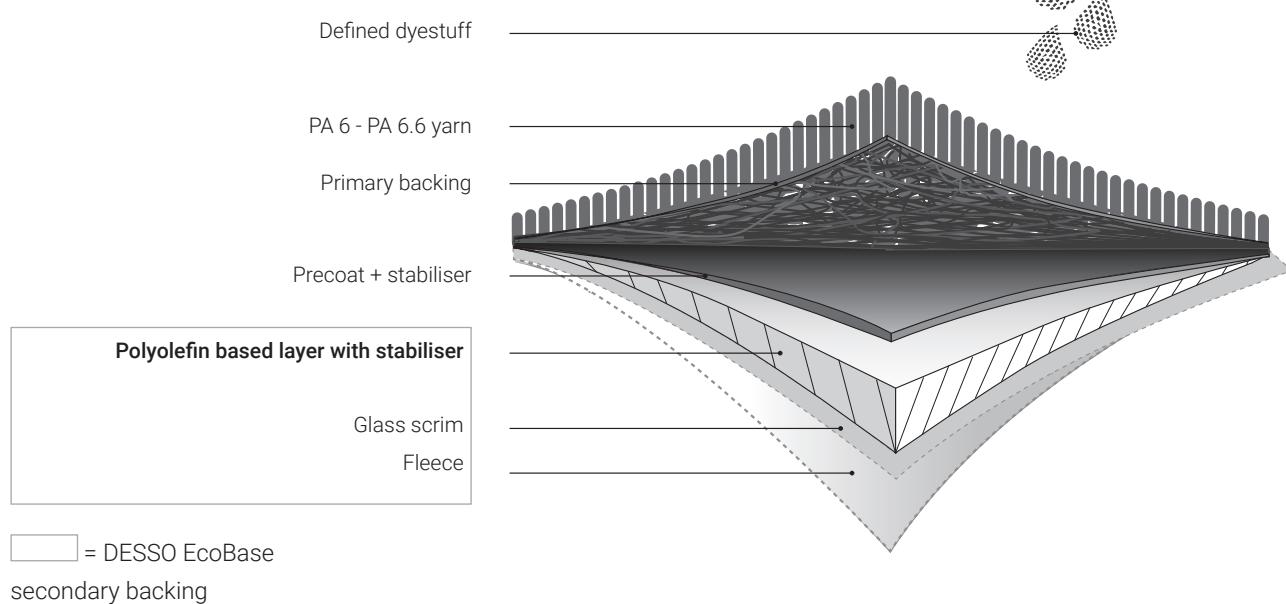

² According to 44% of respondents to a survey of 2,500 office workers, commissioned by Tarkett.

³ This statement has been third-party reviewed and confirmed.

Ultimately, switching to EcoBase enables Tarkett and our customers to 'close the loop' and contribute to the circular economy.

EcoBase in 3 key figures

- EcoBase is 100% recyclable at our purpose-built production line in Waalwijk.
- EcoBase is Cradle to Cradle Gold-certified™ with 100% positively defined materials and Platinum level for material health.
- Recycling EcoBase-backed carpet tiles generates CO₂ savings of up to 20% per product cycle compared to co-generation of EcoBase in the cement industry³.

Cradle to Cradle®

ECONYL® yarn

No waste. No new resource. Just endless possibilities

The ECONYL® Regeneration System

Sustainable activities are often defined in terms of minimising their environmental impact. The Cradle to Cradle® philosophy recognises that we all create an impact on the world we live in. The challenge is to make this impact beneficial for current and future generations.

Co-operation and commitment

From the onset, we recognised that in order to achieve our Cradle to Cradle® goal, co-operation and commitment is needed from key partners. Currently, over 70% of our carpet tile range is available with ECONYL® yarn.

ECONYL® is a yarn which is made from 100% regenerated nylon including discarded fishing nets and post-consumer yarn waste from our carpet recycling centre. This development has been accomplished in close collaboration with yarn supplier Aquafil.

For more information: www.econyl.com

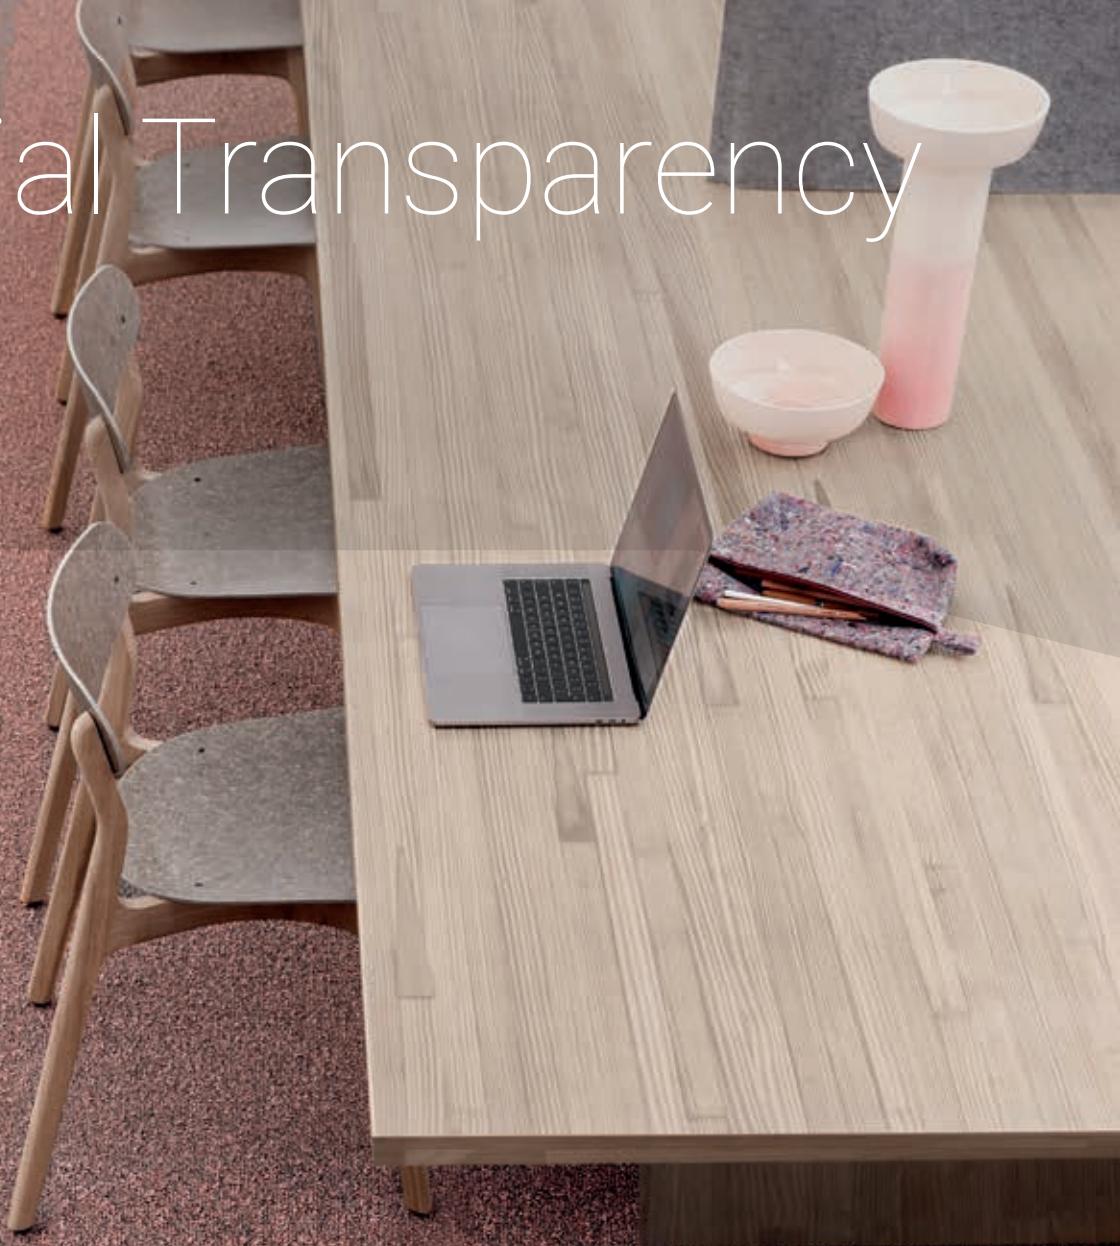

Healthy Seas

As a company we support the Healthy Seas initiative. The initiative aims to remove waste, in particular fishing nets for the purpose of creating healthier seas and recycling marine litter into regenerated yarn, some of which is being used to produce DESSO carpet tiles.

For more information: www.healthyseas.org

Material Transparency

With 70% of the world's population set to live in cities by 2050, the built environment stands to play a major role in reducing global greenhouse gas emissions, conserving natural resources and contributing to people's health and wellbeing.

By developing Environmental Product Declarations (EPDs) and introducing Material Health Statements (MHS), we're providing our customers with a clear view of the respective environmental and health profiles of the materials within our products, helping them to make more informed purchasing decisions. In this way, architects and designers will be able to achieve higher sustainable building scores, meet existing and future building regulations, reduce waste and promote the safe recycling of good materials in a circular economy.

Environmental product declarations (EPD'S)

We have already moved ahead of evolving building regulations and sustainable building certifications by providing customers with EPD statements that highlight the environmental impacts of a product. Central to our sustainability strategy, EPDs are based on lifecycle analysis, and allow us to identify ways to improve the environmental footprint of our products.

For carpets find Tarkett EPDs: <https://ibu-epd.com/en/published-epds/>

EPD's are often complex to understand for non-experts, focus primarily on environmental, rather than health aspects, and do not disclose qualitative detail about the health risks or impacts of individual ingredients. The Tarkett Material Health Statements bridges this information gap, providing accurate information on the hazards and risks of each material.

Material Health Statements (MHS's)

The Tarkett MHS is an independently verified, science-based declaration highlighting the health risk and hazards of materials in a particular product, down to 100 ppm (0.01%). By introducing the MHS, we are complementing the environmental data provided by our EPDs, responding to our customers' needs, and helping to lead the journey towards healthier materials and greater transparency.

Easy to understand and unique in the marketplace, the Tarkett MHS also represents the first step towards Cradle to Cradle® (C2C) certification and the continuous optimisation of our products. The third-party assessment of our materials is conducted by the Environmental Protection Encouragement Agency (EPEA), the research institute established in 1987 by Dr. Michael Braungart, who co-developed the C2C design concept. Since 2010, the EPEA team has assessed more than 3,000 Tarkett materials according to C2C criteria.

MHS disclosure statements and certificates are now available for customers throughout the EMEA region. **Please contact sustainabilityEMEA@tarkett.com**

Green Building Schemes

DESSO carpets qualify for credits under the internationally accredited Green Building Schemes LEED version 4, BREEAM and WELL.

With particularly high contributions in the categories of Indoor Air Quality, Acoustics, Material Transparency and Material Health, you get the comfort and trust of knowing that with our products you can positively contribute to a healthier and more human-centric built environment.

DESSO® carpet and the environment

BYGGVARU BEDÖMNINGEN

As a carpet manufacturer, we know our customers want re-assurance that our products meet the highest quality standards.

DESSO carpets adhere to the following industry standards:

- AS 9100 certified (Aviation)
- BRE certification
- Byggevarubedömmningen
- CE Certificate of Conformity (Europe)
- Cradle to Cradle® Bronze certification
- Cradle to Cradle® Silver certification
- Cradle to Cradle® Gold certification
- CRI Green Label Plus (according to the LEED directive for building products)
- Green Tag, Australia
- "Grenelle" law France - effective July 2013
- GUI Allergy certification
- GUI Gold certification (DESSO AirMaster®)
- GUI Gold+ certification (DESSO AirMaster®)
- IMO / MED certified (Marine)
- ISO 9001 and ISO 14001 certified
- NF-UPEC Certification*
- Prodis-GUT member + certified
- SEC Singapore Green Label

* Only for the products: Essence, Essence Stripe, Stratos EcoBase, Stratos Blocks EcoBase and Tempra

Tarkett is committed to doing good and this is also an open invitation to our customers, our peers, our industry to join us in creating a healthy, beautiful and sustainable world.

Applying the Cradle to Cradle® principles since 2008

Among the first companies joining the Circular Economy 100 in 2013

Supporting the 10 principles of the Global Compact

Create your own AirMaster®

You can also 'Create your own AirMaster', where you have the freedom to create the colour combination of the carpet tiles yourself.

With just one click you will get insight in to how your design will look in various environments. In total **more than 6 million possibilities** are available giving you endless design freedom to create your own AirMaster. For more information: www.desso-airmaster.com.

Preliminary specification according to EN 1307

Type of manufacture	Tufted 1/10 "	ISO 2424
Aspect	Structured loop pile	ISO 2424
Dye method	Solution dyed	
Dimension	50 cm x 50 cm / 19,68" x 19,68" (20 tiles per box)	EN ISO 24342
Primary backing	Colback® Gold Polyester fleece	ISO 2424
Secondary backing	DESSO EcoBase® * - Containing at least 75% C2C positively defined recycled content	ISO 2424
Pile fibre composition	BCF Polyamide 6 and ECONYL® (ECONYL® is made from 100% regenerated content) **	ISO 2424
Total thickness	6.0 mm	0.2 inch
Effective pile thickness	2.4 mm	0.09 inch
Total mass	4150 g/m²	122.5 oz/yd²
Total pile mass	650 g/m²	19.2 oz/yd²
Effective pile mass	345 g/m²	10.2 oz/yd²
Pile density	0.144 g/cm³	0.0052 lb/in³
Number of tufts	1580 /dm²	132104 /yd²
Stroll test	≤ 2,0 kV	ISO 6356
Vertical resistance	≤ 1 x 10⁹ Ohm	ISO 10965
Use classification	33 Commercial - heavy use	EN 1307
Dimensional stability	≤ 0,2 %	EN 986
Impact sound reduction ΔLw	25 dB	ISO 10140
Noise reduction	0.15 αw	ISO 354
Flammability	Bfl - s1 (loose laid tested)	EN 13501-1
Light Reflectance Value (LRV)	See right side page per colour	BS 8493
Colour Depth (L)	See right side page per colour	CIELAB

* DESSO EcoBase® is a polyolefin based backing. Positively defined means: all ingredients have been assessed as either Green (optimal) or Yellow (tolerable) according to the Cradle to Cradle® assessment criteria. As described in Cradle to Cradle® Certified CM Product Standard Version 3.0. The total % of recycled content varies per product and per colour which can be found on our website: www.tarkett.com

** ECONYL® is a yarn made from 100% regenerated content. The total % of regenerated content varies per product and per colour. Whether a colour contains ECONYL® and the exact % thereof can be found on our website: www.tarkett.com

* DESSO EcoBase® is a polyolefin based backing. Positively defined means: all ingredients have been assessed as either Green (optimal) or Yellow (tolerable) according to the Cradle to Cradle® assessment criteria. As described in Cradle to Cradle® Certified CM Product Standard Version 3.0. The total % of recycled content varies per product and per colour which can be found on our website: www.tarkett.com

** ECONYL® is a yarn made from 100% regenerated content. The total % of regenerated content varies per product and per colour. Whether a colour contains ECONYL® and the exact % thereof can be found on our website: www.tarkett.com

Essence Stripe

DESSO Essence Stripe 8522, Essence 8413, 9005

Specification according to EN 1307

Type of manufacture	Tufted 1/10 "	ISO 2424
Aspect	Loop pile	ISO 2424
Dye method	Solution dyed	
Dimension	50 cm x 50 cm / 19,68" x 19,68" (20 tiles per box)	EN ISO 24342
Primary backing	Polyester fleece	ISO 2424
Secondary backing	DESSO ProBase Polyver®	ISO 2424
Pile fibre composition	BCF Polyamide 6	ISO 2424
Total thickness	5.5 mm	0.2 inch
Effective pile thickness	2.6 mm	0.10 inch
Total mass	3900 g/m²	115.1 oz/yd²
Total pile mass	500 g/m²	14.8 oz/yd²
Effective pile mass	310 g/m²	9.1 oz/yd²
Pile density	0.119 g/cm³	0.0043 lb/in³
Number of tufts	1580 /dm²	132104 /yd²
Stroll test	≤ 2,0 kV	ISO 6356
Use classification	33 Commercial - heavy use	EN 1307
Dimensional stability	≤ 0,2 %	EN 986
Impact sound reduction ΔLw	24 dB	ISO 10140
Noise reduction	0.15 αw	ISO 354
Flammability	Bfl - s1 (loose laid tested)	EN 13501-1

Pile fibre composition	BCF Polyamide 6 ECONYL® (ECONYL® is made from 100% regenerated content) **	ISO 2424
Total thickness	6.5 mm	0.3 inch
Effective pile thickness	3.0 mm	0.12 inch
Total mass	4050 g/m²	119.5 oz/yd²
Total pile mass	600 g/m²	17.7 oz/yd²
Effective pile mass	350 g/m²	10.3 oz/yd²
Pile density	0.117 g/cm³	0.0042 lb/in³
Number of tufts	1580 /dm²	132104 /yd²
Stroll test	≤ 2,0 kV	ISO 6356
Vertical resistance	≤ 1 x 10⁹ Ohm	ISO 10965
Use classification	33 Commercial - heavy use	EN 1307
Dimensional stability	≤ 0,2 %	EN 986
Impact sound reduction ΔLw	24 dB	ISO 10140
Noise reduction	0.15 αw	ISO 354
Flammability	Bfl - s1 (loose laid tested)	EN 13501-1
Light Reflectance Value (LRV)	See right side page per colour	BS 8493
Colour Depth (L)	See right side page per colour	CIELAB

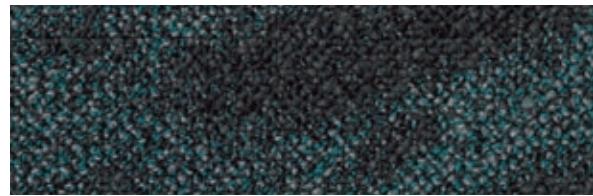

* DESSO EcoBase® is a polyolefin based backing. Positively defined means: all ingredients have been assessed as either Green (optimal) or Yellow (tolerable) according to the Cradle to Cradle® assessment criteria. As described in Cradle to Cradle® Certified CM Product Standard Version 3.0. The total % of recycled content varies per product and per colour which can be found on our website: www.tarkett.com

** ECONYL® is a yarn made from 100% regenerated content. The total % of regenerated content varies per product and per colour. Whether a colour contains ECONYL® and the exact % thereof can be found on our website: www.tarkett.com

DESSO Denim Stonewash Light 141-133

Preliminary specification according to EN 14215

Type of manufacture	Tufted 1/10 "	ISO 2424
Aspect	Structured loop pile	ISO 2424
Dye method	Space dyed	
Dimension	Different dimensions in length x max. 400 cm in width	
Primary backing	Polyester fleece	ISO 2424
Secondary backing	Felt backing 250g	ISO 2424
Pile fibre composition	BCF Polyamide 6 ECONYL® (ECONYL® is made from 100% regenerated content)*	ISO 2424
Total thickness	8.9 mm	0.4 inch
Total mass	2510 g/m²	74.1 oz/yd²
Total pile mass	850 g/m²	25.1 oz/yd²

* ECONYL® is a yarn made from 100% regenerated content. The total % of regenerated content varies per product and per colour. Whether a colour contains ECONYL® and the exact % thereof can be found on our website: www.tarkett.com

DESSO carpet and carpet tiles have been manufactured with the greatest care. Upon leaving our factory, you can rest assured that DESSO products meet all specifications described in the relevant product documentation. DESSO carpet and carpet tiles, however, only really come to life when installed. To ensure proper installation it is of vital importance that the installation instructions described by us are followed carefully. Only then can you ensure optimum results.

To be able to enjoy DESSO products to their full potential, proper maintenance is crucial.

Installation and maintenance instructions of all DESSO products can be found on www.tarkett.com, or with your local representative.

Should you have any additional questions on installation and maintenance of DESSO products, our Technical Services Department will be happy to help you.

Descriptions, colours and specifications are subject to change without notice. Tarkett is not responsible for typographical or photographic errors. Actual product may differ from illustration.

DESSO flooring products are to be installed in full accordance with Tarkett's installation instructions and recognised trade standards. An effective, regular cleaning and maintenance programme is vital for retaining a high appearance level. DESSO flooring products should only be used as floorcoverings. Note: Tarkett reserves the right to amend this specification without giving prior notice. For the latest versions of the technical specifications, visit our website: www.tarkett.com.
