

IQ Range

Issued to:	TARKETT
Product specifications	iQ Granit, iQ Granit Acoustic, Granit Multisafe, iQ Eminent, iQ Megalit, iQ Optima, Optima Acoustic, Optima Mutlisafe, iQ Surface
Issue date:	April 1 st , 2021
Expiration date:	March 31 st , 2023
Evaluation threshold:	At least 100 ppm of the final product
After-use scenario:	Text or Link to website
EPEA Registry No:	39581.3
MHS Version:	2.0

FUNCTION	CHEMICALS	CAS / EC	CONTENT	EPEA RATING	COMMENT	GS-LT GS-BM ^(b)	REACH
PVC	PVC*	9002-86-2	<50%		Transitional use of PVC is tolerated in durable applications designed with safe materials and a collection and recycling program in place ^(a) . Tarkett provides a take back guarantee after use within the ReStart [®] reclaiming program. Vinyl chloride content is below 1 ppm in purchased products.	LT-P1	✓
	Polymerization auxiliaries*	Proprietary 3	<0.5%			N.I.	-
Fillers	Proprietary*	Proprietary 1	<30%		Fillers consist primarily of pulverized stones that include minor contents of other minerals. Low respirable quartz levels. No concern in the finished product	LT-UNK	✓
						N.I.	✓
						LT-1	✓
						BM1	✓
Plasticizers	1,2-Cyclohexanedicarboxylic acid, 1,2-diisononyl ester (DINCH)*	166412-78-8	<15%		Alternative to phthalate plasticizers approved for food contact application with high migration limit reflecting a much better safety profile in the cases of DINCH and DOTP. DINCH is produced by hydrogenation of DIMP with thus modified properties. No toxicity identifiable, especially no mutagenicity, carcinogenicity or reproductive toxicity observed in animal tests. DOTP has an uncritical toxicity profile. No concern with the toxicologically well characterized benzoate plasticizer.	LT-UNK	✓
	Terephthalic acid, dioctyl ester (DOTP)*	4654-26-6				LT-UNK	✓
	Dibenzoate oxyalkylene ester*	907-434-8				N.I.	✓
	1,2-Cyclohexanedicarboxylic acid, 1-methyl, 2-iisononyl ester (MINCH)*	Not available				N.I.	✓
	Water*	7732-18-5				BM4	✓
Stabilizers	Soybean oil, epoxidized*	8013-07-8	<5%		ESBO is a scavenger of hydrochloric acid that may be formed during the flooring use period) with plasticizing effect. Chemically well-defined and environmentally best performing calcium/zinc heat stabilizer system.	LT-P1	✓
	Proprietary*	Proprietary 2				LT-UNK	✓
						LT-P1	✓
						BM3	✓
						N.I.	-
Additives	Proprietary*	Proprietary 2	<0.5%		No risk expectable from the processing aids used. However, a minor share remains only approximately defined.	N.I.	-
						LT-UNK	✓
						BM1	✓
						LT-UNK	✓
						LT-P1	✓
	Proprietary 3		N.I.	-			
		N.I.	-				

FUNCTION	CHEMICALS	CAS / EC	CONTENT	EPEA RATING	COMMENT	GS-LT GS-BM ^(b)	REACH
Pigments	Titanium Dioxide*	13463-67-7	<1.5%		Potential health issue related to dust inhalation during mining/production of titanium dioxide. No concern in the finished product. Chlorinated and copper containing pigments are not recommended in the context of PVC.	LT-1	✓
	Carbon Black*	1333-86-4				BM1	✓
	Pigment Yellow 110*	106276-80-6				LT-P1	✓
	Pigment Red 254*	84632-65-5				LT-UNK	✓
	Pigment Yellow 95*	5280-80-8				LT-P1	✓
	Silicon dioxide*	69012-64-2				LT-1	✓
	Aluminum trihydrate*	1333-84-2				BM2	✓
	Aluminum phosphate*	7784-30-7				LT-UNK	✓
	Mica*	12001-26-2				LT-UNK	✓
	Zirconium dioxide*	1314-23-4				LT-UNK	✓
	Proprietary*	Proprietary 2				BM1	✓
Surface Treatment	Proprietary*	Proprietary 2	<1%		Complex coating macropolymer based on polyurethane acrylate that is UV cured during application. The chemical nature of the polyurethane contribution is object of investigations	None	✓
	Water	7732-18-5				LT-P1	✓
	Polyurethane*	Proprietary 3				BM4	✓
Acoustic layer ^(*)	Polyurethane*	Proprietary 3	<10%		Approximately defined, polyurethane-based acoustic layer	N.I.	-
	MDI based Prepolymer*					N.I.	-
	Carbon black*	1333-86-4				BM1	✓
THEREOF:							
Content sourced from abundant minerals			56%	Calcium carbonate and the chlorine part of PVC are most predominant contributors to this figure.			
Recycled content	- Internal post-industrial source (Reprocessed own production output)		25%	Raw materials used to generate the recycled content have all an industrial pre-use origin and are therefore chemically largely defined. The contribution of the recycled content is highlighted with * after the chemical name.			
	- Post-installation / Pre-use source		0.5%				
	- Post-use source		-				
Biologically renewable content	- Animal		-	No chemical with a possible animal origin is identified.			
	- Vegetal		5%	Epoxidized soybean oil is of vegetal origin and the only source identified.			

(*) The acoustic layer is used only in the production of the iQ Optima Acoustic specification.

EPEA's rating methodology is based on the Cradle-to-Cradle approach with the European Precautionary principle. It is made in relation with a quality target, an after-use scenario and on the background of the specific supply chain materials used by the article's manufacturer. The assessment of hazard/safety properties of chemicals is made at the best of our knowledge at the date of MHS™ issue (more information in the "MHS development Guidance V2.0", link in the legend below). EPEA believes the data forth herein are accurate as of the date hereof. EPEA makes no warranty with respect thereto and expressly disclaims all liability for reliance thereon. Such data are offered solely for your consideration, investigation, and verification.

Legend:

EPEA RATING:

-  No concern
-  Moderate concern
-  High concern – Task for material optimization
-  Unknown concern - Task for knowledge development

REACH compliance:

- ✓: Substance is listed neither in Annex XIV nor in Annex XVII nor as SVHC and complies with European Union Regulation EC 1907/2006 applicable to this article.
- XVII** or **XIV**: Substance listed in Annex XVII (Restriction) or Annex XIV (Authorisation) of REACH regulation applicable to this article
- SVHC**: Substance of Very High Concern. Candidate for listing in Annex XIV (Authorization list) of REACH Regulation at a concentration above 0.1%
- : Not applicable due to missing CAS

GS-LT^(b)

- LT-1**: Chemical is found on an authoritative list of the most-toxic chemicals
- LT-P1**: Chemical may be a serious hazard, but the confidence level is lower
- LT-UNK**: Unknown (no data on List Translator Lists)

GS- BM^(b)

- BM1**: Avoid: Chemical of High Concern
- BM2**: Use but search for Safer Substitutes
- BM3**: Use but still opportunity for improvement
- BM4**: Prefer: Safer Chemical
- BMU**: "Unspecified"; insufficient data
- N.I.** (No GS rating): Chemical is not listed in the source of GS and GS-LT ratings
