VINYL FLOORCOVERING WITH ENHANCED SLIP RESISTANCE

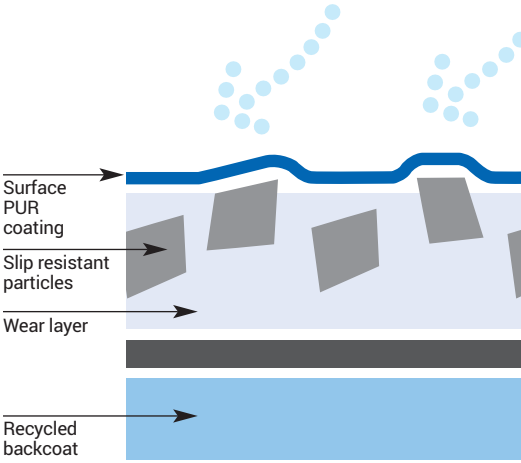
Safety clearly ingrained

- 'Smart Particle Technology' for a more natural looking finish
- 'Super Matt' surface effect
- Airforce Applied Technology for thorough surface protection and enhanced resistance to scuffs and stains *(see page 5 for details)*
- A truly commercial safety floor EN13845 with domestic appeal
- Fully sustainable 36+ pendulum rating as per NHS guidelines
- Tarkett's industry leading 'responsible PVC', Low VOC's and Phthalate free for best indoor air quality
- Available in loose lay and acoustic options*
  *Available to order – minimum 5 rolls
- Fully recyclable via Tarkett Restart programme
- 40% recycled content

Safetred Wood - Traditional oak middle natural

2DAYexpress
CORE COLLECTION FROM TARKETT

NEW **Airforce Applied Technology** for thorough surface protection on Tarkett Safetred products



Airforce Applied Technology

Traditionally applied surface coatings may be compromised by protrudence of the slip resistant particles. This can leave the floor more susceptible to contamination from dirt and staining agents.

Airforce Applied Technology uses high pressure airstreams to ensure more comprhensive coverage of the floor surface – Thorough Surface Protection.
