DESIGNING WITH WELDING RODS

BLENDING IN

Welding rods are vinyl extruded threads to be used to join two separate sheets of iQ vinyl material, for floors, walls or furniture, and by tradition it is common practice to use rods that blend into the surface material. The listing of best matching welding rod (20 Master references, one for each iQ Surface colour) can be found in the table next page.

Contrast Multi

with blending welding rod Medium Burgundy

Sober Multi
with blending welding rod Grey Green

Dimmed Airy
with blending welding rod Green White

Vivid Airy
with blending welding rod Light Grey

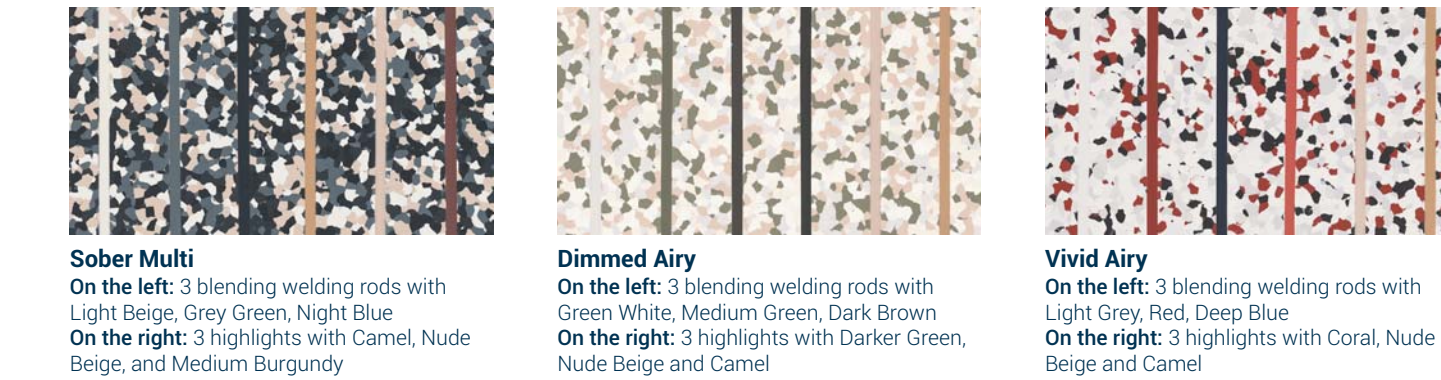

STANDING OUT WITH COLOUR MIX AND MATCH

Like the iQ Surface collection, the welding rod selection has been designed to mix and match patterns and colour families. Creating highlights can be easily done by cross-matching welding rod colours within an iQ Surface colour collection. Either by choosing one of the 20 Master colours mentioned above, or one of the 5 additional colours that were defined to further create highlights (Coral, Nude Beige, Camel, Darker Green and Dark Burgundy) referring to Accent colours on the table next page.
